Prusikin,Michael: 'The Ruy Lopez Exchange Variation Typical Ideas For Black Generally, the exchange variation of the Ruy Lopez (Spanish) has the reputation of modest, but very solid option for White. He "sacrifices" the bishop pair in order to get a better pawn structure, and if everything goes well, a winning pawn endgame. However, in my opinion, Black has some more valuable trumps of his own. As long as there are some pieces on the board Black's pawn structure should not be any worse, while his bishops may prove to be real monsters in a long run. Now, let us take a closer look at some instructive examples which feature the clash of those strategic elements.'''The Ruy Lopez Exchange Variation Typical Ideas For Black Generally, the exchange variation of the Ruy Lopez (Spanish) has the reputation of modest, but very solid option for White. 1.c4 g6 2.Nc3 c5 3.g3 Bg7 4.Bg2 Nc6 5.e3 e5 Black signifies his intention to go for a fighting game.

Instead the symmetrical line:

[5...e6 6.Nge2 Nge7 has a very drawish reputation (see Guo-Yuan and earlier games in the Archives), so it would be interesting to see what Nakamura had in mind there.]

6.Nge2 Nge7 7.0-0 0-0 8.Nd5 An earlier Nakamura game continued:

[8.a3 a5 9.d3 d6 10.Rb1 Rb8 11.Nd5 Nxd5?! *(11...b5!* is fine for Black *)* 12.cxd5 Ne7 13.b4 cxb4 14.axb4 b5 15.bxa5 Qxa5 16.Bd2 b4 17.Qb3 Bg4 18.Nc1 Rb6 19.Na2 Be2 20.Rfc1 Bxd3 21.Qxd3 Qxa2 22.Rxb4 with an extra pawn for White, Nakamura,H (2779)-Dominguez Perez, L (2739) Doha (blitz) 2016 1-0 (57)]

8...d6 9.Nec3

[9.a3 a5 10.Nec3 Be6 11.Rb1 Rb8 12.d3 Qd7 13.Re1 Bh3 was played in Sanduleac,V (2435)-Doncea,V (2460) Creon 2009 1/2-1/2 (23), and now there is an interesting idea that I don't recall seeing before. White can play: 14.Nb6! Qe6 15.Bd5 Qf5 16.f3 and Black's queen (and bishop) are almost trapped. After Qh5 17.Ne4 Rbd8 18.Bd2 White is much better.]

9...Bf5 A new move, aiming to pursue the bishop trade with 10...Qd7 and 11...Bh3. Black normally plays the conventional:

[9...Rb8 for example 10.Rb1 Nxd5 11.Nxd5 Be6 12.b3 Ne7 13.Nxe7+ Qxe7 14.Bb2 Rfd8 15.Qe2 d5 with balanced chances, Kantsler,B (2507)-Markowski,T (2592) Ohrid 2001 0-1 (73)]

10.d3 Qd7 11.a3 Bh3 12.Rb1 Bxg2 13.Kxg2 Nxd5 14.cxd5 Ne7 15.b4 Instead after:

[15.e4 Rac8 Black can diminish the effectiveness of the b2-b4 push, for example *(15...f5* is well met with *16.b4)* 16.Bd2 f5 17.b4 c4 and Black is fine]

15...cxb4 16.axb4 Bh6?! Black was keen to trade his 'bad' bishop, but counter-intuitively, it seems that Black is better off keeping the bishops on. Instead:

[16...Rac8 17.Bd2 e4! opening up the bishop's scope, now it looks much better than its counterpart on the d2-square. 18.Nxe4 *(18.d4* can be met by *Qf5* hitting the d5-pawn*)* 18...Nxd5 19.Qb3 Nf6 when despite Black's extra pawn island, the chances are level here.]

17.e4 Bxc1 18.Rxc1 Rfc8 19.Qd2 Rc7 20.f4 Now the absence of the 'King's Indian' g7-bishop leaves Black's kingside, and central pawn chain, rather loose and open to attack. **20...Rac8 21.fxe5** Here the typical attacking thrust:

21...dxe5 22.Rc2 The d5-d6 thrust is in the air, but doesn't work yet:

[22.d6 Qxd6 23.Nb5 Rxc1 24.Nxd6 R1c2 and Black is at least OK]

22...Qd6 23.Qf2? A big oversight. Instead

[23.Rfc1 leaves White for choice. Note that Qxb4 doesn't work because of 24.Rb2 and now Qc5 25.d6 Qxd6 26.Nb5 picks up the exchange]

23...Nf5! If it wasn't for this move, Black had no good way to defend the f7-pawn, but now the tables are suddenly turned in Black's favour. **24.exf5** Otherwise the pinned c3-knight is doomed anyway. **24...Rxc3 25.Rxc3 Rxc3 26.Qf3** White has a grim endgame also after:

[26.fxg6 Qxd5+ 27.Qf3 Qxf3+ 28.Kxf3 hxg6 29.Ke4 Kg7 30.Kxe5 Rxd3 etc.]

26...gxf5 27.Qxf5 Qxd5+ 28.Kh3 Rc6 Black is a pawn up, and continues by hassling White's king **29.g4 Rd6 30.Rf3 Qe6 31.Qg5+ Kf8 32.Re3 Qh6+** A human approach, trading down to a clearly better rook endgame. Instead:

6...Bg7 7.Nec3 0-0 8.Be2 e6

Pavel Eljanov twice played this line with Black in 2006, but his opponents tried to do without an early f3-f4. If White wishes to play f3-f4, he should do it before ...cxd5, when the black knight cannot go to g4. **9.f4 Ned7 10.0-0N**

Nakamura's consistency was the key to his success in this event. In this game, he outplayed Svidler by demonstrating a simple but very effective plan. Despite lacking the bishop pair, White is in control of this position and after **24.f4!** meant to stop Blak's plan with e5, Black seems to be out of ideas. **24...Qa5 25.Qg2!** With the position without good pawn breaks for Black, White can slowly focus on his own break on the king side; now preparing g4. **25...e6 26.Bd3?!** In my opinion this wasn't a necessary move, but more like a waste of time.

[26.g4 would have been crushing similarly to the game.]

[while 11...Bd7? was surprisingly seen in a 2600+ game: 12.f3? *(12.Nf5! exf5 13.Qxg7 Rf8 14.Bg5* has long been known to be extremely powerful, and I certainly have no idea what Najer intended here*)* 12...0-0 13.a4 b4 14.Nce2 Kh8 15.Rfd1 Nc6 16.Nxc6 Bxc6 17.Nd4 Bd7 and after that let-off Black was OK in Hracek-Najer, Plovdiv (rapid) 2008.]
12.f3 0-0!?
[I had believed this to be slightly inaccurate, but Svidler presumably disagrees or couldn't fully remember his lines having been surprised by 6 Bc4. Instead 12...b4 13.Na4 0-0 is a decent enough choice, as outlined by Georgiev,]
[who also points out that 12...Nc5!? 13.Qxg7!? Rg8 14.Qh6 b4 15.Nd1 Bd7 isn't at all clear.]
13.Bd5?!
[A novelty, but as White doesn't really get anywhere with this, I suspect that he should prefer the older 13.Nd5! , after which Bd8 *(13...Ne5 14.Nxe7+ Qxe7 15.Rad1 Bb7 16.Bg5* gave White a pleasant advantage in Wahls-Neurohr, Berlin 1989 *)* 14.Nxf6+ Bxf6 15.Qxd6!? *(*risky *15.Rad1* looks like a safe try for an edge*;* while *15.c3 Qb8?! 16.Rad1 Qc7?!* (baffling) *17.Bxe6! fxe6 18.Nxe6 Qc4 19.Nxf8 Nxf8 20.Qxd6* left White somewhat better in Blomqvist-Levin, Herceg Novi 2008*)* 15...Be5 16.Qe7 Bf6 17.Qa3 is a risky pawn grab, but one which might be playable since 18 Qa5 is next up and a5 runs into 18.Nxe6! b4 19.Qa4 Nb6 20.Qb5 .]
13...Nxd5
[The only move as, of course, Black had to avoid 13...exd5?? 14.Nf5 .]
14.exd5 Ne5 An excellent square for the knight and, meanwhile, it's not too clear what White's up to. **15.Rad1 b4 16.Na4 Nc4**
[Not bad and another idea was 16...exd5!? , since 17.Nb6 Rb8 18.f4 can be met by Ng4 19.Nxc8 Qxc8 , followed by a trade on e3 and ...Bf6. In both cases I suspect that Black is already slightly better.]
17.Bh6 Bf6 18.b3 Nb6 19.dxe6 fxe6 20.Nxb6 Qxb6 21.Be3 Qc7 Svidler must have been very happy with the outcome of the opening he enjoys the bishop-pair, queenside pressure and

Navara instead defends in a much better and more resolute manner.] **22...e5 23.Ne2 Be6 24.Bg5!** White must trade pieces and then play against Black's central pawns. **24...Qc5+** [Not bad, but perhaps more precise was 24...Rac8!? 25.Bxf6 Rxf6 when everything is set to advance either the a-pawn or even the d-pawn.] **25.Kh1 Bxg5 26.Qxg5 e4!?** A big moment and I'm not certain that Svidler made the best choice. His decision to play with a light-squared bishop against a knight and vulnerable queenside is a very logical one, but quite possibly Black would have been better off maintaining the tension, since the forthcoming exchanges do give White some breathing space. **27.Qxc5 dxc5 28.Kg1 exf3 29.Rxf3 Rfd8 30.Rfd3 Rxd3 31.Rxd3 a5 32.Ng3!** Good defence from Navara the knight must be rushed to e4. **32...c4** [Black might like to go 32...a4 , but here White has 33.Re3 Bf7 34.Ne4 axb3 35.axb3 Ra2 36.Nxc5 Rxc2 37.Na6 and the draw becomes clear.] **33.Rd6 Bf7 34.Nf5 h6 35.Kf2?!** [Now White experiences some difficulties, whereas 35.Ne3 cxb3 36.axb3 would surely have drawn more simply: a4 37.bxa4 Rxa4 38.Kf2 Ra2 39.Kf3 and it's hard to see how Black can make any real progress.] **35...a4 36.Ne7+!** A good recovery White has to go after the b4-pawn. **36...Kh7 37.Nd5 axb3 38.axb3 Bxd5** The only try, but unfortunately for Svidler the rook endgame is a draw. **39.Rxd5 Ra2 40.bxc4 Rxc2+ 41.Kg3 Rxc4 42.Rb5** Against a weaker opponent, Black might have a few practical chances here, but Navara knows exactly what he's doing. **42...Rc3+ 43.Kh4 b3 44.Rb6 g6 45.Rb7+ Kg8 46.g4 Kf8 47.g5!** The easiest way to draw. **47...h5 48.h3 Ke8 49.Rxb3 Rxb3** It's stalemate. **½-½**

[Golubev,Mikhail]

1.Nf3 Nf6 2.c4 c5 3.d4 cxd4 4.Nxd4 Nc6 5.Nc3 e6 6.a3 Bc5

[Black's main choice is between this move and 6...Be7 7.e4 0-0]

7.Nb3! Bb6! This is a modern line.

[In the 'old' days when people prepared without engines' assistance, 7...Be7 had been used invariably here. Then 8.e4! normally leads to the Hedgehog-type positions with some White's pressure.]

8.c5

[Navara as White had also tried 8.e4 , against Eljanov in Biel 2015. (The active bishop on b6 appears to be useful for Black in the further lines, he can even try 8...d5)]

[While 8.Bf4 d5! had been tested in several of Navara's games, with both colours.]

8...Bc7 9.Bg5!?

[Deviating from 9.g3 0-0 10.Bg2 b6 11.0-0 Be5! as, in particular, in Navara-Cheparinov, Tbilisi Wcup 2017 and Matlakov-Svidler, Wijk aan Zee 2018.]

ECC 2015, *14.N5a4!* Δ b4 *)* 14.N5e4! Rb8 15.Nxf6+ gxf6 Laznicka-Sutovsky, EU-ch Jerusalem 2015, is probably slightly better for White.]

10.Bh4 0-0

[The attempts 10...Be5!?]

[and 10...b6 11.e3 Be5!? have been seen in email/internet games.]

11.e3 d5N A practical decision: in a strategically tense, quite complex position Svidler goes for simplifications, hoping that he'll not be significantly worse in the symmetrical structure.

[Black has a number of more ambitious moves to consider: 11...b6 12.Rc1 Rb8!? *(12...Be5?! 13.f4! Bxc3+ 14.Rxc3* Van Egmond-Kristensen, Leiden 2017*; 12...Bb7 13.f4!?)*]

[11...Be5 △12.Rc1 Ne7!]

[or maybe 11...Rb8]

12.cxd6 Qxd6 13.Bxf6!? Qxd1+ 14.Rxd1 gxf6 15.Nb5

[15.Be2 with certain pressure is preferable.]

15...Be5!?

[15...Bb6 was also an option but Black rightly decides that he is ready for forcing matters.]

16.f4!

[After 16.Rd2 a6!? White has nothing better than 17.Nc3 what certainly wasn't his idea *(17.Nd6?! Rd8!)*]

16...Bxb2 17.Rd2 a6□ 18.Nc7 Ra7□ 19.Rxb2 b6! 20.Nb5?!

[White had to play rather 20.Nxe6! and if Bxe6 21.Kf2!? where he's at least no worse.]

20...axb5 21.Bxb5 Ne7! And now it's Black whose chances are slightly better.

22.a4

[An engine's suggestion is 22.Kf2!? Rxa3 23.Rd1 Δ♖d6 where Black can hardly can profit from his extra pawn.]

22...Bd7

[An alternative was 22...Ba6!? where 23.Bxa6? Rxa6 loses a pawn for White.]

23.Bxd7 Rxd7 24.Kf2 Ra8

[Black doesn't have much but he could have tried 24...f5!? (generally preparing ... ♘d5 and ... ♖a8) with the idea of 25.a5?! bxa5 26.Nxa5 Rc8!]

25.Ra1 Rda7 26.Nd2

[Or 26.Nd4 Nd5 27.f5!=]

26...Nd5 27.Nc4! Rxa4

[Or 27...Ra6 28.f5!=]

28.Rxa4 Rxa4 29.Nxb6 Nxb6 30.Rxb6= The rest was a formality.

Olympiad-37 Turin (8) 29.05.2006

[Rogozenco,Dorian]

1.d4 Rogozenco,D Rogozenko **1...d5 2.c4 c6 3.Nc3 Nf6 4.Nf3 dxc4 5.a4 e6** This move started to appear on modern high level practice after Kramnik implemented it in the match versus Leko. Svidler was Kramnik's second and it is not surprising that he included it in his repertoire. However, 5...e6 suits better as a one-time surprise weapon rather than a constant part of one's opening repertoire. **6.e3** The safe continuation, which secures a typical middlegame initiative in a position with an isolated pawn.

[Another test for Black's set-up is the more aggressive 6.e4]

6...c5 In order to complete development Black must go for a QGA type of position. His justification for the two-steps advance of the pawn to c5 is that White's extra-tempo a2-a4 is not very useful. **7.Bxc4 Nc6 8.0-0** We have a well-known variation of the Queen's Gambit Accepted, where Black has the pawn on a6: 1.d4 d5 2.c4 dxc4 3. ♘f3 ♘f6 4.e3 e6 5. ♗xc4 a6 6.a4 c5 7.0-0 ♘c6 8. ♘c3. As we'll see, in opposite to QGA, here Black's pawn on a7 instead of a6 reduces Black's possibilities, which basically means that Black's entire opening concept has obvious drawbacks. **8...cxd4**

[Although less attractive than in QGA, where it represents the most solid continuation, here 8... ♗e7 could be the best option as well: 8...Be7

A) In the variation 9.Qe2 cxd4 10.Rd1 Black must play 0-0 *(Not 10...e5* which equalizes with the pawn on a6, since after *11.exd4 exd4 12.Nxd4 Nxd4* White has a nasty check on b5: *13.Bb5+ Kf8 14.Qe5↑)* 11.exd4 Nb4 White's chances are slightly preferable here, but Black at least avoided opponent's plan from the game (♗g5 and ♖e1).;

B) 9.dxc5!? Qxd1 10.Rxd1 Bxc5 The pawn would certainly be more useful for Black on a6 than on a7. In QGA with the pawn on a6 Black is able to equalize such an endgame. Here having square b5 at his disposal White has more possibilities to fight for advantage.]

12...h6N Before the present game the position was met in practice only twice. Svidler's novelty is designed to either exchange White's bishop (in case of the answer 13. ♗h4), or after 13. ♗f4 to implement the main plan with ... ♘b4 and ...♗c6. Certainly Black would be better off without weakening his kingside pawn chain, but with the bishop on g5 exerting pressure on Black's position, it is more difficult to establish control over square d5 by means of ... ♘b4 and ... ♗c6 (see 12....♘b4).

[With almost finished development and good control over square d5 the second player has little to worry about after the exchange of dark-squared bishops: 13.Bh4 Nh5 14.Bxe7 Nxe7 15.Ne5 Nf6 allows Black to equalize.]

13...Nb4 14.Ne5 Bc6 Black implemented his idea and Svidler must have calculated very precisely the consequences of the sacrifice on f7. However, White simply improves the position and because of the weakened kingside pawn-structure by the pawn on h6, Black still finds himself under pressure. **15.Rad1**

[With the bishop on f4 the knight sacrifice is less clear: 15.Nxf7 Rxf7

17.Rd3! This position is much easier to play with White, who has plenty of attacking ideas. The problem for Black is that he does not have counterplay yet, while his opponent arranged optimally the pieces and can play actively both in the center and on the kingside. **17...Ne7**

[After 17...Rc8 White can start a direct assault: 18.Rg3 Kh8 19.Rh3 *(19.Bxh6? gxh6 20.Qd2 Ng8; 19.Bd2±)* 19...Ne7 *(19...Nb6 20.Bd3 Qxd4 21.Bxh6 gxh6 22.Qd2+-; 19...Kg8 20.Bxh6 gxh6 21.Qd2+-)* 20.Bd3 *(20.Bg5±)* 20...Nf5 *(20...Qxd4? 21.Bxh6 gxh6 22.Qd2 Nf5 23.Rxh6+ Nxh6 24.Qxh6+ Kg8 25.Qg5+ Kh8 26.Qxf6+ Kg8 27.Qg5+ Kh8 28.Qh6+ Kg8 29.Qh7#; 20...Neg8 21.Be3±)* 21.Bxf5 exf5 22.Bxh6 gxh6 23.Qe3 Ng8 24.Rxh6+ Kg7 25.Rh5+-]

Stohl,Igor: 'Hard work in recent years has brought Nepomniachtchi from the "strong and promising GM" status to the top elite of current chess, right in line with his contemporaries (just like MVL, Karjakin and Carlsen, he was born in 1990). His first significant international breakthrough came in 2010, when he won both the European and Russian championships. Our game is from the latter tournament and was important for the final standings - multiple Russian champion Svidler was only 0.5 pts. behind the winners in the final standings. However, Nepo needed much more than that to prevail - only Karjakin's last round loss set the scene for a tiebreak. Sergey dominated the match, but didn't manage to win a single game, including the Armageddon decider... ' **1.e4** Stohl,Igor **1...e5 2.Nf3 Nc6 3.d4** Stohl,Igor: 'Ian also alternates with the Ruy Lopez and Italian, but the Scotch has remained a favourite throughout his career and he uses it more often than other top GMs. Indeed, only last year I wrote an opening article in CBM 200 about a currently fashionable Scotch line, centering around his recent game with Ding Liren (Legends of Chess online rpd 2020).'

[However, in the 2010 European championship he scored heavily with 3.Bb5 Stohl,Igor a6 4.Ba4 Nf6 5.d3 Originally just a sideline, this system has meanwhile become very popular especially due to Carlsen's efforts, also the similarity to the Giuoco Piano and the Anti-Berlin lines with d3 plays a significant role:

[Richard Palliser]

1.e4 c5 2.Nf3 d6 3.Bb5+ Nc6 4.0-0 Bd7 5.Re1 Nf6 6.c3 a6 7.Ba4

A sensible approach, especially if White is happy to obtain a Lopez-like position.

7...b5

[Svidler is happy to fight along Lopez-like lines, but Black has an important alternative in 7...c4 , after which 8.Bc2 *(8.Na3!? b5 9.Bc2 e5 10.b3* is the alternative, but it's far from clear that *Na5 11.d4 cxd3 12.Bxd3* actually promises White any advantage and after *Be7 13.c4 bxc4 14.Nxc4 0-0 15.Ba3* a draw was agreed in Meier-Vachier Lagrave, Liverpool 2008, before Black obtained a comfortable enough set-up with *Nxc4 16.Bxc4 Bc6)* 8...Bg4 *(* subscribers should also note the option of *8...Ng4!?* , as played by Halkias, after which *9.Qe2 Nce5 10.Nxe5 Nxe5 11.f4 Qb6+ 12.Kh1 Ng4 13.h3 h5* looks OK for Black*)* 9.b3 cxb3 10.axb3 e6 11.d4 d5 12.Bg5 Be7 13.Bxf6 Bxf6 14.exd5 Qxd5 15.Be4 Qd6 16.Nbd2 gave White a small pull in Bologan-Wang Hao, Poikovsky 2008.]

8.Bc2 e5

[Tiviakov has long favoured 8...Bg4 at this juncture and recently had to fight against it himself! Tiviakov-Kuzubov, Bornholm 2008, continued 9.a4!? *(*logical if fairly rare *9.d3* has been seen more often of late, after which *e6 10.Nbd2 Be7 11.h3 Bh5 12.Nf1 0-0 13.Ng3 Bg6 14.Nh4 d5* gave Black sufficient counterplay in Dembo-Brkic, Solin 2007*)* 9...Rb8 *(9...b4!? 10.d3 g6* is the alternative*)* 10.axb5 axb5 11.d4 cxd4 12.cxd4 e5 13.d5 Nd4 14.Nbd2 Be7 15.h3 Nxc2 16.Qxc2 Bd7 17.Nb3 sent White's knight towards c6 with a probable edge.]

[Black can also employ a semi-waiting move in 8...Rc8 , but after 9.a4! White should be able to obtain an edge, as indeed he did in Adams-Kasimdzhanov, Tripoli 2004 - see the Archive.]

9.h3

[This prophylactic move looks like White's best try. Svidler himself had earlier tried 9.a4 , but after Be7 10.h3 0-0 11.d4 cxd4 12.cxd4 Rc8 Black had just about enough counterplay in Svidler-Timofeev, Moscow 2007.]

9...g6!?

[This asks quite a lot of Black's position. If he doesn't want to sacrifice a pawn, he should prefer the safer and more common 9...Be7 , after which 10.d4 Qc7 *(10...0-0 11.d5 Na5* is also possible for those with some experience of the Chigorin Variation *)* 11.d5 Na5 12.b3 0-0 13.Nbd2 Nb7 14.c4 g6 15.Nh2 Nh5 was about equal in Ni Hua-Wang Hao, Russian Team Championship 2008.]

10.d4 Bg7 11.dxc5! White might be behind in development, but Black has made a number of ambitious pawn advances and now is the time to target those potential weaknesses. **11...dxc5 12.a4 0-0 13.axb5 axb5 14.Rxa8 Qxa8 15.Qd6! c4!?**

[A novelty, although it's not yet clear what Black's best is here. Previously 15...Rc8 had been seen and after 16.Nxe5 Nxe5 17.Qxe5 Bc6 18.Qf4 Re8 19.Nd2 c4 Black had some pressure for his pawn in Chebotarev-Najer, Tomsk 2006. Indeed, I wonder whether this isn't a better handling of the position than Svidler's.]

16.Bg5!

[The most precise. Instead 16.Nxe5 Nxe5 17.Qxe5 Bc6 18.Qf4 Re8

would have made it hard for White to develop his queenside and given Black reasonable pressure along the lines of Chebotarev-Najer.]

16...Be6 Forced if Black wanted to avoid losing a piece, but now his bishop won't be able to come to the h1-a8 diagonal. **17.Nxe5 Nxe5 18.Qxe5 Nd7 19.Qg3 b4!?**

[Forcing the pace, although it was also possible to wait with 19...Re8 . White would probably then improve his rook and queen, since the knight can't yet move as 20.Nd2? Qa2 21.Rb1 b4 gives Black very strong queenside pressure.]

20.cxb4 Bxb2 21.Bd2! Not only keeping control of the c3-square, but retreating the bishop in preparation for an advance of the f-pawn. **21...Rb8?**

[Slow and now Black is definitely worse. I'm not convinced that he definitely had enough compensation in any case, but 21...Be5! should have been preferred. The idea is to invade with the queen on a2 and certainly 22.f4?! *(22.Qe3!? Qa2 23.Rc1* should probably be preferred*)* 22...Qa2 23.fxe5 Qxc2 24.Qc3 Qa2 should be OK for Black in view of his blockade.]

22.f4 f6 23.Kh1 Suddenly White has the initiative as well as an extra pawn. Ni Hua now prosecutes his advantage remorselessly. **23...Bd4 24.Bc3 Bxc3 25.Qxc3 Rb7 26.Qd2!** Coordination first before looking for a good way to press ahead. **26...Qf8 27.Nc3 Nb6 28.Qd4 Nd7 29.Rb1 g5?** An understandable bid to randomise in a rather grim position, but all this does is to accelerate the end. **30.e5! Rxb4?! 31.Rxb4 Qxb4 32.f5 fxe5 33.Qd2** Nice play from Ni Hua. White might have sacrificed two pawns, but he has realised that he will win a piece. **33...Bf7 34.Qxd7 Qxc3** This way Black doesn't lose a piece, but his horrendously-exposed king won't last long. Indeed, Rybka already proclaims a forced mate here! **35.Qd8+ Kg7 36.f6+ Kh6 37.Qf8+ Kh5 38.Qxf7+ Kh4 39.Qxh7+ Kg3 40.Qe4**

1.d4 Nf6 2.c4 g6 3.Nc3 d5 4.Nf3 Bg7 5.Qb3 dxc4 6.Qxc4 0-0 7.e4 a6 8.Be2 b5 9.Qb3 Nc6!? It looks odd to obstruct the c pawn rather than aim for the freeing c7-c5 move, but Black gets plenty of lively piece play in return for his disjointed pawn structure. Therefore I think from a practical view point Black should prefer to play like this rather than enter the rather dry and very slightly inferior positions that arise after say
[9...c5 10.dxc5 Bb7 11.0-0 Nxe4 12.Nxe4 Bxe4 13.Bg5 Nc6 14.Qe3 etc.]

10.e5
[If 10.d5 Na5 11.Qb4 c6! liquidates White's important d pawn. Black has good chances, for example.
A) Or 12.0-0 Bb7 13.Bg5 *(13.Rd1 Rc8! 14.dxc6 Nxc6* is nothing for White.*)* 13...Rc8 14.dxc6 Nxc6 15.Qb3 Na5 16.Qa3 Nc4 17.Bxc4 Rxc4 18.Rad1 Qb8 when the weakness

on e4 meant White was in trouble in Winants,L-De Boer,G/Amsterdam 1987.;

B) 12.Be3 cxd5 13.exd5 Bb7 14.Rd1 Rc8 15.0-0 Nc4 with a good position for Black. White immediately fell for a trap: 16.Bc5? Nxb2! 17.Bxe7 Nxd1 18.Bxd8 Nxc3 19.Bxf6 Nxe2+ 20.Kh1 Bxf6 and Black had a winning material advantage in Scheeren,P-De Savornin Lohman,A/Amsterdam 1980.]

10...Be6 The only move. **11.exf6!?** White accepts the challenge- it all depends on how the resulting material balanced is assessed.

[After 11.Qd1 Nd5 12.0-0 f6! 13.exf6 exf6 14.Ne4 Kh8 15.Nc5 Bc8 Black has temporarily been driven backwards but the invincible d5 outpost and the weakness on d4 gives him compensation for the hole on c5. Black was very active after 16.a4 b4 17.a5 f5 18.Re1 Qd6 19.Nb3 f4 20.Bd2 Bg4 21.Rc1 Rad8 in Pal,P-Manik,M/SVK 1997.]

11...Bxb3 12.fxg7 Kxg7 13.axb3 Nxd4 14.Nxd4 Qxd4 15.0-0 White now has three pieces for a queen and two pawns. In the middlegame, where he can attack the black king, this seems good for him. However, his queenside pawns are fragile and Black can break the strength of any potential assault on his king by giving up the exchange for one of the bishops. **15...Qb4 16.Bf3 Qxb3!** Black gives up the exchange to be rid of White's strong light squared bishop. **17.Nd5?!**

[The critical test of the opening line must be the acceptance of the offer, though in the one example available White was overwhelmed by the queenside pawns after 17.Bxa8 Rxa8 18.Be3 a5 19.Rfd1 a4 20.h3 e5 21.Ne4 Qxb2 22.Bg5 Ra6 23.Nc5 Rd6 24.Ne4 Rc6 25.Rac1 Rxc1 26.Rxc1 h6 27.Bf6+ Kh7 28.Rd1 g5 29.f3 a3 and White resigned in Van der Sterren,P-Timman,J/Wijk aan Zee 1998.]

17...e6 18.Nxc7 Rac8 19.Nxa6 Rfd8 The white knight is badly placed on a6 and the bishop on c1 is tied down to the defence of b2. Obviously Black's opening has been a success. **20.h3 Rd3 21.Be2 Rd4 22.Be3 Re4 23.Bf3 Rxe3!** Again the key stratagem for Black is to give up the exchange to eliminate one of White's bishops. The remaining White pieces won't be able to launch a coordinated attack on Black's king. **24.fxe3 Qxe3+ 25.Kh1 Qb3** Returning to the queenside to create a passed pawn. **26.Rad1?**

[He had to defend b2 with 26.Rf2 even though it is uncomfortable for him.]

FIDE-Wch San Luis (13) 13.10.2005
[Mikhalevski,Victor]

The game was played in the penultimate round. While Svidler had to win to retain some theoretical chances for the title, Polgar had a bad tournament and brought up the rear. **1.e4** Mikhalevski,V **1...e5 2.Nf3 Nc6 3.Bb5 a6 4.Ba4 Nf6 5.0-0 Be7 6.Re1 b5 7.Bb3 0-0** Let's make the first stop for some statistics. This position was rather popular in San Luis with not less than nine games played. All the players excluding Morozevich had it on the board while Svidler played it not less than 5(!) times, 4 of them with the black pieces. **8.c3** The brave lady accepts the challenge. Nowadays most of the players are trying to avoid the sharp and well-explored variation of Marshall. This tournament hasn't become an exception and only two more games featured the Marshall.

All these games show that a pair of bishops is usually a sufficient compensation for a pawn.]

16...Rae8 17.Ne4 Bg4 18.Qg2 Qxg2+! A precise move demonstrated earlier this year by Levon Aronian. Black needs the white king on g2 in order to have a check on f3 after the exchange on e4.

[In case of 18...f5 Black experiences problems. 19.Qxh3 Bxh3 20.Bd2 After the exchange on g2 neither this

move nor *(20.c4!? is possible.)* 20...fxe4 21.dxe4 Bc5 *(21...Be6 22.exd5 Bxd5 23.Rxe8 Rxe8 24.Be3±* 1-0 Pariente Lopez,F-Rubio Doblas,R/Malaga 1995.*)* 22.Be3 Rxe4 23.Bxc5 Rfe8 24.Rxe4 Rxe4 25.Be3! Kf8 26.Re1 and White ends up a pawn for nothing in both cases. 1-0 Kotronias,V-Nakamura,H/Port Erin IOM 2004.]

19.Kxg2 f5 20.Bf4 Formally this is a novelty, but in fact the difference with Aronian's game is only in the position of the h-pawn which doesn't seem to matter.

[20.h3 Bh5 *(20...fxe4?* is bad in view of *21.hxg4 exd3 22.Rxe8 Rxe8 23.Be3!* Preparing Rd1. *Re5 24.Bf4! Re6 25.Bxd5 cxd5 26.Bxd6 Rxd6 27.Rd1±)* 21.Bf4! Bxf4 22.gxf4 fxe4 23.dxe4 Bf3+! A nice tactical trick, which allows Black to restore material equality. 24.Kxf3 Rxf4+ 25.Kg3 Rfxe4 26.Rxe4 Rxe4 27.f3 Re2 28.c4 bxc4 29.Bxc4 Rxb2 30.Bxa6 g5 ½-½ Nakamura,H-Aronian,L/Caleta ENG 2005. and Black successfully compensated White's passed a-pawn by counterplay on the kingside.]

[Now 20.Bd2? would be a blunder in view of fxe4 21.dxe4 Bf3+! That's why 18...Qxg2 was played!]

20...Bxf4 21.gxf4 fxe4 22.dxe4 Bf3+! Coping Aronian's play in the above-mentioned game. **23.Kxf3 Rxf4+ 24.Kg3 Rfxe4 25.Rxe4 Rxe4 26.f3 Re5** Only now Svidler deviates from Aronian's Re2. Probably he considered the position which arose in Nakamura-Aronian as dangerous for Black. **27.c4!** The only try to play for a win. This way White succeeds to destroy Black's pawn structure on the queenside.

[27.a4 Kf8 28.axb5 axb5 29.Ra6 *(*or *29.h4 Ke7)* 29...c5 with equality in both cases.]

27...bxc4 The knight can't move in view of a discovered check. **28.Bxc4 a5 29.Rc1!** I believe Judit is still in her home preparation. White wants to exploit weakness of the c6-pawn by means of Bb3. **29...Kf8!** 'N!?' Unpinning the knight.

[29...Rg5+ Ü 93/285]

30.Bxd5 Probably too tired of the tournament Judit forces a draw.

[30.Bb3 Ne7]

[If White wanted to set some problems she had to try to cover the g5-square and take her h-pawn away from the second rank with 30.h4! though even in this case White chances for a win are not big.]

30...Rg5+!? An interesting intermediate move, which forces White to leave the h-pawn unprotected.

[I believe there was also nothing wrong with 30...cxd5 31.Rc5 a4 32.Kf2 Rh5 33.Kg3 Re5= with an obvious draw.]

31.Kf4

[Certainly the passive 31.Kf2 Rxd5 32.Ke1 Rh5 is fine for Black.]

31...Rxd5 32.Rxc6 Rd2 33.Ra6 Rxh2 The point of the intermedite check on the 30th move. **34.Rxa5 Rxb2=** Now it's a dead draw. **35.a4 Kf7 36.Kf5 g6+ 37.Ke5** With the positional threat of Ra7+. So **37...Re2+ 38.Kf4 h5 39.Ra7+** The game leaves the question where to look for an advantage in the 12. d3-line open.

Therefore, White concentrates his efforts against the d6-pawn, which has been slightly weakened after ... ♗g7. **10...0-0 11.Bf4 Nc6 12.Rac1 Nd7 13.Qe3** RR: 'N!'

13...Nce5 14.Nxe5 Nxe5 15.Be2 b6 16.Rfd1 Re8 17.Qd2 Nxc4 18.Bxc4 Qxc4 19.Qxd6 From structural point of view, the exchange of these pawns is supposed to favour Black. However, Black's dark squares have been weakened even more now, especially after the dissapearance of the black knight. Besides, the light-squared bishop will be severly restricted by the white central chain of pawns. These latter aspects allow White count on a minimal, but stable advantage. **19...Bb7 20.Be5!** Exchanging the last remaining defender of the dark squares.

[20.Qxb6 Bxe4]

20...Bxe5 21.Qxe5 Rad8 22.f3 RR: '±' **22...b5 23.Kf2!!** The initiation of a very original plan. The transfer of the king to e3 is motivated by two aspects. Firts of all, in case of an attacking action of the other pieces, His Majesty could easily remain exposed on the back rank, as a consequence of the relative weakness of the g1-a7 diagonal. Secondly, the presence of this "extra-piece" in the centre will allow White consolidate his domination. Such a plan is possible only because Black's bishop is so desperately passive. Although all this looks quite logical, the artistic impression (or, if you wish, extravagancy) is similar to that caused by a football goal-keeper advancing to attacking positions. **23...Qc6 24.Ne2 Qb6+ 25.Rd4 Rd7 26.b4** Taking just another dark square under control. **26...Red8 27.Ke3!** White maintains the tension in the centre without the necessity of abandoning the control of the c-file. **27...Rxd4 28.Nxd4 Rd6 29.Qf6 Rd7 30.Rc5 Qd6 31.g3 a5 32.a3 axb4 33.axb4 Qa6 34.Ne2 Qd6 35.Qc3 h5 36.Qd4 Qe7** Of course, with such a centralized white king, Black would have no interest in entering into the endgame. **37.Qe5 f6 38.Qb8+ Kg7 39.Nc3**

[Possibly not best. 39.e5 would have allowed White make further progress with his strategy on dark squares.]

39...e5 Black has managed to cover the king side dark squares in acceptable way. However, the d5-square has been weakened now, which determines White switch to another plan. **40.Nd5 Bxd5 41.exd5** Like recommended by Nimzowitsch, the strong outpost has been converted into a strong passed pawn. However, the king starts feeling a bit insecure now. **41...f5**

[This activity in the centre will only result into material losses. 41...Ra7

might have offered better chances for counterplay.]

42.Qxb5 f4+ 43.Kf2 e4 44.fxe4 fxg3+ 45.hxg3 Qf6+ 46.Kg2 Qb2+ 47.Kh3 Rf7 48.Qd3 Black's attack has failed completely. He now has to allow the exchange of queens, thus reaching a hopeless rook ending. Otherwise the white queen would occupy the a1-h8 diagonal, when, all of a sudden, the black king would find himself under strong attack. **48...Qxb4 49.Qc3+ Qxc3 50.Rxc3 Re7 51.Rc4 Kf6 52.Kh4 Ke5 53.Rc6** En elegant way to finish the game. The e4-pawn is taboo in view of the check on e6. Otherwise, White plans to play ♔g5 and give the check on e6 anyway.

Even short game between great players could be imporant for the opening theory. **1.e4** Ponomariov,Ruslan; Komarov,D **1...c5 2.Nf3 e6 3.c3** In my country this line is called 'Bulgarian variation'. Devoted to the topic, about 25 years ago Jivko Kajkamdjozov wrote small nice opening book with this title. Looking back in the time we can see that yet in 1864 Popert use the move 3.c3 against Staunton. Alekhine said that the move is not worse than 3. d4. Today gm. Sveshnikov is among the big partisans of this line. **3...Nf6**

[Svidler,Peter]

1.c4 A bit of a surprise, but it probably shouldn't have been - young players tend to be capable of making most of the legal 1st moves, seemingly at random. It did give me some pause, though - I've been dabbling in the English quite a bit since giving up on any attempt to refute the Berlin, and thus had a wider than usual list of options to choose from. Das war eine kleine Überraschung, aber das hätte wahrscheinlich nicht sein sollen - junge Spieler sind tendenziell in der Lage, die meisten legalen 1.-Züge zu machen Es hat mich allerdings etwas verunsichert - ich habe mich ein wenig mit Englisch beschäftigt, seit ich jeden Versuch, Berlin zu widerlegen, aufgegeben habe, und hatte daher eine größere Liste von Optionen zur Auswahl als sonst. **1...e5** You could argue that starting with 1... Nf6 is cleaner if you want to play the lines I aimed for, to avoid 1...e5 2.g3 - but I didn't want to give my opponent a chance to recover from his inaccuracy on move 1 with 2.d4. Man könnte argumentieren, dass es sauberer ist, mit 1...Sf6 zu beginnen, wenn man die von mir angestrebten Varianten spielen will, um 1...e5 2.g3 zu vermeiden - aber ich wollte meinem Gegner keine Chance geben, sich von seiner Ungenauigkeit im ersten Zug mit 2.d4 zu erholen. **2.Nc3 Nf6 3.Nf3 Nc6 4.g3** Not the most fashionable (that honour probably belongs to 4.e4 these days) but still comfortably the most popular choice.

Nicht das Aktuellste (diese Ehre gebührt heutzutage wahrscheinlich 4.e4), aber immer noch die beliebteste Wahl. **4...d5 5.cxd5 Nxd5 6.Bg2 Nf6!?** A very modern way of playing this position, which has a massive advantage of having very little theory associated with it compared to 6...Nb6. The level of its current popularity is well-illustrated by the fact it was played by Magnus in his final vs Pragg. Eine sehr moderne Art, diese Stellung zu spielen, die den großen Vorteil hat, dass sie im Vergleich zu 6...Sb6 sehr wenig Theorie erfordert. Die Tatsache, dass sie von Magnus in seinem Finale gegen Pragg gespielt wurde, zeigt, wie beliebt sie derzeit ist. **7.0-0**

8.Qc2N My opponent was quite unhappy with this decision after the game, and I tend to agree with him here. This doesn't actually prevent me from developing the Bishop to c5, and making all of my Nd4 ideas gain a tempo later in the game is actively counterproductive. Both 8.d3 and 8.b3 look more logical. Mein Gegner war nach der Partie ziemlich unglücklich mit dieser Entscheidung, und ich neige dazu, ihm hier zuzustimmen. Das hindert mich nicht wirklich daran, den Läufer nach c5 zu entwickeln, und alle meine Sd4-Ideen später in der Partie ein Tempo gewinnen zu lassen, ist aktiv kontraproduktiv. Sowohl 8.d3 als auch 8.b3 sehen logischer aus.

11...Bb6 **12.Nd2** This seems logical - the Bb6 is about to be corralled - but that's only until you realize that the 'threat' of Nxb6 cxb6 is no threat at all, in most cases Black will be quite happy to allow it since it gives us an additional open c file, while the pawn structure is not seriously compromised by that trade. Das scheint logisch zu sein - der Lb6 ist kurz davor, eingekesselt zu werden - aber nur solange, bis man erkennt, dass die 'Drohung' Sxb6 cxb6 überhaupt keine Drohung ist. 1.Nf3 Marin,M **1...Nf6 2.c4 c5 3.d4 cxd4 4.Nxd4 e6 5.Nc3 a6** This used to be a main branch of my repertoire. I mainly aimed to get a hedgehog type of position, but as we will see Black can think differently. **6.a3** Hoping to reach a Paulsen Hedgehog with e2-e4.

[6.e4 would transpose to the Paulsen immediately, but White needs to be prepared against Bb4 1-0 Hansen,E (2593)-Smirin,I (2656) Tromso ol (Men) 41st 2014 (6.2) See for instance the extensive notes to the recent]

[6.g3 is an important alternative, but it seems to offer White very little after Qc7 7.Bg2 *(There are no recent examples with 7.Qd3 Nc6 8.Nxc6 Qxc6 9.e4 b6 10.Bg2 Bb7* meaning that the old assessment of the position as comfortable for Black has not been shaken - yet.*)* 7...Qxc4 Black can bravely take the pawn. The most notable example is that of a former World Champion: 8.Be3 Qc7 9.Rc1 Nc6 10.0-0 Be7 11.Na4 0-0 12.Nb6 Rb8 13.Qa4 Re8 14.Rc3 Bf8 15.Rd1 h6 16.a3 Qxb6 17.Nxc6 Qxb2 18.Rc2 bxc6 19.Rxb2 Rxb2 Papaioannou,I (2606)-Kramnik,V (2797) Istanbul 2012 (½-½, 30)]

6...d5!? A relatively rare move.

[Most games transpose to a Paulsen without ... ♗b4 after 6...Qc7 7.e4 The modest move a2-a3 will prove useful later when White will play b2-b4, without fearing that ...d6-d5 would leave the b4-pawn hanging. The move played in the game is similar to the by far more popular 5...d5 (one move earlier). As we will see, the insertion of the moves ...a7-a6 and a2-a3 allows Black to become ambitious in the centre.]

7.cxd5 This is the standard reaction.

7...Nxd5 8.Bd2 This is an approved move in the 5...d5 line. White hopes for an exchange on c3, activating his bishop. **8...e5!?N** It is here that we can notice the differences induced by the moves ...a7-a6 and a2-a3. In the 5...d5 line, 7...e5 would allow 8. ♘db5 with pressure on the weakened d5-square.

[8...Be7 looks a bit passsive, but should be playable. 9.e3 e5?! 9.Nf3

[With the black bishop on f8, 9.Nxd5 Qxd5 10.Qc2 Nd7 is fine for Black, for if 11.Nf5 Nf6]

9...Nxc3 This will prove enough for equalising even though it may seem to be a slight concession.

[Maintaining the tension with 9...Nc6 was entirely possible, too: 10.e4 Nf6 11.Bc4 Bc5 White has an extra tempo (♗c1-d2) and the right to move in a symmetrical position. But the bishop is not too effective on d2, so the position is close to complete equality.]

10.Bxc3 Qxd1+ 11.Rxd1 f6! The key to the exchange on c3. The black central pawn chain restricts the enemy bishop and knight, neutralising White's initiative. The only thing left for White is playing for the light squares.

[11...e4? 12.Nd2 offers White too much play. f5 *(12...e3 13.fxe3 b5 14.g3 Bb7 15.Rg1 Nd7 16.Bh3)* 13.g4 e3 14.fxe3 fxg4 15.Nc4 Nc6 16.Nb6 Rb8 17.Nxc8 Rxc8 18.h3 gxh3 19.Bxh3 Rd8 20.Bf5 Rxd1+ 21.Kxd1 h6 22.Kc2±]

12.e3 Be6 13.Nd2 Nc6 14.Bc4 Kf7! In this case it surely is better to keep the tension.

[If 14...Bxc4 15.Nxc4 Rd8 16.Ke2 Be7 17.g4 White has some chances for a more pleasant ending, since h5 can be met with 18.g5 due to the hanging e5-pawn. In the game, the king will reach e6 soon, avoiding this possibility.]

Geneva FIDE GP (7) 13.07.2017
[Lenderman,Aleksandr]

Today the choice was clear to me, since we had a decisive game on one of the top boards, and also it was a nice, clean game by Radjabov, who is in excellent form in this tournament. **1.Nf3 Nf6 2.c4 c5**

[2...g6 3.Nc3 d5 4.cxd5 Nxd5 is another common line for Grünfeld players, but these days many players don't want to venture here, since White has a lot of additional dangerous options here.]

3.Nc3 d5 As far as I know, the most common way for Grünfeld players to play against this White's move order.

[3...g6 4.d4 cxd4 5.Nxd4 d5 is also a common way for Grünfeld players to play, but still, I think White has some pressure here if he knows the line well. *(5...Bg7 6.e4* leads to a Maroczy Bind Structure, which most Grünfeld players wouldn't want to play, since this is basically suffering for most of the game, and there aren't as many dynamic options for Black here. *)*]

4.cxd5 Nxd5 5.e3

[5.e4 is also a very common move here, after which Black usually plays ... ♘b4 and leads to very sharp positions. Nb4]

5...Nxc3 Definitely not the only move here.

[5...e6 As far as I know this is the most common alternative, which will most likely lead to an IQP (isolated pawn position), where White has the isolated d4-pawn but will have attacking chances. 6.d4]

[5...Nc6 isn't played as often because of the unpleasant... 6.Bb5 After which Black will probably still have to eventually play ...e6, but now he has allowed a slightly annoying pin, and therefore some concessions.]

[5...g6 is also not as accurate, right away, since here after a strong queen move, disturbing Black's harmony, he has to make some annoying concessions, for example... 6.Qa4+! This is already unpleasant for Black. Bd7 *(6...Nc6 7.Bb5±)* 7.Qb3±]

6.dxc3 And this is the first somewhat surprising move. Almost exclusively White plays bxc3. However, Radjabov, one of the leaders at +2, playing Svidler, who has 3.5/6, half a point behind, decided to put the ball in Black's court to try to create some kind of a battle in a dry position. That,along with the fact that as far as I can tell, Svidler doesn't like positions that are too dry. One game that comes to mind is Karjakin-Svidler from the 2015 World Cup Finals, where Svidler just needed a draw to win the finals, as he had been leading 2-1, but wasn't able to defend a slightly unpleasant but tenable position. This no

doubt had an impact on Radjabov's decision to play this kind of a position this round. Needless to say, it paid off big time for him in this game. **6...Qxd1+**

[6...Qc7 Perhaps this deserves attention. This is already a rare position though.]

7.Kxd1 Bf5 This move is designed against a quick e4. It's an interesting option but definitely not the only option.

[7...Nc6 is an alternative which Nepo tried against Vidit in the last Olympiad. He'd also tried ...b6 the game before against Wang Yue. 8.e4 b6 9.Kc2 Bb7 10.Bf4 f6 11.Rd1 e5 12.Bc1 *(12.Bg3!?* Maybe this move here or somewhere earlier was a possible improvement for Radjabov.*)* 12...Na5 13.Bb5+ Kf7 14.Rhe1 a6 15.Bc4+ Nxc4 16.Rd7+ Be7 17.Rxb7 Rhb8 18.Rxb8 Rxb8 19.b3 Nd6 20.Nd2 b5= 1/2 (37) Vidit,S (2669)-Nepomniachtchi,I (2740) Baku AZE 2016. [7...b6 8.e4 Bb7 9.Bb5+ Bc6 10.a4 a6 11.Bxc6+ Nxc6 12.Kc2 e6 13.Rd1 Be7 14.Bf4 Ra7 15.Nd2± 1/2 (47) Wang Yue (2728)-Nepomniachtchi, I (2719) Moscow RUS 2016. Here White has some pull, in a game which ended up being a draw in 47 moves.]

8.Nd2 Nc6

[8...Nd7 - 92/(24)]

9.e4 Mamedyarov,Shakhriyar: '*' So, White got in e4 anyway, but Black's idea was to force White's knight to d2 first, so that White has a harder time developing his bishop on c1. **9...Be6** Mamedyarov, Shakhriyar: 'N' This is according to my database a novelty, and possibly not the best one.

[9...Bd7 was played by the late Walter Browne all the way back in 1979. 10.Kc2 0-0-0 11.Nb3 e6 12.Be3 b6 13.Ba6+ Kc7 14.a4 Ne5 15.f3 Bd6 16.Be2 Bc6 17.Nd2 f5 1/2 (42) Andersson,U (2560) -Browne,W (2540) Banja Luka 1979; with a complex game, which ended up in a draw in the end. But certainly both sides could probably make subtle improvements before.]

10.Kc2 g6

[10...0-0-0 This move deserves attention as well, since it stops ♗c4 because of ... ♖xd2!. However, White has annoying options here as well. 11.Nb3 *(11.Bc4?? Rxd2+-+; 11.Nf3!?* is also interesting, trying to induce the move f6 at some point. *f6 12.Be3 b6 13.Ba6+ Kb8 14.Bf4+ Ka8)* 11...b6 12.Ba6+ Kb8 13.Bf4+ Ka8 14.Rhd1 Rxd1 15.Rxd1 g6 16.Nd2 Bg7 17.Bc4 Bxc4 18.Nxc4 Rd8 19.Rd5± White has a slight pull here, but it certainly looks like Black should be able to hold.]

11.Bc4 Bd7 Now it's starting to look like Black's strategy didn't work. He's losing too many tempi and White is putting his pieces on decent squares.

[11...Bxc4 12.Nxc4± is also slightly unpleasant though. White has a plan with ♗e3 and a4 after ...b6. Black's bishop is a slight problem, in where it's very useful.]

12.Nb3 b6 13.a4 An important move, not only thinking about playing a5, but also preparing to play ♗b5 after ... ♘e5.

13...Ne5 14.Bb5 a6?! But this move already seems like a real inaccuracy. I don't think it was necessary to create additional weaknesses.

[14...Bg7 15.Bf4 0-0-0 still seems tenable for Black.]

15.Bxd7+ Nxd7 16.Be3 e6 17.Rhd1 0-0-0 18.Nd2± Now White already has a serious advantage. White's knight is getting back to c4, its dream square, while Black is tied down to the weakness on b6. In general, the main reason White wanted to swap off the light-squared bishops was because he wanted to have his knight unopposed on c4, where it can't be bothered by Black's bishop, and also sometimes the white knight and bishop are redundant on the light squares. **18...Be7 19.Nc4** Mamedyarov,Shakhriyar: ' ±!' **19...Kb7 20.a5! Rhf8** The problem for Black is that...

[20...b5? only makes things worse because of... 21.Nd6+ Bxd6 22.Rxd6+- and Black is just collapsing here with his weaknesses.]

21.axb6 Nxb6 22.Na5+ Kc7 23.Bf4+ Bd6 24.Bh6! A very important decision here. White didn't want to trade off the dark squared bishops since then he would not have enough fire power to really apply maximum pressure on Black's weaknesses.

[24.Rxd6 Rxd6 25.Nb3 *(25.Rd1 Nc8 26.Nc4 Rfd8 27.b3 f6 28.Nxd6 Nxd6* and since the pawn endgame is going to be drawn, Black will be able to untangle himself eventually with ... ♔c6, and even though he's worse, he can still fight here.*)* 25...c4 26.Nc5 Ra8 27.Nxa6+ Kc6 28.Bxd6 Kxd6 29.Rd1+ Kc6 30.Nb4+ Kc5 would have won a pawn for White, but Radjabov correctly assessed that in this position Black would have better chances o holding than in the game, since he was able to get his pieces very active and trade off or eliminate his weaknesses just at the cost of a pawn. This is still promising for White but it shows incredible patience not to go for this line, which I'm sure Radjabov saw.]

24...Rfe8 25.Nb3 Black still won't be able to avoid material loss in the long run, but here he also keeps his active bishop, while Black's bishop on d6 is quite restricted and can't do much. **25...Ra8 26.Be3 Nd7 27.Ra5 Kc6 28.Rda1 Kb6 29.R5a4 Rec8 30.Na5 Be7?!** Loses in one move, but the position was already probably lost.

[30...Kc7 31.Nc4 Be7 would have prolonged the game, but White should still be winning. 32.Rxa6 *(32.Bf4+* Though the computer even doesn't want to take the pawn. *Kb7 33.Na5+ Kb6 34.Rd1 Ra7 35.Nc4+ Kc6 36.Ra3* and due to the deadly threat of ♘a5+ with a mating attack, Black is already forced to play the pathetic... *e5 37.Bxe5 Nxe5 38.Nxe5+ Kc7 39.Rd7+ Kb8 40.Rb3+ Ka8 41.Rd1* But this is equivilant to resignation.*)* 32...Rxa6 33.Rxa6 should be enough for a winning advantage.]

R.Scherbakov: 'A transposition from the Slav to the QGA with an extra tempo for White is not such a rare guest in tournament practice these days. Black gets a solid position and White should play very precisely to achieve anything substantial. In this game Svidler almost equalised but then missed a tactical

shot and found himself in a difficult rook ending.' 6...c5 R.Scherbakov: 'Black goes for the QGA with White's extra move a2-a4.' In fact, the position transposes to the Queen's Gambit Accepted where Black has lost a tempo by playing c7-c6 and then c6-c5. White's extra tempo is the move a2-a4. On the one hand it helps White to seize space on the queenside. On the other hand, it weakens the b4 square and this is what Black is counting on. In future, this square might be used for a knight transfer ♘b8-c6-b4 to a key blockading d5 square. Andrew Martin: 'Basically, when Black plays the Baltic he is counting on a lack of specific knowledge from his opponent. Most players know what to do in the main lines but do they know the tricky sidelines? White must steel himself and, even if he knows nothing, can note the following: 1) If the Baltic is so great, why isn't everyone playing it? 2) Taking on d5 seems to be good. 3) The b7-pawn seems to be a target for attack. [Dave Smerdon]

1.e4 c5 2.Nf3 e6 3.c3 d5 4.e5 d4 We've looked at this line a couple of times recently. It could have been anticipated in this game, as the French Defence hardly suits Peter's style. **5.Na3 Ne7 6.Bd3 Bd7** Svidler adopts the choice of Vitiugov, which was played against Pete's good friend Grischuck.
7.0-0 Bc6 8.Re1 Ng6 9.Be4 Bxe4N
[I gave 9...d3 an '!' in the notes to Grischuck-Vitiugov, and it definitely seems like the critical response. On the other hand, I can certainly understand Black being hesitant to thrust the pawn into dangerous waters.]
[Svidler had previously tried a different approach at the end of last year, but went down against Morozevich: 9...Be7 10.d3 dxc3 11.bxc3 0-0 12.g3 f5!? 13.exf6 Bxf6 14.Bb2 Bd5 15.Nc4 Nc6 16.a4 Qd7 17.Qe2 Rad8 18.Red1 b6 19.h4!?∞ 1-0 (28) Morozevich, A (2724)-Svidler,

P (2743) Sochi 2014]

10.Rxe4 Nc6 11.d3 I find these positions quite appealing - for both colours! While blocked French positions can be quite static and dare I say it boring, the strange central configuration here, and especially the access to e4 (for White) and d5 (for Black), usually leads to some fast action. **11...dxc3 12.bxc3 Be7 13.Rb1**

[It was actually possible to play 13.h4 immediately, as snatching the pawn is a little risky: Bxh4 14.Rb1 and b7 can hardly be defended, because b6?? 15.Qa4!+- is a long-range fork.]

13...Qd7 14.h4 h5 15.Nc4

It is a relief to see one of the world elite players trying out an 'interesting' 3rd move in this position - there are many which have appealed to me and other theory-lite players in the past, including ♗g5, c3, b4...

[It would be remiss of me not to mention the 'Old Speckled Egg' setup, pioneered by my fellow English GM,

Keith Arkell. The idea is similar to those of the text. 3.b4 Bg7 4.Bb2 0-0 5.Nbd2 d6! Against ...d5 setups, White obtains an easier position! 6.e3 c5= Fernandez,D-Ghasi,A chess. com INT 2017, Black had equalised and ultimately won.]

3...d5 3:51 **4.e3** 1:01

[4.b4!? is interesting if we bear the above note in mind. For instance, now Bg7 5.Bb2 0-0 6.e3 Bf5 7.c4 a5 8.b5 leaves Black a bit short of plans, so Black might have to play more directly, for instance with 4...a5.]

4...Nc6 15:09 Among other things, this move prevents b4, but it is hard to find plans for Black in what follows. **5.b3** 11:01 **Bg7** 1:58 **6.Bb2** 49 **0-0** 1:28 **7.Be2** 2:45 **a5** 7:40 **8.a3** 4:31

[8.c4 attempts to call Black's bluff: a4 is not that threatening since after 9.bxa4 the pawn will prove rather hard to regain.]

8...b6 5:39

[8...Ne4 9.c4 Nxd2 10.Qxd2±]

9.0-0 58 **e6** 1:27 **10.c4** 2:43 **Ne7** 4:24 **11.cxd5** 8:38 Allowing Black's light-squared bishop to develop on its preferred diagonal.

[We have nevertheless reached a vaguely Catalan-esque position, in which White tends to keep the central pawn tension until an advantageous moment, so 11.Qc2!? deserved consideration. There could follow: c6 12.Rac1 Ba6 13.Rfd1 Rc8 14.Qb1± and White has a good version of the Catalan, because ...c5 is almost impossible to arrange.]

11...exd5 1:05 **12.b4** 3:02 **c6** 8:55 **13.Rc1** 3:21 A slightly strange move, conceding the a-file and hence equality.

[13.b5 was the most principled. Doubtless, Black has in mind the equally principled cxb5 14.Bxb5 Bd7 but here White can pretend to have an edge, e.g. 15.Bxd7 Qxd7 16.a4↻ when if nothing else, the queenside pawn structure bodes well for an endgame.]

13...axb4 4:21 **14.axb4** 5 **b5** 7 Black keeps it solid, since ... ♘e8-d6-c4 is not too hard to arrange for him. **15.Nb3** 5:01

[15.Ne5 Qd6 16.Qc2!? was an interesting and quite maximalist pawn sacrifice.]

15...Ra2 11:22 **16.Bc3** 5:27 **Ne4** 4:38 **17.Be1** 4:47

[17.Nfd2 Nxc3 18.Rxc3 Qd6= still leads to an equal position- White has two knights but only one useful outpost!]

17...Ra6 4:15 From a human point of view, it is sensible to cut out ♘a5 options with the attendant rook-traps, and also protect the c6-pawn.

[17...Bg4!? 18.h3 Bxf3 19.Bxf3 Nd6= is equal for precisely the same reason as the last note.]

18.Nc5 3:48 **Rb6?!** 3:00 Solid to a fault.

[18...Nxc5 19.Rxc5 Qd6 might have been slightly more unpleasant for White to play - c6 is not easy to hit, and Black's doubling on the a-file comes quickly.]

19.Ra1 6:35 **Bg4** 9:30 **20.h3** 1:55 **Bxf3** 14 **21.Bxf3** 7 **Nxc5** 44 **22.bxc5** 6 **Rb8** 1:12 Now if we are looking at the position seriously, White has a slight edge, though quite how to prosecute it is not clear. **23.Ra7** 6:42

[23.Qc2 Ra8 24.Bb4 Qd7 25.Ra2 Ra7 26.Rfa1 Rfa8 27.Be2± followed by kingside pawn pushes might be the best way to try- Black

has no counterplay and while his position is tremendously solid, he has no option other than staying solid.]

[32...Qxa3!? 33.Bxa3 f4= was a way for Black to think about maybe, eventually, winning-on a good day with a following wind, and if and only if White tries to win with a pawn break.]

33.gxf5 1:17 **Qxf5** 32 **34.Kg2** 4:39 **g5** 2:02 The position is now completely balanced and it is for White to force a draw before Black develops real play with ... ♘g6 or ...g4. **35.Be2** 5:17 **Qe4+** 1:42

[Sagar,Shah]

Often we have a question in our minds - What exactly differentiates a strong 2550 GM from a super strong 2750 GM. This game should answer that question. **1.Nf3** Sagar Shah **1...c5 2.c4 Nf6 3.Nc3 Nc6 4.g3 d5 5.d4 e6 6.cxd5 Nxd5** This was first played by Tartakower against Rubinstein in 1929. **7.Bg2 cxd4 8.Nxd4 Nxc3 9.bxc3 Nxd4 10.Qxd4 Qxd4 11.cxd4 Bd6** Now this is a very safe variation for White and one in which he hardly ever loses. Even for a player of Svidler's calibre, it is not easy to outplay a grandmaster from this position.

[11...Bb4+ is the other option. 12.Bd2 Bxd2+ 13.Kxd2 Ke7 14.Rhc1 Rd8 15.Rc7+ Rd7 16.Rac1 Kd8 17.Rxd7+ Kxd7 18.g4!? had been first played by Kramnik against Lautier in 1995 and recently reached in Gelfand,B (2759)-Leko,P (2731) Moscow 2014.]

13...b6 14.Bb2 f6 15.Rac1 Bb7 16.f4 Kd7 Black has equalised the position and now intends to exchange a pair of rooks down the c-file. Of course the position remains equal but not drawn because of the assymetrical pawn structure. Black can always create a plan on the queenside in the endgame due to his majority. **17.e5**

14.Rd1 ⇔d; ┌d7 **14...f5** Black aspires to open the game, in order to make use of his advantage in development. Another move with a similar idea, that deserves attention, is:
[14...Rb8!? 15.a3 *(15.Qxd7 Nxc5 16.Nxc5 Bxc5∓)* 15...f5 16.exf6 Bxf6 17.Qd3 *(17.Qxd7 Qxd7 18.Rxd7 Rfd8 19.Nxf6+ gxf6 20.Rxd8+ Rxd8 21.Be3±)* 17...Nc7 18.Qxd7 Be5 19.g3±]

15.exf6 Bxf6 16.Qxd7 It's not so clear, whether the attempt to use Black's bad knight position, was much better:

[18.Rd6? Nxc5∓]

18...gxf6 19.Rd6 The idea of this move - to force Black to take the c-pawn, and open the c-file and ⇗ a7-g1 for the white pieces.
[19.Rxd8+!? - see previous variant.]

19...Nxc5 20.Rxd8+ Rxd8 21.Be3 ±/= White has advantage in this endgame because of the weak black pawns. White's bishop is also stronger in comparison with the black knight, especially in case of a play in two sides. A general plan of White in this position - to take black pawn on a7 and run with his a-pawn. But Black has good chances for counterplay, because his pieces are very active. **21...Na4 22.Rc1!?** Peter Svidler doesn't see the necessity to protect his b-pawn. More important for him is to activate his rook and attack the pawns at the queen side.
[22.b3!? Nc3 23.Kf1 a6=]

22...Nxb2 23.Kf1 Nd3?! A serious mistake. Black needs to protect his c-pawn at first. After this move White forces an endgame with an extra pawn.

[27.Bxa7!? Rd1+ 28.Re1 Rxe1+ 29.Kxe1 even with an extra pawn, White has no chance to win this position. Therefore, Svidler refrained from rook exchanges now and in future.]

27...Rd7 28.Ra4 Nc3 29.Ra5! Kg6 30.Bxa7 In the last 10 moves White greatly enlarged his advantage and now has an extra pawn. But he still needs to work hard in order to convert his advantage for a point. **30...Rd6 31.Kg2 h5± 32.Be3 Nd5 33.Bc5 Rd7 34.Ra4 Ne7 35.f3**

35...Rd2+ 36.Kh3 Nc6 37.g4 White wants to create a passed pawn on the h-file. **37...Ne5 38.gxh5+ Kxh5 39.Kg3 Nxf3!?** An interesting decision. The ending ♖+♗ against ♖ is theoretical

drawn, but in a practical game it is frequently not so easy to do it. In this game Vladimir Malakhov demonstrates perfect knowledge of theory. Also possible to play:

FIDE World Cup (3.3) 05.09.2011
[Caruana,Fabiano]

This was the first of our two game tiebreak match. Our classical games had both ended uneventfully in draws. **1.d4** Caruana,F Caruana **1...d5 2.c4 c6 3.Nf3 Nf6 4.e3 Bg4 5.Qb3 Qc7 6.Ne5 e6** I wasn't very familiar with 5.♕b3, so I chose a rare line, hoping to avoid my opponent's preparation. Black gives up the bishop pair and accepts a slightly worse position, but I was happy to just get a normal position to play. **7.Nxg4 Nxg4 8.Be2 Nf6 9.Nc3 Nbd7 10.Bd2 Bd6 11.Rc1**

[White could have also considered 11.cxd5 exd5 12.Rc1 a6 13.g4! h6 14.h4 , when Black stands worse. White's plans of kingside or central expansion are relatively clear-cut, while Black doesn't seem to have any meaningful counterplay.]

11...dxc4 I was happy to get this fluid center. **12.Qxc4 a6 13.h3 0-0 14.0-0 e5** I could have waited for this until White plays e4, but I was a bit impatient. However, the position remains roughly the same in any case. **15.dxe5 Nxe5 16.Qb3** It seems like White must have an advantage here due to his bishop pair, but Black is very solid and it isn't easy for White to find a concrete plan. **16...Rad8 17.Rfd1 Qe7** It seemed like a good idea to escape the gaze of the rook on c1. But the main idea of this move is to create threats to White's king with ... ♘g6 and ... ♕e5. **18.Be1 Ng6 19.Rd3** Peter continues to play logically. He is hoping to trade all the rooks and count on his bishop pair in a simplified position. **19...b5** After White's last move I wanted to cause him discomfort with the idea of ...c5 and ...c4. **20.Rcd1 h5!?** An interesting move. I wanted to fix White's pawns with ...h4, opening ideas of ...♕e5.

[20...c5 21.Nd5 Nxd5 22.Rxd5 brings Black nothing but regret. The exchange of knights frees White's position considerably.]

21.Qc2 h4 22.f4? A serious mistake.

[White should have continued

patiently with 22.a3 , slowly planning b4 and eventually f4. It isn't clear what Black will do. Rfe8 23.b4± , and the onus is on Black to demonstrate counterplay.]

22...Bc5 23.Bf2 Rxd3 I could see that Peter had missed something and was upset with his position. **24.Qxd3**

[I believe he had overlooked 24.Rxd3 Nxf4 *(* Actually, *24...Re8!* , preparing ...♘xf4 on the next move, is even stronger. *25.a3 Qa7!* is the important point. *)* 25.exf4 Bxf2+ 26.Kxf2 Qc5+ 27.Kf1 b4 , when Black is at least equal.]

24...Re8 25.Bf3 Bxe3 26.Qxe3 Qxe3 27.Bxe3 Rxe3 28.Rd8+ Kh7 29.Ne2 I had expected Peter would go for this position. White is down a pawn, but due to his strong bishop on f3 he has good chances to make a draw. **29...c5?** Returning the favor.

[29...Nd5! 30.Kf2 Rd3 would have given White difficult problems to solve. The game and perhaps the entire tournament might have turned out differently had I played this.]

30.Ra8 I had missed this for some bizarre reason, thinking only about 30.♖d6. **30...Rd3?!** The result of general panic.

[30...Ne4! was a strong move, which would have at least forced White to calculate a bit. 31.Kf1 *(31.Rxa6 Nxf4* is the idea, which seems to lead to a draw in the end, but of course White has to prove it.*)* 31...Nd2+ *(31...Ne7 32.Rxa6 Nf5* is another possibility, which is objectively close to equal but White has to demonstrate accuracy.*)* 32.Kf2 Rd3 33.Bb7 Nc4 34.b3 Nd6 35.Bf3 , when neither side is in any real danger.]

31.Rxa6 Now with his strong bishop against my ineffectual knights, White is calling the shots, although with accurate play Black can still restore the balance. **31...Rd1+?** A really awful move pushes Black over the edge.

[31...Rd2 32.b3 Ne4! keeps Black in safety.]

32.Kf2 Rd2 33.b3 Now things are seriously wrong for Black. **33...Rb2 34.Ke1 Ne7?** A move beyond comprehension, self-trapping my rook.

[34...c4 35.bxc4 bxc4 is of course the only way, although Black may already be in too deep. 36.Kd1 , and I don't think Black can save the game.]

35.Kd1+- The game is over, the rest was simple. **35...Rb1+ 36.Nc1 Rb2 37.Nd3 Rb1+ 38.Kc2 Rg1 39.a4 bxa4 40.Rxa4 Nfd5 41.Kd2 Rb1 42.Nxc5 Rb2+ 43.Kc1 Rf2 44.Nd3 Rf1+ 45.Kd2 Rb1 46.Ra5 Nb6 47.Rb5 Nbc8 48.Kc2 Ra1 49.Kb2 Ra6 50.Rb7 Re6 51.b4 Nd6 52.Rc7 Nb5 53.Rc5 Nd4 54.Re5 Rd6 55.Be4+ f5 56.Rxe7 fxe4 57.Rxe4 Nf5 58.Kc3 Rg6 59.Re5 Nd6 60.Ne1 Rg3+ 61.Kd4 Rb3 62.Nd3 Rb1 63.Rd5 Ne8 64.Rh5+ Kg6 65.Rxh4 Nd6 66.Rh8 Kf6 67.Rb8 Rd1 68.g4 Ke7 69.f5 Kd7 70.Rg8 Ne8 71.Ke3 Ke7 72.Ne5 Rb1 73.h4 Rb3+ 74.Kf4 Rxb4+ 75.Kg5 Re4 76.Ng6+ Kd7 77.Rf8 Nd6 78.Ra8 Ne8 79.h5 Rb4 80.Ra7+ Kd6 81.Re7 Nf6 82.Re6+ Kd7 83.Ne5+ Kc8 84.Rxf6 gxf6+ 85.Kxf6** In the second game, I came close to creating problems for Peter, but I missed a crucial tactic and my hopes of equalizing the score evaporated. 27.Bc3 Qe6 28.Kg2 h5 Anand is building his defense on the white squares, which makes difficult for white to achieve progress in the position. **29.h3 Rd8 30.a3** White's possible plan can be connected with advance of the kingside pawns (g3-g4,Kg2-g3,f2-f4, etc.). **30...Rc8** Threatening 31...Bxa3. **31.Re3 Rc4 32.Qa8+ Rc8 33.Qb7 Rd8 34.Ba5! 13.Nbd2 Bf8 14.d5

[The main continuation is supposed to be 14.a4 but Svidler might have been impressed by his opponent's play after Na5!? in Volokitin,A (2662)-Morozevich,A (2731)/Biel 2006/CBM 114 [Marin] (0-1, 61)]

14...Nb8 15.Nf1 Nbd7 16.N3h2 Nc5 One of the possible continuations. Black intends to undermine White's advantage in the centre with ...c6 as soon as possible, which makes driving the bishop away quite useful.

[Both players had experience with Black in the line starting with 16...h6 17.Qf3 *(17.Ng4* ½-½ Naiditsch,A (2664)-Svidler,P (2742) Sparkassen Dortmund GER 2006 (5)*)* 17...Nc5 18.Bc2 c6 19.b4 Na4?! *(* In my comments to this game, I suggested *19...cxd5!? 20.bxc5 dxe4!* as a possible improvement.*)* and now, in Bruzon,L (2667)-Morozevich,A (2731)/Biel SUI 2006/CBM 114/ [Marin] (0-1, 55), White should have played 20.Bxa4 bxa4 21.c4±]

17.Bc2 c6 18.b4 In order to weaken Black's pressure over the centre, White has to weaken his queenside with this move. **18...Ncd7 19.dxc6 Bxc6 20.Bg5** In the long run, the exchange on f6 is supposed to offer chances for taking over the control of the d5-square. However, the weakness of the c4-square is just as significant. **20...Qc8!?** This slightly mysterious way of avoiding the pin (more natural would be 20... ♕c7) is aimed to maintain the control of the h3-

c8 diagonal, besides the obvious pressure along the c-file. More about it later.

[20...h6!? is a specialty of Bacrot, who has defended Black's point of view in a few games. Black shows that he is not afraid of the exchange in f6 and provokes it immediately. 21.Bxf6 Nxf6 22.Ng4 Exchanging the reserve knight in order to reduce Black's control over the central squares (d5 in first line). Nxg4 23.Qxg4 Bd7 Black transfers the bishop to e6, in order to put the c4-square under onservation.

A) 24.Qd1 This retreat looks a bit passive, but deserves some attention on the basis of the fact that it was... Bacrot's choice with White! Rc8 *(24...Qc7 25.Re3 Be6 26.Bb3 a5 27.Bd5 Ra7 28.Qb3 Bxd5 29.Qxd5 Qc4?!* Black was OK and did not need to resort to such radical measures. *30.Qxc4 bxc4 31.bxa5 Rxa5 32.Re2 d5 33.exd5 Rxd5 34.Ne3 Rd3 35.Rc2±* Bacrot,E (2660)-Dervishi,E (2490)/Verona 2004/EXT 2005 (1-0, 73)*)* 25.Re3 Be6 26.Bb3 Re7 27.Rg3 Rec7 28.Rc1 Qh4 Black has regrouped in optimal way and has little to fear. The "bad" bishop is useful because it safely defends the d6-pawn. White needs to use his rooks for the defence of his similar weakness on c3. *(* The usefulness of the white queen on d1 becomes obvious after *28...a5* when White can maintain the integrity of his structure with *29.a3* without having to exchange on e6 previously. To be compared with a similar situation after 24.♕f3. *)* 29.Bd5 Bxd5 30.Qxd5 Rc4 31.Rf3 R8c7 32.Ng3 The knight cannot reach the optimal d5-square because of Black's pressure against the e4-pawn. B) 24.Qf3 Rc8 25.Bb3 Be6 26.Bxe6 *(* In principle, White would like to refrain from this exchange, which strengthens Black's control over the centre. However, in the long run he will not be able to avoid it without making some other concession. For instance: *26.Rec1 Be7 27.Rc2 a5* . Now, the bishop is not defended by the queen and White cannot maintain the tension in a favourable way. *28.Qd3 axb4 29.cxb4 Rxc2 30.Qxc2 Qb6* and the weakness of the d4-square offered Black sufficient counterplay in Akopian,V (2693)-Zhang Zhong (2639)/Wijk aan Zee 2004/CBM 099/[Wedberg] (½-½, 63) *)* 26...fxe6 . 21.Ng3N White continues improving his position without clearing matters on the kingside yet.

[However, the immediate 21.Bxf6 makes some sense, in the way that it keeps the f1-knight on the track to d5. Nxf6 22.Ng4 Nxg4 23.hxg4 Bd7 This is the point behind placing the queen on c8. Adams used up a lot of his thinking time before deciding to accept the repetition of moves. Actually this was a pity, because what Short had prpepared thus remained hidden. But despite its brevity, the game was significant: Short appears to be more or less convinced by 7... ♘h6!?, whereas Adams did not seem to be so struck by Svidler's 10. ♕a4 that hewanted to play it against Short.' Langrock, Hannes: 'Ich war während dieser Partie live in Liverpool vor Ort. Adams verbrauchte einen Großteil seiner Bedenkzeit, bevor er sich entschloss, die Zugwiederholung zu akzeptieren. Schade eigentlich, denn so blieb hinter den Kulissen, was Short vorbereitet hatte. 11...Bg5 Langrock,Hannes: 'The black plan has the practical disadvantage that White here has an early opportunity to repeat moves with 10. ♕g3. But in the given situation, Nepomniachtchi certainly did not necessarily have anything against a quick draw. ' Langrock, Hannes: 'Die schwarze Spielweise hat den praktischen Nachteil, dass Weiß hier die frühe Möglichkeit hat mit 10. ♕g3 die Züge zu wiederholen. Langrock,Hannes: 'Neil: 'So, no draw: the white queen gives up her defence of e5 and seeks her fortune on the other wing.'' Hannes: 'In der Partie wurden in der Tat einmal die Züge wiederholt und erst dann spielte Svidler 12. ♕a4.' **12...Nxe5 13.Ngf3 Nxd3+?!** It's logical to eliminate white's light-squared bishop, however, this exchange improves white's pawnstructure, so the ♙c5 will never fall...

White feels some discomfort since his pieces will have to be regrouped. **9.Nce2 e5 10.Nb3 Nc6 11.Ng3** The knight eyes the perfect square f5, but two other concepts have been tried against this set up. Both begin with pawn advances, but one is aimed at queenside 11.c4 and the other one at the kingside 11.g4.

1.e4 Postny,E Postny,E **1...e5** The first example in this book of a symmetrical kingside opening. **2.Nf3**
[These days the King's Gambit with 2.f4!? exf4 , and then 3.Nf3 *(* or *3.Bc4* , has long been highly unfashionable. White gives away a pawn and exposes his king, without even bringing his pieces into play. This does not sound so promising, but White keeps two pawns in the centre, on e4 and d4, with excellent attacking chances, and this line is dangerous. If Black falters, his position, even now, can end up in collapse *)* . Curiously a list of top-level games from 2004 to early 2008 shows that White has a big plus score, with no losses, with a 100% score in blitz games and quickplays. In standard play, V.Zvjaginsev-E.Tomashevsky, Serpukhov 2007, led to a win for White that 19th Century players would surely have appreciated. After 3...d6 4.d4 g5 5.Nc3 Nc6 6.g3 g4 7.Nh4 f3 8.Be3 Black had an impressive advanced passed pawn, but White has excellent piece development and good central pawns. Zvjaginsev later scored a miniature win (25 moves or fewer), with Black's king being fully exposed in the centre.]
2...Nc6
[For 2...Nf6 , see Kamsky-Carlsen.]
[2...d6 , the Philidor Defence is playable, but has the disadvantage of blocking the dark-squared bishop.]
3.Bb5 This has been played about three-quarters of the time here, putting pressure on the knight, and thereby putting pressure on the e5-pawn.
[3.d4 , the Scotch Opening, is examined in Rublevsky-Grischuk. See the comments there for other third move alternatives.]
[The text reaches the Ruy Lopez, now even more fashionable in the 21st century than in the 16th. White does not aim for the natural attack on the f7-pawn with 3.Bc4 , but pressurizes the e5-pawn by attacking the defending knight on c6.]
3...Nf6

[The Berlin Defence, but the main line remains 3...a6 4.Ba4 Nf6 . See Ivanchuk-Aronian.]

4.0-0

[4.Nc3 leads to the 'boring' Four Knights, with Rubinstein's Nd4 removing much of the interest from White's point of view.]

[4.d3 is more flexible for White, without necessarily achieving much of an advantage. James Mortimer achieved his moment of fame in London 1883, with the trap he set with Ne7!? , with the idea that if 5.Nxe5? c6! , Black wins a piece after either 6.Nc4 *(*or *6.Bc4 Qa5+)* 6...Ng6! *(*but not *6...cxb5?? 7.Nd6#)* 7.Ba4 b5 . Mortimer's three opponents in that tournament avoided the little trap, and were much stronger than Mortimer, and so won easily each time. The move itself is playable, and the idea of ...c6 and ...Ng6 is sensible.]

4...Nxe4

[4...Bc5 has been described as the 'Berlin Classical', a mixture of the Berlin and Classical (3...Bc5) defences. The bishop move is playable, but less solid than the Berlin Defence proper. White can aim at a hit with d4 against an early ... Bc5.]

5.d4 This has been tried many times in recent years and for the most part it has proven to be difficult for White to break down Black's position. The present game does not give White a clear or decisive edge, despite the final result.

[The older 5.Re1 The knight on d6 gets in the way. Could Black have considered

A) 5...Nd6 6.Nxe5 Be7 was tried several times in the 1886 World Championship, with Steinitz as White against Zukertort. Steinitz achieved a good plus score, but these days it is seen basically as a drawing line with symmetrical pawn structures, and a gradual equalization by Black; *(* or maybe immediately *6...Nxe5 .)*;

B) 5...Nf6 instead? After 6.Nxe5 , White is slightly ahead in development, and it is not quite as easy as it looks to develop Black's pieces: Be7 7.d4 0-0 8.Nc3 keeps a slight edge.]

5...Nd6

[5...Be7 , the traditional way, keeps a slight edge for White after 6.Qe2 Nd6 7.Bxc6 A year previously, Black tried

A) 7...bxc6 8.dxe5 Nb7 . *(8...--)*;

B) 7...dxc6 , which is much sharper, and then 8.dxe5 Nf5 9.Rd1 Bd7 10.e6 fxe6 11.Ne5 Bd6 in P.Svidler-A.Morozevich, Wijk aan Zee 2005. except that the knight on c2 looks overextended. However, the knight is irritatingly difficult to attack, with, for example, b4 and Rb2 giving an escape square on a3, and a knight move followed by Rd2 giving an escape square on e1. Play eventually ended up in a typically tense late queenless middlegame, and a later draw.]

[There is also the question why Black has not really bothered with 5...exd4 . After 6.Re1 d5 Another try for White is

A) 7.Nxd4 Bd6 8.Nxc6 Bxh2+ 9.Kh1 (to avoid perpetual) Qh4 10.Rxe4+ dxe4 11.Qd8+ Qxd8 12.Nxd8+ Kxd8 13.Kxh2 , we have reached a position which can also come about with ...a6 and Ba4 included. Here with White's bishop still on b5, Black has the more constructive pawn attack with ...c6. This line has only occasionally been played, with a win for Black after unclear play in M.Djurdjevic-M. Trajkovic, Novi Sad 1989. Play continued with h6 14.Nc3 c6 15.Bc4 f5 16.Be3 Ke7 17.Rd1 b6 18.Bd4 Be6 19.Bxe6 Kxe6 20.Bxg7 Rhd8 . We now return to 5...Nd6: **6.Bxc6** Obvious? Maybe. The only sensible move? No.

[6.dxe5 Nxb5 7.a4 traps the knight, and immediately recovers the minor piece. A simpler and safer option is

A) There is some sharp gambit play after 7...Nd6 8.Bg5! f6 *(8...Be7 9.Bxe7 Qxe7 10.exd6 cxd6 11.Nc3* leaves Black's extra pawn a liability rather than an asset*)* 9.Re1! .;

B) 7...d6 8.axb5 Nxe5 9.Re1 Be7 10.Nxe5 dxe5 11.Qxd8+ Kxd8 12.Rxe5 Bd6 with equality. Yet again, we reach the familiar pattern in open games of many tactics early on, subsiding to a queenless late middlegame.]

6...dxc6

[6...bxc6 7.dxe5 Nb7 is playable, but not enticing for Black. Fritz gives this as equal, after, for example, 8.Bg5 Be7 9.Bxe7 Qxe7 10.Nc3 0-0 11.Re1 , but White, with his better development and centralized pieces, should have chances to play for more than that.]

7.dxe5

[7.Nxe5 has no realistic hope of an advantage. White is attacking nothing, and so Black can quietly complete his development, and eventually try to

take advantage of the bishop pair.]

7...Nf5

[7...Ne4 is playable, but the knight loses some flexibility. If Black wanted to manoeuvre his knight via c5 and e6, putting a little pressure on the d4-square, he would take three moves to cover the d4-square, whereas ...Nf5 does it in one.]

8.Qxd8+ The only try for a win.

[If 8.Qe2 Nd4 , Black is comfortably equal.]

8...Kxd8 After the preliminaries, the battle starts here. White has the better pawn structure, while Black's set-up is solid, and he keeps the bishop pair. There are no sharp attacks against the king, but the position is difficult for both sides. The Berlin Defence is quite a significant challenge for the Ruy Lopez. If White cannot find an advantage in this position, then he might well decide that it is time to give up the Ruy. Kasparov, many years ago, found no effective way of breaking up the Berlin Defence against Kramnik. Since this 2000 match, players with White have tried hard to find something here. See too the comments to Stellwagen-Eljanov. **9.Nc3** As one can imagine, there is a wide choice of moves. is the most popular, on the basis of the principle of 'knights before bishops'. The player will generally have a good idea of where the knight should go, but it is less clear where the bishop wants to go, and it is useful to delay for a move, while developing the knight, to see what the opponent will try. Flexibility is an important part of modern chess.

[Black is not making any direct threats, and there are various developing ideas, including the move played, and checks such as 9.Bg5+]

[and 9.Rd1+ .]

[Also 9.b3 and Bb2, providing back-up to White's kingside pawn advantage.]

9...Ne7 '!?' This knight move is a relatively recent idea, pioneered by Zoltan Almasi in the late 1990s. Of course, all this is now a decade ago, but in the decades before Black did not think of trying it. The reason for this neglect is presumably that Black has already taken four moves with his knight, ...Ng8-f6xe4-d6-f5, to end up on a good square, and it seems extravagant for Black to make two extra knight moves when neither his bishops nor his rooks have moved. Why should Black spend another couple of tempi with ...Ne7-g6? The obvious answer is that Black is attacking something, the pawn on e5, and this provides the possibility of a counterattack.

[For 9...Bd7 see Stellwagen-Eljanov.]

10.h3 The main line. White wants, at some stage, to stop ...Bg4. **10...Ng6** And this is the logically consistent main line for Black.

[10...h6 has been tried a few times, on the basis that if White has the luxury of playing a quiet line, Black too should have the luxury of playing another quiet line in return, and waits to see what the opponent does next.]

11.Bg5+ Postny suggests, in annotations for ChessBase, that White's intention is to force his opponent's king to the kingside, to stop Black's plan of ... Be6 and ...Kc8. This seems an over-elaborate interpretation. A much simpler point is that White is gaining a tempo with check, bringing the undeveloped rook into play quickly. This check does

not allow black to hide his king on the queenside. The black king is forced to stay in the centre where it might be vulnerable. **11...Ke8** Perhaps it is time to mention, much more specifically, the central strategic battle of the Berlin Defence. White has given up bishop for knight, in return for doubling Black's c-pawns. White now has much the better pawn structure. He has a good 4-3 pawn advantage on the kingside, and if there is quiet play on both sides, White will have excellent chances of setting up a kingside pawn-roller. On the queenside, Black too has the extra 4-3 pawn majority, but the pawns block each other, and do not create the chance of setting up a passed pawn. The problem for Black is not so much that his doubled pawns are weak, as it is easy to defend them. The real problem is rather that Black's queenside pawns are less effective, in terms of active play, than White's kingside passed pawns. Black has compensation, though, with his bishop being traditionally slightly stronger than the knight. Usually bishops work in pairs for maximum effect. In the Berlin Defence, it is important for Black's bishops to stay together for as long as possible to offset the negative impact of the doubled pawns.

[11...Be7 is playable, but it makes concessions. 12.Rad1+ Ke8 13.Bxe7 Kxe7 14.Nd4?! has been tried a few times. Black has avoided grabbing the hot pawn with Nxe5!? 15.Rfe1 Kf6 , but there is no obvious refutation. Possibly White needs to play safely, but then any edge for White is minimal, the knight on g6 making it difficult for him to establish his pawn roller with f4.]

12.Rad1 White wants to keep control of the d-file. **12...Bd7** Topalov already played this position also as white.

[Or 12...Be6 13.Nd4 Bc4 14.Rfe1 Bb4 15.Nf5 Bxc3 16.bxc3 Rg8 17.a3 h6 18.Bc1 Be6= ½-½ Leko,P (2741)-Kramnik,V (2770)/Dortmund 2004/CBM 103 (34) , equal and later drawn in P.Leko-V.Kramnik, Dortmund 2004. Can White find a slight edge in this? Topalov tries to leave the bishop less exposed.]

13.Nd4

[On 13.Rd2 , Kramnik has tried Be6 '!?' , on the basis presumably that White's rook is slightly more exposed on d2 rather than d1, such as after ... Nxe5-c4. Maybe better is In P.Svidler-V.Kramnik, Dortmund 2004, White was a pawn down, but was able to draw after 14.Rfd1 *(14.Nd4 h6 15.Nxe6 fxe6 16.Be3 Nxe5 17.Re1 Nc4 18.Rd4 Nxe3 19.Rxe3 Bc5 20.Rxe6+ Kf7 21.Rde4 Rhe8* with a likely draw.) 14...Be7 15.Ne2 Nxe5 16.Nxe5 Bxg5 17.f4 Be7 18.Nd4 . *(18.--)* 18...Bc5 19.Kh2 Bxd4 20.Rxd4 f6∓ ½-½ Svidler,P (2727)-Kramnik,V (2770)/Dortmund 2004/CBM 103 (25)]

One gains the feeling from the Berlin Defence that play is generally theoretically about equal, in a late queenless middlegame, but that either player could easily go seriously wrong positionally. Among top players, competitors are expected to handle all types of position, but many amateur

players might find such openings uncomfortable to handle, especially against even slightly stronger opposition. 21.g3 Nf5 22.Nf3 c5 23.Rd1 Ke8 24.Nc3 Nd4 25.Nd5 Bd8 26.Nxd4 cxd4 27.Rxd4 Bxh3= ½-½ Topalov,V (2735)-Vallejo Pons,F (2662)/Benidorm 2003/CBM 99 (61)]

14...h5N A new move, with the idea of pushing the pawn further to h4, and trying to cramp White's kingside pawn majority. Black is fighting against white's pawns offensive on the kingside. Also, after the forthcoming h5-h4 black's rook gets a chance to join the battle via h5.

[An earlier try was The plan adopted by Almasi is probably safer: 14...Bb4 Svidler notes that if

15.f4 The most aggressive;

[although 15.Bg5]

[and 15.Rfe1 also seem to give White chances of a slight plus.]

15...h4

[If 15...Bc5 White has several alternatives. Svidler gives 16.Ne4 *(* instead perhaps *16.Rd2;* or *16.Rfe1)* 16...Bxd4 17.Rxd4 Bf5 18.Ng3 Ne7 , which he feels is unclear, but maybe 19.Rd2 still keeps an edge.]

16.f5!! '!?' Postny gives this a double-exclamation mark, describing Svidler's pawn sacrifice as 'very deep and sound'. Svidler, he says, seizes the initiative. Svidler himself is more cautious. Neither player will have been able to calculate whether the pawn sacrifice is fully sound, although undoubtedly Svidler would have believed in his play. As further analysis shows, there are possible ways in which Black could have improved, and there are a few questions as to whether White was better throughout. This is in effect gambit play, but also highly sophisticated gambit play. White is not charging through with an attack on the king, hoping that somewhere along the way, Black may make a tactical mistake, giving White a brilliancy and a point. It is more a case of setting the opponent a challenge. Black has an extra pawn, but has a few structural defects, and his pieces are under pressure. Can Black hold the balance, or even take over the initiative? The only answer, for player and reader, is to wait and see. A very deep and sound pawn sacrifice based mainly on intuition. At

the price of a pawn Svidler seizes the initiative.

[Postny also gave as equal 16.Rd3 Bc5 17.Rfd1 Bxd4 18.Rxd4 Bf5= . I doubt this interpretation. After 19.R4d2 White has the more active pieces, keeps the open d-file, and still has the better pawn structure. White's knight could also make its presence felt after Ne2 and Nd4.]

[There are many other ways for White to aim for a slight edge: for example, 16.Ne4 c5 17.Ne2 b6 18.N2c3 Bf5 19.Rf2 Be7 20.Rfd2 Rd8 21.Rxd8+ Bxd8 22.Kf2 . Probably any edge here is very slight. White keeps a slight edge in most lines, and is in no danger of being worse, but does he feel he has realistic chances of playing for a win? Or has he got better chances by sacrificing? In the end, this is as much a question of chess psychology as of analysis.]

16...Nxe5 Naturally he must take the pawn. **17.f6!** And White must go through with the sacrifice. It's very important to prevent from black to play f7-f6, so that the knight won't have a stronghold on e5.

[17.Bf4 f6 18.Rfe1 Kf7 19.Bxe5 fxe5 20.Rxe5 Bd6 leaves Black with comfortable play.]

17...Rh5 Topalov, with his new 2800+ rating, is a formidably imaginative player, and he has the ability of playing for an attack out of seemingly nothing. One senses that Svidler was deliberately trying to provoke his opponent, and perhaps it worked, as he won the game.

[Svidler's notes in 'Informator' suggest a draw after 17...gxf6 18.Ne4 Be7 19.Nxf6+ Bxf6 20.Rxf6 Rh5 21.Nf3 Nxf3+ 22.Rxf3 Be6 23.Rf4 Rd8 24.Rxd8+ Kxd8 25.a3 . White will soon recapture the pawn, winning the one on h4, and Black should hold the draw. A draw with a 2765-rated opponent will be more than satisfactory for most players, but Topalov, with a valuable but fragile 2801 rating, would not want to give away half an Elo point so readily. He would try to put his opponent under some pressure. As for whether Topalov's combative alternative is good, bad or equal, we need to analyse what happens later.]

18.Ne4 Now Black cannot take the pawn, which remains an irritation. Moreover, White's knights remain excellently centralized. A reminder for the reader. Black's position is not as good as it looks, as he cannot castle, and the king is therefore under pressure in the centre.

18...g6 Again one senses that Topalov is aiming for a win.

[18...Nc4 19.Bf4 Nxb2 20.Rb1 is bad for black.]

[Svidler gives 18...c5!? 19.fxg7 Bxg7 20.Nxc5 Nc4 21.Nxd7 Nxe3 22.Rfe1 Kxd7 23.Rxe3 Rd5 24.Red3 Bf6 25.c3 , and White has slightly the better pawn structure, thanks to the exchange of Black's g-pawn. Topalov prefers to keep the pawns united.]

19.Bf4 White wants to keep the f-pawn as firmly protected as possible.

[19.Rfe1 loosens, and after Bd6! 20.Bf4 Kf8 21.Nxd6 cxd6 White has no advantage.]

19...c5 '?!'

[If 19...Bd6? 20.g4! hxg3 21.Nxg3 Rxh3 22.Rde1 Kf8 23.Rxe5 Bxe5 24.Bxe5± with, according to Svidler, a clear advantage for White. Is this so clear? Black would want to defend the

pawn on c7 with Rc8 , and either equality or a slight edge for White. This would have been an interesting struggle, one problem for White being that there is no cover with the pawns to set up any outposts for the knights on the kingside. This seems better than the move actually played.]

20.Nf3 '?' This is a very difficult position to understand, even with the help of the computer, and plenty of leisure. In the constraints of tournament chess, all the players can do is to find moves, and hope for the best. Often what is remarkable in top-level chess is not so much that mistakes can be made, but rather that so often players find good or reasonable moves. Maybe there is a positional argument to be made in that Black's knight is vulnerable, and that White should not consider exchanging the knights with such ease. Svidler would presumably not have wanted to slow the tempo of play with a knight retreat, and so forces the exchange of knights. But maybe he should have kept the knights.

[White's basic idea after 20.Ne2! would be to play g4, kicking the rook away, and then kicking again with N2g3, and winning the knight on e5: Svidler gives as the main line

A) Black can try to get the knight out of the way with 20...Nc4 , but White has a clear positional edge after 21.Rfe1 Kd8 22.Ng5 Kc8 23.b3 . *(23.--)*;

B) 20...Rf5! 21.Rde1! *(* improving on *21.g4 hxg3 22.N2xg3 Rxf4! 23.Rxf4 Bh6* , regaining the exchange after *24.Rff1 Bxh3)* 21...Kd8 (avoiding the pins, semi-pins, and discovered attacks; in other lines, White plays g4 again) 22.g4! hxg3 23.N2xg3 Rxf4 24.Rxf4 Bh6 25.Rf2 , and White is probably winning with the extra exchange. This g4 idea in such a setting is highly unusual, and can easily be missed.]

20...Nxf3+ Half-forced, but a piece exchange would be something of a relief for Black anyway . **21.Rxf3** White's advantage has now been considerably been trimmed down. He is a pawn down, but he still keeps his initiative. Black's main problem is his king which is highly vulnerable in the centre and disconnected rooks. In my opinion, the position remains playable for black, but from psychological point of view it's much easier to be on the offensive side . **21...Be6** Topalov decides he must activate his pieces.

[21...Rf5?! 22.Re3! would please the spectators after instead, Be6 *(*A spectacular mate is after *22...Rxf4 23.Nd6+ Kd8 24.Re8+! Bxe8 25.Nxf7+ Kc8 26.Rd8# .)* 23.Bxc7 c4 24.Re2! Rc8 25.Red2 Rd5 26.Rxd5 Bxd5 27.Rxd5 Rxc7 28.Kf2 (Postny) leaves White better in the endgame; Black's king is still caught in the middle, White's pieces are better, and Black's h-pawn is weak with a good winning chances for white.]

[21...c4 22.Bxc7 leaves White clearly better.]

22.Rfd3 '?!' He wants to play for a win, and so cut out ...Rd8. This aim is commendable, and indeed Svidler scores the full point, but he is in danger of overpressing.

[After 22.Ng5?! Rd8 23.Re1 c4 24.Nxe6 fxe6 25.Rxe6+ Kf7

white loses all his trumps. 26.Re4 Bc5+ 27.Kf1 Rd4 is about level, with perhaps some minimal pressure in favour of Black.]

22...c4 Gaining some space for the dark-squared bishop. **23.R3d2** The only sensible move. **23...c6** Black must put something on the d-file, quickly. **24.Ng5** And White squeezes out Black's rook. **24...Bc5+** With gain of tempo, but it is going to be difficult for Black to coordinate his pieces further. **25.Kh2**

[Over the board it would be impossible to calculate whether this or 25.Kh1 would be better, given that Bd5 *(or 25...c3* would have different ramifications according to whether the king is on h2 or h1. The best that one can say is that occasionally Black might have a useful checking resource on the b8-h2 diagonal, but that also in some lines the king is more active on h2 than on h1. Trying to sort this one out is more like chess sudoku rather than normal chess. My instinct, for what it is worth, would probably be to prefer to avoid any checks on the dark squares with 25 Kh1, but Svidler sees a different approach, setting up ideas of g4, and if ...hxg3+ then Kxg3. Neither Postny nor Svidler makes any comment or analysis on this move. This could mean either that Svidler's move is so obvious and hardly worth considering, or, more likely, that the position is so obscure that it is hardly worth dealing with. *)*]

25...Bd5?! '?' But this is far less difficult to evaluate. There is here a choice between setting up some sharp tactical play, or, as Topalov ends up choosing, trying to keep the balance. This moment was rather critical.

[Postny gives this as the critical slip, suggesting 25...c3! 26.bxc3 Bxa2 , when both sides have obvious problems and opportunities. He gives as the main line Looks rather risky for black, but some concrete variations does not confirm that white has more than equality here. 26.Re2+ To keep the pressure on the king. **26...Kf8** Svidler gave this a question mark, while Postny passes it without comment. Certainly there is a problem now that Black's kingside pieces are tied up, but Topalov is still hoping that Black has good compensatory activity on the queenside, with a powerful bishop pair and an extra pawn on that side. The position is still finely balanced, but it is unclear as yet which way the balance will fall.

So, for example, 30.Bh6 Rf7 31.Be3 Bd6+ 32.Kh1 b5 33.Nh6 R5xf6 34.Nxf7 Rxf7 35.Rf2 Rd7 , and Black's position is extremely difficult to break down. *(35...--)*;

B) 27.Rde1 Rf8 28.Re7+ *(28.b4?! Bxb4 29.Rb1 a5 30.c3 Bd6 31.Rxb7+ Kc8 32.Bxd6 Kxb7 33.Bxf8 Rxg5* is over-elaborate, and White would need to press hard for a draw*)* 28...Bxe7 29.Rxe7+ Kc8 30.Rc7+ Kd8 31.Rxb7 Re8 32.Rb8+ *(*Svidler notes that *32.Nxf7+ Bxf7 33.Rxf7 Rf5 34.Bh6 Re1* presses too hard*)* 32...Kd7 33.Rb7+ is a draw.]

27.Rde1 Certainly White is putting his opponent under pressure, but it is difficult to see how he can win material. **27...b5**

[If Here 27...c3 , then simply was not so sound due to simple 28.b3 , and Black's advanced pawn is weak rather than strong. and the ♙c3 will be a target.]

28.c3 White wants to try to stabilize his queenside pawn structure. **28...a5** While Black wants to push his pawns

further. **29.a3** More consolidation. **29...Rc8** , the position is repeated

[If 29...b4?! 30.a4! , and Black can make no real progress on the queenside, but has broken up his own pawns.]

30.g4 A slight error, according to Svidler. The only way to make progress.

[30.Re5 is, remarkably, close to zugzwang, and if Black were to play quietly However,

A) with for example 30...a4;

B) or 30...Ra8 , White has gained a small tempo with 31.g4 .;

C) Of the bishop moves, 30...Bd6?? is a blunder: 31.Re8+ . We shall see this idea again. *(31.--)*;

D) 30...Bb6 is possible. There is tactical entertainment after 31.Re8+ *(*if *31.R5e2 Bc5* , the position is repeated *)* 31...Rxe8 32.Bd6+ Re7 *(32...Kg8?? 33.Rxe8#)* 33.Rxe7 Rxg5 34.Re5+ Kg8 35.Rxg5 Be3! 36.Rg4 Bc1 37.Rxh4 Bxb2 38.Bf8 g5! *(38...Bxc3?? 39.Bg7* and mate *)* 39.Rh5 Be4 40.Be7 Bc1 , and remarkably it is White's rook, rather than Black's, which gets stuck in the blind corner on h5. White will have to return the exchange with 41.h4 Bg6 42.Rxg5 Bxg5 43.hxg5 b4 44.axb4 a4 45.b5 cxb5 , leading to a draw.]

30...hxg3+ The natural response;

[but White still has to demonstrate a win after 30...Rh8 . He should be able to squeeze through after, for example, 31.Re5 a4 32.R1e2 Ra8 33.Ne4 Bxe4 34.R2xe4 Bb6 35.Re7 Rc8 36.Rd7 Rd8 37.Rxd8+ Bxd8 38.Bd6+ Kg8 39.g5 when White will win the h-pawn, then work out what to do next.]

31.Kxg3 White has gained a little more space for the king after the pawn exchange. **31...Be6?!** '!'

[Postny poses the question of how White could be able to improve his position after The bold 31...Ra8! '!?' , just waiting. There is no obvious answer. would have been patient. Ok, white has the initiative, but I don't see a clear plan of improvement. 32.h4 , certainly, then]

32.h4! Squeezing the rook out of active play, and allowing his bishop to move freely.

[32.Nxe6+ fxe6 33.Rxe6 Kf7 seems safe for Black: for example, 34.Bd6 *(34.Kg4 Rf5=)* 34...Rg5+! 35.Kf3 Rf5+ 36.Kg4 Bxd6 37.Rxd6 Rc7= , suggested by Postny, and if anything, Black seems better.]

32...Kg8? A divergence of opinion here, with Postny suggesting that this move was too eager, and changed the course of events, while Svidler implied it was just a normal move, and gave an exclamation mark for Black on the next move. On the whole, the current writer tend to agree with Postny's interpretation, but this is on the basis of examination of what was happening after move 40, and whether, after close analysis, Black could have held the position. Black can try to make a 'positional' assessment on move 32, and this of course is what the player is forced to do over the board. Chess is complicated. Topalov is really eager too change the course of the game, but after the move in the text his position is beyond saving.

[It was necessary to come back with the bishop: 32...Bd5 33.Re5 Ra8 *(*not *33...Bd6?? 34.Re8+)* 34.R1e2 Rc8 35.Re1 , and a draw. Chess

sporting psychology seems important here. Black is a pawn up, and he has a good bishop pair. Topalov is also a 2800+ player, and he, more than anyone, has obligations to try to play for a win if given a chance. Why should he be trying for a draw? The normal situation when reaching for an unbalanced position with chances for both sides is to play for a win for as long as possible, while trying to take care of an escape route, a draw option, if something is going wrong. Sometimes unfortunately the escape route is not there. This seems to be what happened to Topalov.]

33.Re5! Emphasizing the way in which Black's rook is being squeezed out.

[33.Nxe6 fxe6 34.Rxe6 is possible, and indeed the computer likes it, but after Rf5 with good drawish chances. *(34...Kf7!?* , Black's rooks are suddenly more active than White's. *)*]

[Svidler also considered the exchange sacrifice with 33.Rxe6 fxe6 34.Rxe6 , but there is no breakthrough after the counter-sacrifice with Rxg5+! 35.hxg5 Kf7 36.Re1 Re8 37.Rh1 Kg8! . The point is that after 38.Rh6?! Bf8 39.Rxg6+? Kf7 the rook is trapped. Naturally, White could still carry on to try for a win in other ways, but the best chance has disappeared.]

33...Bf8

[33...Bd6 34.Rxe6! Bxf4+ 35.Kxf4 fxe6 36.Kg4 followed by 37.Rxe6. Despite being an exchange down, white has a winning position. Black's rooks are actually out of play. Kf8 , and now White has to play it accurately:

A) 37.Rxe6 Rc7 38.Rd6 Ke8 39.Ne6 Rch7! 40.Ng7+ Kf7 41.Nxh5 Rxh5 42.Rxc6 a4 , for example, is only a draw, as Svidler notes. *(42...--)*;

B) 37.Rd1! Ke8 38.Rd6 is much better when none of Black's pieces coordinate. Svidler gives e5 (there is nothing much else to do) 39.Re6+ *(39.f7+ Ke7 40.Rxg6 Rxg5+!* draws *)* 39...Kd7 40.Re7+ Kd6 41.Rg7 : Even so, it is not clear that White is winning after

B1) Here he continues with 41...Rch8 42.Nf7+ Ke6 43.Nxh8 Rxh8 44.Kg5 Rh5+ 45.Kxg6 Rxh4 46.Re7+ Kd6 47.Re8 , and a narrow but convincing line by White. It eventually depends on a zugzwang after Rg4+ 48.Kh6 Rf4 49.Kg7 Rg4+ 50.Kf8 e4 51.f7 Kd7 52.Re5 Kd8 53.Re7 a4 54.Re6 Kd7 55.Re8 . Black now has to give way. If the rook moves on the g-file, White takes the e-pawn, and then, depending how Black defends with the rook, White plays the rook to the g-file or checks on the d-file. *(55.--)*;

B2) 41...Kd5! , trying to activate his pieces and pawns. After 42.Rd7+ Kc5 43.Ne6+ Kb6 44.f7 Rf5 45.Re7 Rh8! 46.Re8 *(*or *46.h5 Rf6! 47.Kg5 Rxf7 48.Rxf7 Rxh5+ 49.Kxg6 Rh2* , with level play*)* 46...Rxh4+ 47.Kxh4 Rxf7 , White is not winning. Neither though is he not pressing. So possibly Black is still holding after 33...Bd6, but the position is extremely

difficult.]

34.Nxe6 Now it's the right time for this capture, since black's ♖h5 won't come out.

[Svidler notes that the exchange sacrifice is only a draw after 34.Rxe6 fxe6 35.Rd1 Bh6! 36.f7+ Kg7 37.Be5+ is of course a perpetual Kf8 38.Bd6+ Kg7 39.Rf1 *(39.Be5+ is of course a perpetual)* 39...Bxg5 40.f8Q+ Rxf8 41.Bxf8+ Kg8 42.hxg5 Rxg5+ . The only way to escape perpetual on the g- and h-files is 43.Kf4?? , but this is mined. After Rf5+! Black wins a piece, and keeps several extra pawns.]

34...fxe6 The only way.

[34...Rxe5 35.Bxe5 fxe6 36.Rd1 breaks through.]

35.Rd1! Aiming for the d-file. It's very important to control the "d" file.

[35.Rxe6 Rd5 is only equal, or at best a very small edge for White.]

35...Rh7 Given an exclamation mark by Svidler, without comment, and implied as best by Postny. This assessment seems slightly puzzling.

[After 35...Kf7 36.Bg5 locking the rook. Rc7 37.a4 Rb7 , the position is deadlocked. White can do nothing actively and can patrol with the rook between d5, d7 and d8, while Black can do nothing much. 38.Rd2 Rh7 39.Kg4 Rh8 40.Rd8 Rh5 41.Rd2 , and a draw is looming. One suspects that the exclamation mark is given to the general idea, defending on the second rank, which is important for defence and counterplay, rather than the specific move. The way that Topalov plays it, his rook move is more 'active', but the loss of the e6-pawn is a defect.]

36.Rxe6 The pawn count is now level. Sometimes it has been easy to forget that White was a pawn down, given his strong passed pawn and active pieces.

36...Rb7 This was Topalov's idea, aiming to set up counterplay with both rooks. It remains to be seen whether this was better, worse, or about the same, as the passive defence on move 35. Postny commented on Topalov's strong preference for active defence rather than trying to hold the position. That was at an earlier stage of the game. Topalov is at least consistent here!

37.Re4 A choice of moves with the rook. He wanted to prevent Black from playing ...b4. Preventing black's possible counterplay with b5-b4. **37...Kf7** The king finally comes back into play.

38.Bg5 And White, of course, defends the pawn. **38...Re8** Black does not want to allow White to control two open files for the rooks. **39.Rxe8**

[39.Kf3]

[or 39.Kf4 could also be considered.]

39...Kxe8 40.Kg4 But he was thinking of the king to go this way. The main idea with h5 is not so much to exchange the pawns, but rather to enter with the king on f5. **40...Rh7** '?!' Move 40, and as so often in chess, this is the critical mistake after a tense and exhausting game. The rook finds itself out of position.

[There is an even more painful blunder with 40...Rd7? '??' 41.f7+! Rxf7 42.Rd8# .]

[40...a4 might be an improvement, but from psychological point of view it was obviously hard for Topalov to make such a move which deprives of any counterplay.]

[Svidler suggests, however, that 40...Kf7! is the correct way of handling

the position, and holds the draw. The king is the best piece for blockading an advanced passed pawn, and the rook can help guard the checks on the second rank. The rook is far less effective in guarding the pawn itself. The king covers all eight adjoining squares, while the rook covers only four, and is open to attack from the next-door diagonals. After 41.Rd8 b4 42.axb4 axb4 43.Rd4 bxc3 44.bxc3 Rb5! , so far as given by Svidler; White can try harder, though, through controlling the seventh rank, rather than trying to snatch a doubled isolated pawn, and

A) and if 45.Rxc4?! Rc5 , Black escapes with a draw. *(45...--)*;

B) 45.Rd7+! causes trouble:

B1) After 45...Kg8 46.h5 gxh5+ 47.Kxh5 , Black's pieces are totally passive. -- *(47...--)*;

B2) Therefore he has to try 45...Ke6 , but is in serious trouble after 46.Rc7 : for example, Rc5 *(or 46...Rb6 47.Kf3 Rb3 48.Rxc6+ Kd5 49.Rc8 Rxc3+ 50.Ke2 Ba3 51.f7)* 47.f7 Bd6 48.Bh6 Rf5 49.Rxc6 Rxf7 50.Rxc4 , and the onus is very much on Black to prove he can hold the position. Once the best blockading piece, the king, has been pushed away, life becomes much easier for the player with the passed pawn. Black, it seems, made two identifiable errors over the last few moves, and presumably in time trouble. On move 35, his position went from tenable to worse, and then at move 40 it went from worse to losing. White's play is still far from straightforward, and Svidler has to show some imaginative and well thought-out ideas to secure the win.]

41.Re1+ Aiming to forcing Black to block the rook. **41...Kd7**

[If 41...Kf7 , Svidler gives 42.a4! Bd6 43.Ra1 Bc7 44.Rd1]

[Svidler does not give 41...Kd8 in his notes, implying that there are several strong alternatives. The pawn on f6 is a strong asset, and the pawn on f7 is potentially weak. Maybe Svidler would have tried something like

A) The natural 42.f7+ Kd7 43.Rf1 appears at first to be a dead end, but there are zugzwang possibilities with Rf6 and king manoeuvres. This seems overcomplicated. *(43.--)*;

B) 42.Bf4 , followed by Kg5. If Black tries 42...Rh5 , only then 43.f7 Rh8 *(43...Rf5? 44.Re8+)* 44.Re8+ .]

42.a4! It is generally best to attack two weaknesses, rather than one. This pawn push starts to attack on the queenside. If Black ignores the pawns, White will exchange on b5, and then attack the pawns with Re5. Breaking black's pawns chain, Svidler gets additional targets for his rook. **42...bxa4**

[After 42...Bd6 , to cover Re5, Svidler gives 43.Ra1 Bc7 44.Rd1+ Ke6 45.Re1+ Kd7 *(45...Kf7 46.Re7+ Kg8 47.Re6* , and the rook breaks through *)* 46.Bc1 , transposing into the winning line he gives with 41...Kf7. Again, note the way in which the switching around with the rook, adding pressure on several different

files, makes it difficult for Black to defend.]
[42...b4? 43.Re4 wins a pawn for White without difficulty.]
43.Re5 When picking up pawns, he needs to keep the rook behind Black's pawns.
[43.Re4? a3 is only equal.]
43...c5
[43...a3? 44.bxa3 Bxa3? 45.Rxa5 Bd6 46.Ra7+ Bc7 47.Bf4 is a White win.]
44.Bf4 '!' Svidler is setting up a zugzwang. **44...Rh8**
[The bishop cannot move. If 44...Bd6?? 45.Rd5 ;]
[while if 44...Bh6 45.Bxh6 Rxh6 46.Rxc5 , and White chews up all Black's queenside pawns.]
[Otherwise: 44...Kd8 (other king moves allow Re8) 45.Kg5 Bh6+ 46.Kxg6 Bxf4 47.Kxh7 Bxe5 48.f7 Bd6 49.Kg8 , and the h-pawn eventually decides.]
[44...Rf7 45.Kg5 , winning the g-pawn, and again promoting his h-pawn.]
[44...Rh5 45.Rxh5 gxh5+ 46.Kxh5 Ke6 47.Kg6 , again winning.]
[44...a3 45.bxa3 drops a pawn for nothing, so the text move is the only way to try to hold.]
45.Bg3! Again keeping the zugzwang squeeze; Black is actually in zugzwang.
[since 45.Kg5? Bh6+ is too early.]
45...Bh6
[If 45...Rh7 , then White takes a more direct approach with 46.Kg5 Bd6 47.f7 Bxe5 *(White has a simple king and pawn win after 47...Rxf7 48.Rd5 Rf5+ 49.Rxf5 gxf5 50.Bxd6 Kxd6 51.Kxf5)* 48.f8Q Bxg3 49.Kxg6 Rxh4 50.Qf5+ , and Black will lose the rook or bishop: for example, Kd6 51.Qg5 Be1 52.Qd8+ Kc6 53.Qe8+ .]
46.Re7+
[46.Rxc5 also looks good, the tactical idea being that after There are, however, a few loose ends after
A) 46...Bc1 47.Rc7+ Ke6 48.Re7+ Kxf6 49.Re1 Bd2 50.Be5+ Ke6 51.Re2 White wins a piece. *(51.--)*;
B) 46...Rf8 , and Svidler, after much calculation, finds a clearer win.]
46...Kc6
[46...Kd8 47.Bc7+ Kc8 48.Bxa5 continues the winning squeeze.]
47.Bf4 '!' With a study-like win. While enjoying the finish, do not overlook the way in which White has made a reverse manoeuvre with Bg5-f4-g3, just before the next bishop return. This move involves a rook sacrifice by White.
[The more natural alternative, with 47.f7? , forces the win of Black's rook, but this turns out to be only a draw. Svidler gives Rf8 48.Be5 Kd5 49.h5 gxh5+ 50.Kxh5 Bc1 51.Bg7 Rxf7 52.Rxf7 Bxb2 53.Ra7 a3 54.Rxa5 Ke4 . Black can hold this, White's king being so far away from the battle on the queenside. Then if 55.Bf8 *(or 55.Kg4 Kd3 56.Kf3 Kc2 57.Ke4 Kb3 58.Kd5 a2 59.Rxa2 Kxa2 60.Kxc4* , and again it is a draw*)* 55...Kd3 56.Bxc5 Kxc3 57.Bxa3 Bxa3 (otherwise Kb3) 58.Rxa3+ Kb2 , and Black is in ample time to hold the draw.]
47...Bxf4
[47...Bf8 48.Re8 Kd7 49.f7 wins for White.]
48.Kxf4 Rh5 The sharpest defence.
[After 48...Rxh4+ Svidler gives

A) 49.Ke5 Rh5+ *(49...Rh2 50.f7 Re2+ 51.Kf6 Rf2+ 52.Kg7 a3 53.bxa3 Kb5 54.Re4)* 50.Ke6 Rh2 51.f7 Re2+ *(51...Rxb2 52.Rc7+! B) 49.Kg5+- is also good]

49.Re5 '!!' The star move;

[whereas 49.f7?! Rf5+ only draws.]

49...Rxh4+

[49...Rxe5 50.Kxe5 Kd7 51.Kd5 wins for White.]

50.Kg5! Of course, this is an old winning idea, but it is attractive to see it in new and realistic settings. **50...Rh5+** He might just as well. **51.Kxg6** '!' Giving up the rook, but Black cannot prevent the pawn from queening. **51...Rxe5 52.f7** '?!' Black has covered both the f5 and e8 defending squares. Black can't stop the pawn, but white still has to be precise in the forthcoming queen vs rook endgame. **52...Re6+** repeats. Starting the Saavedra manoeuvre. (See the next game fragment.) **53.Kg5** He needs to cover the f6-square.

[Not 53.Kg7?? Re7 , pinning the pawn when Black wins the king and pawn ending.]

53...Re5+ He must give checks. **54.Kg4**

[Not though 54.Kf6?? Re2 55.f8Q Rf2+ . The f-file has been mined.]

54...Re4+ Again, the check. **55.Kg3** '!'

[More accurate than 55.Kf3? , when White still has to prove he can win after Re1 56.Kf2 Rb1 57.f8Q Rxb2+ and ...a3!.]

55...Re3+ He gives another check.

[55...a3 56.f8Q a2! sets up a crafty drawing trap, as Svidler points out, *(56...axb2* is the right idea, but the tactics are wrong; White wins instantly with *57.Qa8+)*

A) with 57.Qa8+? Kb5 58.Qb7+ Ka4 59.Qxe4 , a queen up, and now Kb3!! *(* but not *59...a1Q?? 60.Qxc4#)* 60.Qe1 Kxb2 , and it's only a draw.;

B) So how is White going to win? He needs to be able to manoeuvre the queen to a4, and the only way of doing this is to check with the queen on d7. That being established, Svidler's idea is 57.Qc8+! Kb6 58.Qd8+ Kb5 *(58...Ka6 59.Qd6+* followed by Qd7+ *)* 59.Qd7+ Kb6 60.Qa4 , job done.]

56.Kf2 Time for the king to enter the f-file. **56...a3!** Black's last chance. **57.f8Q** '!'

58...Kb5! Topalov sets up a final stalemate trap. The last chance is stalemate! **59.Qb7+**

[59.Kxe3 Ka4 60.Qb8 Ka3 transposes.]

59...Ka4 60.Kxe3

[60.Qxb2?? Rf3+= , with an instant draw, is not difficult to see.]

60...Ka3 61.Qb5 '!'

[61.Qb6! , hitting the c5-pawn, also works;]

[but not 61.Kd2?? a4! 62.Kc2 b1Q+ with stalemate.]

61...a4

[If 61...Ka2

A) 62.Qa4+ Kb1 , White has the choice between immediate stalemate with 63.Kd2?? (or an almost immediate checkmate with *63.Ke2 Kc1 64.Qd1#* .);

B) 62.Qxa5+ also wins, but there is another stalemate try in 62...Kb3!? 63.Qxc5 b1Q 64.Qb5+?? (instead, the careful *64.Qb4+ Kc2 65.Qxb1+ Kxb1 66.Kd4* wins) 64...Kxc3!]

62.Qxc5+ It's almost over now.

[If White has avoided the stalemate traps in the last few moves, he is unlikely to fall for any traps now, such as 62.Kd2?? b1Q .]

62...Kb3 63.Qb4+ Kc2 64.Qxa4+ Kxc3

[If 64...Kc1 , then the simplest of many simple lines is 65.Qxc4 b1Q 66.Qf1+ .]

65...Kc2

[65...Kb3 66.Qb5+ Kc3 67.Ke2 avoids the stalemate.]

66.Qf5+ He must keep checking, otherwise the pawn queens. **66...Kc1** After **67.Qf1+** Perfect endgame technique by Svidler! **67...Kc2** **68.Qxc4+** , it is time for Black to resign.

11.Bb1 Bb5 12.Re1

[In general, it is not a good idea for the player with the space advantage to trade pieces. 12...Bxe2 13.Rxe2 Black has got rid of his passive light-squared bishop, but White is still better thanks to his pair of bishops and space advantage.

13...Be7N Novelty, which does not seem to impact the evaluation of this variation.

12...Bg4 13.Ng5 cxd4 14.Qb3 e6 15.exd4 White has played the opening phase with great aggression, but such an approach is not without its risks. Black's position retains great dynamic potential, and over the next few moves, "Nepo" is able to wrest the initiative.
[15.cxd4?? would of course be most unfortunate after Qa5+]
15...Rd7
[Another way of meeting the threat to the b-pawn was with 15...b6 which also seemed perfectly sound. 16.h6!? Bf6 17.Ne4 Be7 18.0-0 0-0 19.f3 Na5 20.Qc2 Bf5 21.Qe2 e5! when Black has excellent counterplay.]
16.Ne4 0-0 17.hxg6
[It was not easy to assess the position after the continuation 17.h6 Bh8 18.0-0 Bf5 but Black's game seems if anything easier to play - he has obvious counterplay pending with the move ...e5, while by contrast it is not so easy to see how White should develop his initiative.]
17...hxg6 18.Bg5 f6! 19.Be3 Na5 20.Qc2 b6 21.f3
[There is no way that White can affect easy control over the position anymore; for example 21.0-0 f5 22.Ng5 f4 23.Bc1 Qd8 also leads to

a situation where Black has excellent chances.]

21...Bf5 22.Rc1 Nc4! Obvious, but strong. **23.Bf2 Rc8 24.Qe2 e5 25.0-0**

[25.g4!? Be6 26.Nc5 bxc5 27.Bxc4 Bxc4 28.Qxc4+ Rf7 29.dxc5 e4 30.Kf1 also leads to something of a mess, but one where White seems to have the better of it.]

25...Rdd8 26.Bh4! By taking a stab at an Achilles heel in the black armour, White forces the rook into a passive position. **26...Rf8 27.g4 Be6 28.f4?!** Perhaps this move could be criticised for being too cavalier, but Svidler did not get to where he is without taking risks.

[28.Nc5 was the bail-out option. bxc5 29.Bxc4 Qf7 30.Bxe6 Qxe6 31.dxe5 fxe5 32.Rcd1 e4! and Black is absolutely fine.]

28...exf4 29.Nc5 Bf7 30.Ne6 Qd6 31.Nxf8 Bxf8 White has won the exchange, but the resulting position offers Black clear compensation. The white king is exposed, and the black knight has access to the e3-square, a potential source of great attacking influence. **32.Qh2 Qe6?** Up to this point Nepo had played a great game, but now he errs, perhaps decisively. In fact you could even argue this was the pivotal moment of the whole tournament, as Svidler was eventually to beat Nepo in the play-off, to yet again become Russian champion.

[I'm sure Kasparov, who was known for his liking for "Octopus" knights, would not have hesistated to play 32...Ne3! here 33.Rxf4 *(33.Qxf4 Nxf1* and Black is on top*)* 33...Bh6! *(33...g5? 34.Bg3* and the weakness of the h7 square proves crucial*)* 34.Re4 Qxh2+ 35.Kxh2 Bd5 and Black regains the exchange 36.g5 Bxe4 37.Bxe4 fxg5 38.Bg3 Kf7! and although the game is still quite likely to end in a draw, White will have to suffer a while, given the obvious activity of Black's remaining forces.]

33.Qxf4 Now, by contrast, White is well on top. **33...Bd6?**

1.e4 Roiz,M Roiz,M Roiz,M: 'Roiz, Michael Roiz,Michael: 'Roiz,M'' **1...e5 2.Nf3 Nc6 3.Bb5 a6 4.Ba4 Nf6 5.0-0 Be7 6.Re1 b5 7.Bb3 0-0 8.a4 b4 9.d3**
[The more aggressive 9.d4 has also been employed by Peter.]
9...d6 10.a5 This advance makes the b4-pawn much more vulnerable. **10...Rb8** Alexander is assuming White will push c2-c3, so Black is taking control over the b-file in advance.
[10...Be6 11.Bxe6 fxe6 12.Nbd2 frequently transposes to the text.]
11.Nbd2 Be6 12.Bxe6 fxe6 This change of pawn structure is always double-edged: opening the f-file favours Black, but the doubled e-pawns might cause him some problems in the long run. **13.c3** White hardly can claim any superiority without advancing the d-pawn.
[The other way of preparing the thematic d3-d4 break: 13.Nb3 led to a complex strategic struggle in the following top-level game: Qc8 14.Qe2 Nd8 15.d4 exd4 16.Nbxd4 c5 17.Nb3 e5 18.Nbd2 Ne6 19.Nc4 Nd4 20.Nxd4 cxd4 21.Nb6 Qc6⇄ Caruana,F -Carlsen,M Saint Louis USA 2017]
13...Nd7
[After 13...Qe8 14.Nc4 Qg6 15.h3 Nd7 16.Be3 d5 17.Ncd2 bxc3 18.bxc3 Nc5 19.Bxc5 Bxc5 20.Qa4± Carlsen,M - Aronian,L Saint Louis USA 2017, Black was under strong pressure.]
14.Nb3N This natural move is a novelty.
[The previosuly played 14.Nc4 is inviting the freeing d6-d5 advance: d5 15.exd5 exd5 16.Ne3 Nc5⇄ Saltaev,M - Smagin,S Moscow 1995]
14...d5 This committal move seems the only way of activating the pieces.
[In the event of 14...Qe8 15.Be3 Qg6 16.Nbd2 Rb5 17.Qe2 bxc3 18.bxc3 Rfb8 19.Rec1± the control over the b-file wouldn't yield Black real counterplay.]
15.Be3 bxc3 16.bxc3 dxe4?! This exchange makes Black's setup more shaky: the c4-spot and the a6-pawn are very weak.
[After 16...Bd6! 17.Rb1 h6 18.Qc2 Qe7 19.h3 White's position looks somewhat better, but it's very hard to make any real progress.]
17.dxe4 Rb5?! This inaccurate move is inviting fresh troubles.
[A better one was 17...Nf6 18.Qc2 Ng4 19.h3 Nxe3 20.Rxe3 Rb5±]

18.Qe2 The queen is heading to c4.
[Possibly, an even stronger try was 18.Qd3!? Qc8 19.Red1 Ndb8 20.Qc4±]
18...Qb8
[The knight is untouchable: 18...Rxb3? 19.Qc4 Nxa5 20.Rxa5 Ra3 21.Rxa3 Bxa3 22.Ng5+-]
19.Qc4 Nd8 This move looks awkward, but this is the only way to avoid major loss of material. **20.Rad1?!** This move is actually a loss of tempo. Perhaps, Peter had underestimated Black's reply.
[A much better move was 20.Nbd2 Qb7 21.Reb1±]
20...Bd6!
[20...Nf6 is worse: 21.Nc5 Bxc5 22.Bxc5 Re8 23.Nxe5 Rxa5 24.Ra1±]
21.Rb1 Qb7?! Returning the favour.
[Alexander should have played 21...Qa8! 22.Red1 h6±]
22.Nbd2! The exchange of the powerful ♖b5 makes White's advantage bigger.
22...Qc6 23.Rxb5 axb5 24.Qb3± Now Black is mainly suffering from the powerful a-passer.
[24.Qa2!?]
24...Qa6 25.Ra1 Nc5 26.Qb1 Nf7
[26...Ndb7 27.h4 h6 28.h5±]
27.c4! Peter is aiming at opening files for his major pieces. **27...c6 28.cxb5 cxb5 29.Nb3** The knight isn't located so well now.
[A more precise move was 29.Qa2! Re8 30.h4 h6 31.g4± extending the initiative on both sides of the board.]
29...Nd7
[It made sense to lock the a-file: 29...Na4!? 30.Qf1 Qb7±]
30.Qd3 Rc8 31.h3 h6 32.Nfd2
[A more promising route for the knight seems to be 32.Ne1! Rc4 33.Nd2 Rc7 34.Nc2±]
32...Nb8 33.Nf3 b4 Alexander is reasonably deviating from repeating the moves.
[Another possibility was 33...Rc4!? 34.Ne1 Ra4±]
34.Qd1 Qb7 35.Nfd2 Rc3 Obviously, GM Onischuk's position has been improved - Black has managed to activate almost all of his pieces. **36.Nc1 Na6 37.Ne2?!** Once again, GM Svidler chooses a wrong location forr the knight.
[The correct way was 37.Na2! Rc6 *(37...Ra3? 38.Nc4+-)* 38.Rc1±]
37...Rc8?!
[A much better move was 37...Rc6! taking care of the weak e6-pawn: 38.Nb3 *(38.Qb3 Bc5=)* 38...Be7 39.Rc1 Nd6 and Black should be able to achieve a draw.]
38.Qb3 Qe7?! The continuation of a wrong strategy.
[Black's defensive task would be much easier had Alexander played 38...Bc5! 39.Qxe6 Bxe3 40.fxe3 Qc6 41.Qg4 Qc5±]
39.Rc1 Now Black is doomed to a passive defence again. **39...Rxc1+ 40.Nxc1** After the exchange of rooks the a5-pawn becomes more dangerous.
40...Bc5 41.Nd3
[It was better to avoid the doubled pawn by means of 41.Nf1! Bxe3 42.Nxe3±]
41...Bxe3 42.fxe3 Qd8 43.Nc4 Ng5? The decisive mistake.
[Once again, Alexander has missed a golden opportunity for activating all his pieces at the cost of a pawn: 43...Qe8! 44.Ndxe5 Nxe5 45.Nxe5 Kh7 46.Qc4 Qa4! 47.Qxe6 *(47.Qxa6 Qa1+ 48.Kf2 Qxe5=)* 47...Qxa5 48.Qg6+ Kg8 49.Qf7+

Kh7 50.Nd7 Qd8 51.e5 Kh8± Black would obtain excellent drawing chances.]

44.Nb6

[44.Nxb4! was even simpler: Qb8 45.Nb6 Nc5 46.Qc2 Ngxe4 47.Nc6 Qd6 48.a6! Qxc6 49.a7+-]

44...Nc7

[44...Kh7!? was worth considering, forcing White to find a couple of precise moves: 45.Qc2! *(45.Qc4? Nb8 46.h4 Nf7 47.Nxb4 Qd2=)* 45...h5 46.Nf2 b3 47.Qxb3 Qd2 48.Qd1 Qxd1+ 49.Nxd1 Nxe4 50.Nc4+- this endgame is winning for White, but the technical part is still not trivial.]

45.Qc4 b3 Alas, Alexander fails to put up much resistance.

[A much more stubborn line was 45...Kh7! 46.Na4! *(46.Kh2 Ne8! 47.Nxe5 Qd6 48.Qd4 Qxd4 49.exd4 Nxe4± and it isn't yet over.)* 46...Na8! and Black manages to liquidate the a5-pawn. Still after 47.Nac5 Qxa5 48.h4 Nb6 49.Qb3 Nf7 50.Qxe6 Qa7 51.h5 b3 52.Nxb3 Qd7 53.Qg6+ Kg8 54.Nbc5 Qd8 55.Qe6+- White should be able to convert his positional (and material) advantage into a full point.]

46.Qxb3 Nxe4 47.Qc2 Qg5

[47...Nd5 48.Qc8 Qxc8 49.Nxc8 Nxe3 50.a6+-]

48.Nc4!+- Now White is firmly in control.

48...Nd5 A desperate attempt to create some threats on the kingside.

[48...Ng3 49.Ndxe5 Qf6 50.Qf2+-]

49.a6! The most effective. **49...Nxe3 50.a7 Nxc2 51.a8Q+ Kh7 52.Qxe4+** White is a piece up, but the game goes on. **52...Qf5 53.Nd6!**

[After 53.Qxf5+ exf5 54.Ncxe5 Black's pawn structure would be improved.]

53...Qxe4 54.Nxe4 Kg6 55.g4 No activity for the opponent's monarch! The rest is just an agony. **55...Kf7 56.Nxe5+ Ke7 57.Kf2 Nb4 58.Kf3 Nd5 59.Ng6+ Kf7 60.Nf4 Nf6**

[Zvjaginsev is a very original player, who introduced the extraordinary 2.Na3 into high-level chess. Even his opponent played this in a couple of blitz games, but right now Svidler was eager to finally win a game and chooses a traditional approach.]

2...Nc6

[Even with Black we will yet see some orginal play by Vadim. An earlier example went 2...d6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 g6 6.Be3 Bg7 7.f3 a6 combines the Dragon and Najdorf (or Dragadorf- the name stems probably from aficionad S. 3.d4 cxd4 4.Nxd4 g6 5.Nc3 Bg7 6.Be3 Nf6 7.Bc4 The most principled follow-up. Developing simply f3 and ♕d2 like in a normal Dragon with 2...d6 would allow Black a swift d7-d5 thrust.

Perhaps strong players are growing tired of the heavily analysed Bg5.' A somewhat surprising choice from Kramnik's second. Peter has never played this move before. Possibly his choice is also based on the fact that St. Petersburg Grandmaster has never won a single tournament game against Sveshnikov Sicilian (according to MEGA 2005 database) and he just wanted to try new type of positions. However, it will turn out that this was an unispired decision. **7...Nxd5 8.exd5 Nb8** Fed: 'If Black intend s to play this move I suggest looking at some King's Indian type ideas.' This variation gained some popularity after Leko's win against Krasenkow in 2002. Later black players found ways to achieve the draw in a slightly worse endgame. Kramnik himself played such an endgame in 2003 versus Leko and achieved an easy draw. My impression is that the value of 20. ♗e2 was overestimated, partially because both Leko and Krasenkow considered it to be a very strong move. **20...Nb8** Fed: '!?' Russian Team Championship (7.1)
[David Cummings]

1.c4 Nf6 2.Nc3 e5 3.Nf3 Nc6 4.g3 Nd4 A major variation which has fallen somewhat out of the limelight in recent years. The moves featured at the Moscow Candidates tournament were:
[4...Bb4 and]
[4...d5]
5.Bg2 Nxf3+ 6.Bxf3 Bb4 The mainline. The alternative
[6...Bc5 has also been well covered on this site, see for example Bareev-Volkov, Gulko-Charbonneau and other games in the Archives.]
7.Qb3 White has tried several other approaches here, leading to quite different pawn structures (all game references can be found in the PGN Archives):
[7.0-0 0-0 8.d4 Bxc3 9.bxc3 Qe7 10.dxe5 Qxe5 11.Qd4 Gormally-Gretarsson]
[7.d4 Bxc3+ 8.bxc3 e4 9.Bg2 Jobava-Aronian]
[7.d3 0-0 8.0-0 Re8 9.Qb3 Ivanchuk-Aronian]
7...Bc5 8.0-0
[8.d3 0-0 9.Bg5 *(9.g4!?* is an enterprising idea which was tried in Williams-Van Kampen, in the Archives *)* 9...h6 10.Bxf6 Qxf6 11.Ne4 Qb6 12.Nxc5 Qxc5 13.Qc3 a5 14.0-0 is a typical (and rather sedate) setup, see Vitiugov-Grischuk,

also in the Archives]

8...0-0 9.Na4 In a 2008 game against the future World Champion, Svilder opted for quieter development with

[9.d3 h6 10.Bg2 c6 11.Bd2 Re8 12.h3 - see Svidler-Carlsen in the Archives]

9...Be7 In another 2016 game, Black tried

[9...Bd6!? 10.Rd1 *(10.c5!? Be7 11.d4* is a possible improvement*)* 10...Re8 11.d4 exd4 12.Rxd4 Be5 13.Rd1 Qe7 14.Nc3 h6 15.Nd5 Nxd5 16.cxd5 c5 17.Bd2 d6 18.Bc3 b6 and Black was fine in So,W (2773)-Tomashevsky,E (2728) Wijk aan Zee 2016 1/2-1/2 (39)]

10.d4 Svidler goes for the critical continuation involving a pawn sacrifice.

10...exd4 11.Rd1 c5 12.e3 dxe3 13.Bxe3 Qc7 14.Bf4 A novelty which attempts to improve on an earlier Sjugirov game which continued:

[14.Nc3 a6 15.Bg5 *(15.g4!? h6 16.h4 d6 17.g5 hxg5 18.hxg5 Nh7 19.Nd5 Qd8 20.Nb6 Rb8 21.Bxc5 Nxg5 22.Bg2 Bg4* which gives Black a lot of counterplay on the opened kingside, was played in the Amber blindfold game Aronian-Giri, analyzed in the Archives*)* 15...d6 16.Bxf6 Bxf6 17.Nd5 Qd8 18.Nb6 Rb8 19.Nxc8 Qxc8 20.Rxd6 b5 and Black has solved his opening problems, Khismatullin,D (2674)-Sjugirov,S (2641) Khanty-Mansiysk 2013 1/2-1/2 (40)]

14...d6 15.Nc3 a6 16.Rd2 White simply puts the maximum pressure on the d6-pawn **16...Rb8 17.Rad1 Be6?!** A bit too cooperative. The real test of White's concept is to defend the d6-pawn with

[17...Rd8 when presumably White would have played 18.g4!? and now play could continue h6 19.h4 Bxg4 20.Bxg4 Nxg4 21.Nd5 Qd7 22.Qg3 Nf6 23.Bxh6 Nh5 24.Nxe7+ Qxe7 25.Qg4 when White has some initiative, but the position is not completely clear.]

18.Rxd6!

[18.Bxd6?! Bxd6 19.Rxd6 b5 would have let Black off the hook]

18...Bxd6 19.Bxd6 Qa5 20.Bxb8 Rxb8 21.Nd5 Bxd5 22.cxd5 After a forcing sequence, White has carved out an advantage with the strong passed d-pawn and bishop vs knight scenario. **22...b5 23.d6** Before pushing this pawn, White could have further improved his position with

[23.Qe3! and now:

A) 23...Qb6 24.Rc1 c4 *(24...Rc8 25.b4* wins the c5-pawn*)* 25.Qxb6 Rxb6 26.b3 winning a pawn due to Black's back rank weakness;

B) 23...b4 24.d6 Re8 25.Qb3 and White is better placed than in the game as he controls the a2-g8 diagonal]

23...Qb6 24.Qe3 Re8 25.Qf4 Rd8 26.g4 Qb8 27.Bc6 Covering the e8-square. Instead

[27.g5? is answered by Ne8 picking up the d6-pawn]

27...h6

[27...Ne8?? now loses to 28.Bxe8 Rxe8 29.d7 Rd8 30.Qxb8 Rxb8 31.d8Q+ etc.]

28.h4 Qc8 Black has defended well, and this further clouds the issue **29.g5** White has to keep moving forwards, as after

[29.Bf3 Ne8 the d6-pawn starts to come under pressure]

29...Qxc6 30.gxf6 Qd7 31.fxg7 Qe6 32.h5?! The h-pawn is just weak here
[32.Kh2 keeps the king relatively safe, although White can only be slightly better after Kxg7]
32...c4
[32...Qh3 hits the h5-pawn and probably forces White to take a draw, for example with 33.Qxh6 Qg4+ 34.Kh2 Qh4+ 35.Kg2 Qg4+ etc.]
33.f3 Providing more cover for White's king **33...b4 34.Kf2 c3 35.Re1 Qd5?** A big mistake which spoils his earlier comeback
[35...Qh3 again maintains the balance 36.Qxh6 Qh2+ with a perpetual]
36.Re5 Forcing Black to accept a rook endgame a pawn down **36...Qd2+**
[36...Qd1 37.Qxh6 now wins as White's king can eventually escape the checks in this case]
37.Qxd2 cxd2 38.Rd5 White has excellent winning chances in this rook endgame **38...Kxg7 39.Ke3 Kf6 40.Kf4 Ke6 41.Rxd2 Kd7** The pawn endgame is lost for Black after
[41...Rxd6 42.Rxd6+ Kxd6 43.Kf5 Ke7 44.Ke5 with the opposition and several tempi in reserve]
42.Ke5 Rc8 43.f4 Rc5+ 44.Rd5 f6+
[44...Rc2 is answered by 45.Ra5]
45.Ke4 Rc2 46.Kf5 Rxb2 47.Ra5 Kxd6 48.Kxf6 White has traded the passed d-pawn for the f-pawn **48...b3**
[48...Rh2 is more tenacious]
49.axb3 Rxb3 50.Rxa6+ Kd7 51.f5 Rg3 52.Kf7 Black's king is on the wrong side of the passed f-pawn and ultimately can't stop it from queening **52...Rg5 53.f6 Rxh5 54.Ra7+ Kd6 55.Kg6 Rg5+ 56.Kxh6** White now soon reaches the well known Lucena position **56...Rg1 57.f7 Rf1 58.Kg7 Rg1+ 59.Kf8 Rb1 60.Ra6+ Kd5**
[60...Kd5 61.Kg7 Rg1+ 62.Rg6 and the pawn queens next]

Another problem for Black in Rublevsky's line. White's clever novelty gave him a small but stable advantage - however, Peter Svidler himself might have been surprised just how quickly this became decisive. **1.d4 d5 2.c4 dxc4 3.e4 e5 4.Nf3 exd4 5.Bxc4 Bb4+ 6.Bd2 Bxd2+ 7.Nbxd2 Qf6 8.Nb3 Nc6 9.e5 Qg6 10.Nbxd4 Nge7 11.e6**

11...Bxe6 12.Nxe6 fxe6 13.0-0 0-0
[White's order of moves gave Black a good chance to equalise by 13...Nd5!? 14.Bxd5 0-0-0 15.Bxe6+ Qxe6 16.Qc2 Kb8 and so on.]
14.Re1 This position would have been reached in the game Pashikian - Ris/EU-ch Rijeka 2010, if Black has taken on e6 with the bishop. **14...Kh8 15.Rxe6 Qg4 16.Qe2 Ng6**
[The blow 16...Rxf3 does not solve Black's problems completely: 17.Re4! Nd4! 18.Rxg4 Nxe2+ 19.Bxe2 Rff8 *(19...Rf6 20.Bf3±)* 20.Bf3 c6 21.Rd1 Rad8 22.Rgd4 and White keeps the initiative.]

17.h3 Qf5 18.Qe4!? A new continuation.

[In the game Komarov - Rublevsky/Vrnjachka Banja 1999, Black eventually held the position after 18.Bd3 Nf4 19.Bxf5 Nxe2+ 20.Rxe2 Rxf5 21.Rd1 Kg8 22.Rd7 Rc8! intending to neutralise White's rook on d7 with both ...Rf5-f7 and ...Nc6-b8]

18...Qh5

[18...Nf4!? was worth considering but White still kept a small advantage after 19.Qxf5 Rxf5 20.Re3±]

19.Qg4! Insisting on the queen exchange.

[The tricky 19.Ba6?! was well met by Rab8! and if 20.Bxb7? then Nd8!]

19...Qxg4 20.hxg4± Thanks to his strong bishop White keeps a small but stable advantage. Besides, Black's king is a bit uncomfortable. **20...Rf4?!** This active attempt possibly increases Black's problems.

[Something like 20...Rad8 was probably more reliable. As we'll see, exchanging a pair of rooks makes Black's king more vulnerable.]

21.Rae1!

[21.Bd5!? Nge7 22.Be4 was worth considering as well, but White prefers not to shift his bishop to the other diagonal, trying to put pressure on the opponent's K-side.]

21...Raf8 22.R6e4 Rxe4 23.Rxe4 Rf4 24.Re8+ Rf8 25.Re3 h6 26.g5 Nge7 27.Re6

[27.gxh6 gxh6 28.Re6 Kh7 29.b4 was also clearly better for White but he did not want to give Black more space for his king.]

27...Nf5 28.Bd5 Nd8 29.Re1 c6 30.Bb3 White has seriously increased his advantage. His pieces are dominating while his K-side play adds to Black's headaches. **30...Kh7**

[30...hxg5 31.Nxg5 wasn't easier for Black: Nd4 32.Bc4 and if b5 33.Rd1! c5 34.Bxb5! Nxb5 35.Rxd8! Rxd8 36.Nf7+ Kg8 37.Nxd8+-]

31.g6+! Spectacular and strong!

[32.Bc2! was the more precise follow-up: Kf6 33.Ne5 Nd4 34.Nd7+ Kf7 35.Nxf8 Nxc2 36.Rd1+- with a decisive advantage.]

32...Kh7 33.Nd7 Rh8 34.Bc2 g6 35.g4 Nd6 36.Re7+ However, White's initiative is still strong enough to obtain a big advantage. **36...N8f7 37.Ne5 Kg7 38.Nxf7**

38...Nxf7 39.Bb3 Rf8 40.Rxb7 Kf6 41.f4! Keeping Black's knight restricted.

41...g5

[41...Nd8!? was probably more tenacious: 42.Rd7!? *(42.Rxa7 Ne6 43.Bxe6 Kxe6 44.Ra4 Rd8⇄* would have given Black drawing chances in the rook ending.) 42...h5!?± , trying to exchange as many pawns as possible.]

11.Nd1?! It is always hard to evaluate such endgames from the French Defence, here it looks like Black had the opportunity to start hammering White's centre after the exchange of queens: **11...Qxd2+ 12.Kxd2 cxd4?!** It feels like White can start grinding out a small advantage now that the centre has become more stable.

[12...g5!? a typical way to create pressure against White's centre 13.c3 *(13.Nxg5 cxd4 14.Bf2 Rg8↑; 13.dxc5 gxf4 14.Bxf4 Bxc5* looks fine for Black as well*)* 13...g4 14.Ne1 cxd4! 15.cxd4 Nb6↑ White doesn't have b3 since the a3-pawn is hanging, and after ... ♘c4+ followed by a possible ...b4, I feel like Black obtains the initative.]

[16...f5!? followed by ...♘c5. With this move, Black loses the chance to play ...f6, but on the other hand White's expansion on the kingside loses force (g4 and f5), and Black secures an outpost on e4 17.Ke3 *(17.exf6 gxf6* followed by ...e5 is supposed to be good for Black *)* 17...Nc5∞]

[16...f6!? also came into consideration.]

17.b3 Bd7

[17...Bxa3 wouldn't lose the bishop, but with precise play, White achieves an advantage: 18.b4 threatening ♖b3 *(18.Bxb6 Rxb6 19.b4 a5 20.bxa5 Ra6 21.Rxb5 Rxa5! 22.Rxa5 Bb4+ 23.Ke2 Bxa5=)* 18...Nc4+! 19.Bxc4 *(19.Ke2 a5* most likely transposes to 19.♗xc4 *)* 19...bxc4 20.c3 a5 21.bxa5 Ra8! 22.Rb5 *(22.Bb6 f6!⇄)* 22...Ba6 23.Rb6 Be7 24.Ra1± and White maintains a good positional blockade, providing at least a small advantage and good prospects (after improving the knight's position to d4 most likely)]

18.Ra1± As the game goes, it becomes clearer that Black had to play actively either on the 12th move or on the 16th move. Now White slowly builds up pressure with a stabilised position. **18...Bc6 19.Be2 a5 20.h4 Nd7 21.Nd3!** Avoiding ... ♘c5. **21...b4** This may be helpful for White, who can now penetrate through the a-file. On the other hand, it is hard to give a much better advice for Black. Simply waiting looks bad as well.

[21...Rfc8 if Black plays a move like

this, then White may simply start pushing his kingside pawns with g4, or even play as in the game with ♗g4!? 22.g4± *(22.Bg4!?± threatening f5, trying to force ...g6)*]

22.axb4 axb4 23.Ra7 Bb5 24.Bg4!? Threatening f5.

24...g6 25.h5 Rfd8 26.hxg6 hxg6 27.Nf2 Justifying this whole ♗g4 idea followed by h5 and hxg6 - Svidler wants to create direct threats against the black king with ♘g4 at some point. **27...Bc5 28.Bxc5 Nxc5 29.Bf3!** Threatening ♘g4! **29...Ra8 30.Rc7 Rac8 31.Rxc8 Rxc8 32.Ra1**

32...Ba6 33.Ra5 Rc6 34.Ke3 Kf8 35.Ng4 Ke7 36.Kd4 Nd7 37.Ne3 White has reorganised his pieces in a good way; now it is time to think about concrete action. ♗xd5 is a threat suddenly, because after exd5 ♘xd5+ and ♘xb4, White wins many pawns.

38...exd5 39.Nxd5+ Kf8?!

[39...Ke6! 40.Nxb4 Bb7∞ an even better version than the game, with an active king (... ♔f5 may be a move soon)]

40.Nxb4 Rxc2? A very bad decision on the 40th move - the last one before the time control, so it is understandable that most likely Black was in deep time trouble.

[40...Rc8! remaining the piece up with complex play would have been much better 41.c4 Bb7 42.g3 Ke8∞ and it is not too easy for White to advance his pawns.]

41.Nxa6 Nxa6? Makes it all easier.

1.Nf3 Stamenkovic,Zoran **1...c5 2.g3 Nc6 3.Bg2 g6 4.c4** GM Peter Svidler has rich experience in various systems of the English Opening. This time he enters into a closed type of position.
4...Bg7 5.Nc3 d6 6.0-0 e5
[6...e6 is another common continuation.]
7.a3 Nge7 8.d3 0-0 9.Rb1 a5 10.Bg5
[The most popular line starts with 10.Ne1 Be6 11.Nc2 d5 12.cxd5 Nxd5 13.Ne3 Nde7 14.Nc4 and leads to an interesting position à la reversed Marocy, where White's active piece play compensates for a lack of space.]
10...f6 11.Bd2 Be6 12.Ne1 The knight is heading to d5, so Black shouldn't hesitate.
[Another way of preparing the b2-b4 advance isn't effective: 12.Na4 Rb8 13.b4?! axb4 14.axb4 cxb4 15.Bxb4 b5!∓ Plomp,G-Meulders,R (2285) Belgium 1995]

13...Nxd5 14.Qb3?! This ambitious move was connected with a blunder.
[After 14.Nc2 f5 15.Ne3 Nde7! Black should be able to neutralise White's play on the queenside. *(*A less precise try is *15...Nb6 16.b3 Rb8 17.Nc4 Nd7 18.Nb5 Ra8 19.e3±* Kramnik,V (2766)-Leko,P (2749) Monte Carlo 2007*)* For instance, 16.Na4 b6 17.b4 axb4 18.axb4 f4 19.Nc4 Rb8∓ Bedia,M (2164)-Zakhartsov,V (2534) Krasnodar 2004. [The most stubborn was 38.Qb5 , but after e3! 39.Rxa5 exf2+ 40.Kxf2 f5 41.Kf1 Qf7 Black would slowly develop a decisive attack.]
38...Rd3 39.Qc4 Qd7?! A loss of tempo. This inaccuracy makes Black's task tougher.

Kramnik plays 16...bxa5, which deviates from a game between Topalov and Carlsen in 2015 that was already analyzed by Max for Chess Publishing!
1.d4 Nf6 2.c4 e6 3.Nf3 d5 4.Nc3 c5 5.cxd5 Nxd5 6.e4 Nxc3 7.bxc3 cxd4 8.cxd4 Bb4+ 9.Bd2 Bxd2+ 10.Qxd2 0-0 11.Bc4 Nd7 12.0-0 b6 13.a4 Bb7 14.Bd3 Nf6 15.Rfe1 h6 16.a5 bxa5 Not yet a new move but the first time it was played between elite players. Probably there was something in the ...a6 line Carlsen chose that Kramnik didn't like.
[16...a6 Is the move played in the Topalov x Carlsen game, but some new games have been played since.

A) 17.Qb4 Was an interesting try but Black reacted in the correct way. b5 18.Nd2 Rc8 19.Nb3 Re8 20.f3 e5 21.Rad1 *(21.d5 Qe7=)* 21...Nd7! *(21...Qe7 22.Qxe7 Rxe7 23.dxe5 Nd7 24.f4 Rc3 25.Nd4 Nc5 26.Bb1 Rd7 27.f5 Rc4 28.Nf3±)* And it's not so clear that Black has enough compensation.*)* 22.Bf1 *(22.d5 Qg5=)* 22...Qg5= 0-1 (54) Esipenko,A (2502)-Schroeder,J (2543) Moscow RUS 2017;

B) 17.axb6 Qxb6

B1) 18.Ra5 Rac8 *(18...Rfc8!? Retaining the rook on a8 looks much more logical.; 18...Bc6* This pawn sacrifice gains the d5-square and probably holds. *19.e5 Nd5 20.Rb1 Qc7 21.Rxa6 Rxa6 22.Bxa6 Ne7⩱)* 19.h3 And Black hasn't completely equalised yet. 1/2-1/2 (55) Arsovic,G (2399)-Bodiroga,P (2322) Kragujevac 2016;

B2) 18.Rab1

B2a) 18...Qa7

B2a1) 19.Qa5!? This was Max's suggestion to explain why Magnus didn't play 18...Qa7 and it does look a bit annoying.

B2a11) 19...Rab8 20.Rb6 Rfc8 21.h3± And Black seems out of productive moves. *(21.Bxa6?? Bxe4∓)*;

B2a12) 19...Bc6 Is a radical, computer, way to try to solve the problems. 20.Rb6 Rfc8 21.h3 *(21.Rxa6?! Qb7* And Black gets good pressure on the White center. *22.d5 exd5 23.e5 Ne4 24.Nd4 Bd7=)* 21...Bb5 22.Bxb5 axb5 23.Qxb5 Rc2 24.Rb7 Qa2 25.Rb8+ Rxb8 26.Qxb8+ Kh7 27.Qf4! Kg8 28.Qe3± And White must be better even if computers think Black has enough compensation.;

B2a2) 19.Qf4 a5! 20.h4

B2a21) 20...a4! Push the passed pawn! 21.g4 Qb8! 22.Qxb8 *(22.e5?! Nd5 23.Qe4 g6 24.h5 Nb4 25.d5 Nxd3 26.Qxd3 Qa7 27.d6 g5∓)* 22...Rfxb8 23.g5 hxg5 24.hxg5 Nh5 Very close to equal.;

B2b) 18...Qc7

B2b1) 19.Ne5± This is Max's recommendation, and it gives White two options, to play with Qf4 and push on the kingside or to play with f3, Qe3 and Nc4 and put pressure on the other side.;

B2b2) 19.g4 Is a very aggressive try, but computers don't find it that

impressive. Nxg4 *(19...a5* Even just ignoring the advance seems ok for Black, but very scary. *20.g5 hxg5 21.Nxg5 Rfd8* Here there are a lot of moves for White and computers give equality for all of them, one possible continuation might be: *22.Qe3 Ng4!* A very nice resource, e5 won't come with tempo and the knight heads to h6 to block the h file. *23.Qh3 Nh6 24.d5 exd5 25.e5 Bc8 26.e6 fxe6 27.Qh5 e5 28.Qg6 e4 29.Qh7+ Kf8 30.Qh8+ Ng8 31.Nh7+ Kf7 32.Ng5+=)* 20.Rec1 Qe7 21.Qf4 f5! B2b32) 23.Qb6 Rc3 And Black already has some pressure, although still equal. 1/ 2-1/2 (97) Topalov,V (2803) - Carlsen,M (2834) London 2015]

[16...b5 Would be a dubious try as the a7-pawn is a concern forever. 17.a6! Bc6 18.Ne5±]

17.Rxa5

[17.Qxa5?! Qxa5 18.Rxa5 Rfc8= And Black has zero problems.]

17...Qc7 18.Qb4

[18.Rc1 Qd8 Here we can see one of the benefits of Black's approach to put the knight on f6, if White doesn't get in f3 he will have to endlessly defend the e4 pawn. 19.Re1 Qc7]

[18.Rc5!? Qe7 19.Qa5 Rfc8 20.Rxc8+ Bxc8 *(20...Rxc8!?* It's very important that this pawn sac is playable, since after ...Bxc8 White seems to have a small advantage. *21.Qxa7 Qb4 22.Qa1 Rc3 23.Qb1 Rb3 24.Qd1* Another pawn sac that computers like and assess as equal, but since Black doesn't have a clear way to regain the pawn maybe White has some small chances.*)* 21.Nd2 *(21.Ne5!?)* 21...Bb7 22.Rb1± 1/2-1/2 (52) Rotstein,A (2540) - Remling,C (2345) Germany 2004 *(22.f3!? [5...h6 seems rather meritless to me, though we saw it work in Lushenkov, M (2441)-Tregubov, P (2598)/Olginka RUS 2011/[Nigel Davies]. Black definitely has to have something

prepared against 6.d4 (in the game White played 6.0-0).]

6.d4 John Bartholomew: 'Now the tension in the center produces a great number of possibilities.'

7.exd4 It's visible that White doesn't lay claim to a big advantage here. The position is symmetrical. **7...cxd4** John Bartholomew: 'Nepomniachtchi follows a policy of utmost clarity by way of mass exchanges.'

[John Bartholomew: 'The accepted antidote to the 5.Be2 line is' 7...Be6 John Bartholomew: '. However, at the European Team Championships last month, Germany's Georg Meier was able to squeeze the full point from Fabiano Caruana after' is another serious theoretical option. 8.cxd5 *(* You might remember the exciting Kramnik-Grischuk clash in the Candidates this past May. No doubt Black should draw with perfect play, but he is facing a stereotypical "White is a GM and will play for 100+ moves to try and beat you" scenario. After Rfe8 15.Kf1 Rad8 16.Nxe6 Rxe6 17.Rxd8+ Nxd8 18.Rd1 Nc6 19.Rd5± Meier milked the bishop pair and fully capitalized on a subsequent mistake from Caruana. Meier, G (2659) -Caruana, F (2727)/ Porto Carras GRE 2011.]

[The forgotten 7...Be7 shouldn't be bad at all. I think it's psychologically tough for the second player to accept protracted symmetric play and almost zero possibilities for a result greater than half a point. Indeed, of 51 games Black has only won 3 from here, but White has only won 9! You get the picture. Here's one GM-level game where White managed something: 8.Be3 cxd4 9.Nxd4 Nxd4 10.Bxd4 dxc4 11.0-0 0-0 12.Bxc4 b6 13.Re1 Bb7 14.Qa4 Qc7 15.h3 Rfd8 16.Rad1± Rublevsky, S (2660)-Chuchelov, V (2533)/Eupen 1999.]

8.Nxd4 dxc4 John Bartholomew: 'Continuing to chop wood.' Nepomniachtchi chooses the line that leads to massive exchanges.

[It's also questionable whether White has anything against 8...Bc5 , e.g. 9.Nxc6 bxc6 10.cxd5 cxd5 . See the archives: Sulskis, S (2564)-Nabaty, T (2581)/Ravenna ITA 2011/[Nigel Davies].]

10...bxc6 11.Bxc4 In the long run White hopes to take advantage of Black's weaknesses on the queenside. **11...Bb4+ 12.Bd2 Bxd2+ 13.Kxd2** John Bartholomew: 'Black can all but force this endgame after 6.d4. Thus, the critical question: does White have an appreciable edge? Theoretically and practically, the answer is no. Black should draw, and I believe the draw is easier to come by than in the 7...Be6 line. White has a nominally better queenside structure, but can't really point to much else. Peter and Alex, who usually don't fight hard each other (number of draws in less than 25 moves), give a real fight this time! **1.e4** Tyomkin,D Tyomkin,D **1...c5 2.Nf3 Nc6 3.Bb5 g6 4.Bxc6 dxc6 5.d3 Bg7 6.h3 Nf6 7.Nc3 Nd7** This is one of the most popular plans for black in Rossolimo variation with early Bxc6 nowadays. **8.Be3 e5 9.Qd2** Oratovsky: Most of the players, including top GMs, play this automatically. Of course, this move looks very logical - white keeps the possibility for both 0-0 and 0-0-0 and threatens ♗h6, but since black has an option for long castle it doesn't seem for me the best way for white. It deserved serious attention

21.Qa4! Probably Grischuk overlooked this move. **21...Bxe2?!** 2nd mistake in a row. Alex trades his important light square bishop which is one of the strongest pieces of black.... 1.e4 This was the decisive game of the match. The score was even. **1...c5 2.Nf3 d6 3.d4 cxd4 4.Nxd4 Nf6 5.Nc3 a6 6.Be3** Peter has a wide experience in the Najdorf with 6.Be3, though in recent years he mostly employed 6.h3 and some side lines such as 6.Nb3. **6...e5 7.Nb3 Be6 8.f3 h5** A very common prophylactic approach. **9.Qd2 Nbd7 10.Nd5 Bxd5 11.exd5 g6 12.0-0-0**
[A similar idea is: 12.Be2!? Bg7 13.0-0-0 Leko,P (2690)-Vachier-Lagrave,M (2780) Batumi GEO 2018 [Roiz,M]]
12...Nb6 By making this move Black practically forces White to sacrifice the central pawn.
[Playable is also 12...Bg7 , as in Dominguez Perez,L (2758)-Giri, A (2769) Moscow RUS 2019 [Roiz, M]]
13.Kb1 Nbxd5 14.Bg5 Be7 The players entered a well-known theoretical position. Now White is at a crossroads. **15.g3** A relatively quiet choice.
[The more aggressive options are: 15.c4 0-1 (63) Inarkiev,E (2693)-Vachier Lagrave,M (2794) Baden Baden GER 2017 [Roiz,M]]

[15.Na5 Maghsoodloo,P (2649)-Kulaots,K (2542) Batumi GEO 2018 [Roiz,M]]

[and 15.Bd3 Vidit,S (2707)-Korobov,A (2678) Poikovsky RUS 2018 [Roiz,M]]

15...0-0?! I am not sure if GM Ivanchuk had this idea in mind or he just forget his analysis, but this is just too risky.

[The endgame that arises after 15...Nb6 16.Bxf6 Bxf6 17.Qxd6 looks acceptable for Black. For instance, Qxd6 *(Possibly, even more precise is 17...h4!? 18.g4 Na4 19.Bc4 Qxd6 20.Rxd6 Be7* , which was tested in some corr. games. In this case Black doesn't seem to face any problems at all as he takes control of the dark squares on the k-side.*)* 18.Rxd6 Bd8 19.Bh3 0-0 Black was close to full equality in Svetushkin,D - Baklan,V Montpellier 2015]

16.h4! Everything is ready for the thematic g3-g4 break. **16...Qc7** This natural move is a novelty.

[16...a5 17.a4 doesn't make much difference - White's king remains much safer Qc8 18.Bb5 Rd8 19.g4→ Ottesen,S - Odeeva,K ICCF email 2013]

[In the following corr game Black eventually held a draw, but it doesn't look like a real improvement: 16...Qc8 17.g4 hxg4 18.fxg4 Qxg4 19.Bd3 Rac8 20.Rdg1 Qb4 21.Qg2↑ Kopelevich,A - Muukkonen,K ICCF email 2014]

17.Bd3

[More energetic was 17.g4! Nf4 *(*After *17...hxg4 18.h5 Nxh5 19.fxg4* White's attack is decisive.*)* 18.Bxf4 exf4 19.Qxf4 Rfe8 20.Bd3↑ As usual, the opposite-colour bishops suit the attacking side.]

17...a5 Giving up control of b5 wasn't justified in the game.

[Correct was 17...Nb6! , and now 18.g4 isn't so strong as before in view of d5! 19.Bxf6 Bxf6 20.gxh5 e4 21.fxe4 dxe4 22.Bxe4 Nc4⇄ with mutual chances.]

18.a4 Nb4?! The knight is actually misplaced now.

[More to the point was: 18...Nb6 19.g4 d5 20.Bb5 Nc4 21.Qe2 A complex struggle is ahead, though White's chances are preferable.]

19.Bb5 Now White's setup is very stable.

19...d5 20.c3 Nc6 21.Bxf6?! Peter decides to regain the pawn and maintain all his plusses.

[However, stronger was 21.g4! , and Black's position seems very dicey. For instance, Na7 22.Bd3 b5 23.Bxf6 Bxf6 24.gxh5 with a powerful attack.]

21...Bxf6 22.Qxd5 Rad8 23.Qe4 Peter has a stable positional advantage, but his attack is slower. **23...Kg7 24.Rdg1**

[Deserving of serious attention is 24.Rxd8!? Nxd8 25.g4 hxg4 26.fxg4 Ne6 27.g5 Be7 28.Re1±]

24...Rh8 25.Ka2?! For some reason, GM Svidler decides to delay the thematic break on the k-side.

[More consistent was 25.g4! Be7 *(*Too dangerous is *25...hxg4?! 26.h5 Rxh5 27.Rxh5 gxh5 28.fxg4 h4 29.g5→)* 26.Bc4 , maintaining the pressure.]

25...Ne7 Black managed to secure his king, so his problems are solved. **26.g4 hxg4 27.Rxg4?!** A risky decision - White's pawn structure on the k-side is damaged.

[After 27.Qxg4 Kf8 28.h5 gxh5 29.Rxh5 Rg8 30.Qc4 Qxc4 31.Rxg8+ Kxg8 32.Bxc4 b6= the game would most likely end in a draw.]

27...Rh5! Black takes over the initiative.

28.Qc4 Qb6 This move demonstrates Vassily's aggressive mood.

[However, correct was 28...Qxc4 29.Rxc4 b6∓ In this endgame White has no compensation for his inferior pawn structure.]

29.f4 Peter reasonable decides to get rid of the f-pawn.

[Another sensible idea was 29.Qc5!? liquidating to a favorable endgame.]

29...Nf5

[The approximate balance would also have been kept after 29...exf4 30.Qxf4 Nd5 31.Qf3=]

30.fxe5 Bxe5 31.Rg5! It's important to release the pressure on the Ph4.

31...Rdh8 32.Qd5 Bf6 33.Rxh5 Rxh5 34.Be2! Rxh4 After this move White's position seems relatively safe.

[Instead, GM Ivanchuk could have maintained the tension with 34...Ne3!? 35.Qd7 Rd5 36.Qh3 Qc6 37.Bb5 Rxb5 38.axb5 Qd5⩱]

35.Rxh4 Bxh4 36.Nxa5 Qf2

[A simpler way to equalize was 36...Ne3 37.Qd4+ Qxd4 38.cxd4 b6=]

37.Bc4 Ne3 38.Qxb7 White is a pawn up, but the activity of his pieces gives Black sufficient counterplay. **38...Nd1 39.Qb3 Qd2! 40.Kb1**

[40.Nc6 Bf6 41.Nd4 Nxc3+ 42.Qxc3 Qxd4 43.Qxd4 Bxd4 44.b4 f5 45.Kb3 Kf6 was also drawish.]

40...Bf6

[Possible was also 40...Nxb2 41.Qxb2 Qd1+ 42.Qc1 Qxa4=]

41.Qc2 Qe1? Black is playing with fire!

[He should have played 41...Bxc3! 42.Qxd2 Bxd2 43.Nc6 Ne3 44.Be2 Be1 45.a5 Nd5 46.a6 Bf2=]

42.Ka2 g5 43.Nb3 g4 44.a5? Peter returns the favor.

[Had he played 44.Qe2 Qxe2 45.Bxe2 Ne3 46.a5± it would be difficult for Black to save the game.]

44...g3 45.a6 Ne3 46.Qe4 This move invites interesting complications.

[After 46.Qe2 Qxe2 47.Bxe2 g2 48.a7 g1Q 49.a8Q Black should be able to find Bxc3! 50.bxc3 Qe1= , liquidating all the pawns.]

46...g2 47.Qb7 Nxc4?!

[In the unbalanced position that arises after 47...g1Q 48.Qxf7+ Kh6 49.Qxf6+ Qg6 Black doesn't risk anything, but White should be OK: 50.Qf8+ Kh5 51.Qh8+ Kg5 52.Qd8+ Qf6 53.Qg8+ Qg6 54.Qd8+=]

48.Qxg2+ Kh6 49.a7 Nb6 50.Qc6 Qe6 51.a8Q

1.e4 e6 2.d4 d5 3.Nd2 Nf6 4.e5 Nfd7 5.c3 c5 6.Bd3 Nc6 7.Ngf3 g6 This is one of the most typical replies to

White's setup. Black intends to fianchetto the bishop, which he will free later by playing ...f6. From g7 the bishop will then put intense pressure on White's centre. For that reason, White has generally turned away from quieter lines and moved towards taking the bull by the horns with the violent thrust 8.h4! However, for this game we'll examine what happens if White plays in more standard fashion. **8.0-0 Bg7 9.Re1**

[Even the clever 9.Bc2!? seems to pose Black few difficulties either.

It's interesting that in this line by playing normal moves, White seems to come under pressure. The key for Black is to play as actively as possible early in the game. Look out for moves like ...f6! ... e5! ... ♘g4! and ... ♘e4! And it seems that Black is not only fine, he can even push for a win. Which is why most top players have turned their attentions to 8. h4!

Ne5 14.h3 Bc8 15.Be2 with some pressure Svidler, P-Wei Yi, (fifth match game) Baku 2015.]

8...c5 9.d5 Bg4

[Facing this position (as Black!) a few years ago, Svidler preferred to retreat the whole way: 9...Bc8

A) 10.Be2 e6 11.Bg5 h6 12.Be3 exd5 13.exd5 Na6 Potkin, V-Nepomniachtchi, I Yaroslavl 2014. This definitely reminds one of the Prins Variation where the queen is odd on d3, but it could of course (if need be) drop back to d2 with a gain of tempo. Going further... *(*I suspect that *13...Bf5* is better than the 'natural' 13. ..Na6 e.g. *14.Qd2 Ne4 15.Nxe4 Bxe4=)* 14.Rd1 Ng4 15.Bf4 Bf5 16.Qd2 Nb4 17.0-0 turned out to favour White;

B) 10.Be3 b6 11.h3 e6 12.dxe6 Bxe6 13.Qxd8 Rxd8 14.Ng5 Nc6 15.Nxe6 fxe6 16.Bc4 Kf7 Jakovenko, D-Svidler, P Moscow rapid 2012, doesn't seem to inconvenience Black too much (bishop pair and less pawn islands for White, but Black's knights are fine steeds).]

[Going back to d7 may seem slightly odd (isn't it getting in the way?), but it worked well in the following: 9...Bd7 10.Be3 Qa5 11.Nd2 Na6 12.Be2 b5 13.0-0 c4 14.Qb1 Ng4 Omar, Noa-Safarli, E Baku 2014.]

10.Ng5

[10.Be3 Nbd7 11.Nd2 (Black has to be careful about getting his minor pieces tangled, but he correctly and courageously continued in this example with...) e6! 12.d6 *(12.h3 exd5! 13.exd5 Bf5)* 12...e5 13.Be2 Be6?! *(*I prefer *13...Bxe2 14.Qxe2 Qb6 15.Nc4 Qc6* with an acceptable game *)* 14.0-0 Ne8 (Black now lacks space) 15.Rfd1 Rc8 16.Nc4 Rc6 17.Rd2 Qb8 18.a4 Bxc4 19.Qxc4 Nxd6 20.Qa2 Vidit, S-Khusnutdinov, R Al-Ain 2015, with good compensation for the first player, as by winning the d-pawn Black has opened up lines for White's pieces.]

10...h6 11.h3 Bc8 12.Nf3 e6

Glenn Flear: 'Normally the addition of the moves h3 and ... h6 should be beneficial for White. However Black is quite active so Svidler makes the radical decision not to keep his d-pawn, as he must have judged it more 'isolated' than 'passed'!' **13.dxe6**

13...Bxe6 14.Be3 Qe7 15.Rd1 Nc6 16.Qd6 Glenn Flear: 'The idea is to leave Black with problems linked to the loose c-pawn.' **16...Qxd6 17.Rxd6** A typical Grunfeld position. Black has some problems with his c5 pawn at the moment, but he is definitely better developed than White. **17...c4**

[17...Na5 18.Bxc5 Rfc8 19.Be3 Rxc3! With strong counterplay.]

[Also plausible is 17...Nd7 when the most challenging reply is 18.Bb5 . Here there is more than one way to obtain a correct position: Nde5 *(18...Rfc8!? 19.Bxc6 Rxc6 20.Rxc6 bxc6* leaves Black with doubled pawns, but not for long... *21.Kd2 Rb8 22.b3 a5* and ... c4 is coming*)* 19.Bxc5 Nxf3+ 20.gxf3 Ne5 21.Be2 b6 22.Be3 Rfc8 with adequate activity as compensation.]

18.Rxe6 Glenn Flear: '!?' Glenn Flear: 'A dynamic exchange sacrifice.' An obvious exchange sacrifice. White does get enough compensation for the lost material, but it is unlikely that it is any more than that. **18...fxe6 19.Bxc4 Rfe8**

[19...Kf7!]

20.Nb5 Glenn Flear: 'White has a pawn and good pieces for the exchange. He also has a superior pawn structure and threats of invading on c7 or d6.' **20...Na5** Glenn Flear: '!' Glenn Flear: 'To deflect the annoying bishop.' **21.Bd3** Black has some issues since a7 is hanging and there is a fork that is being threatened on c7. **21...Rec8 22.Ke2 Nc4!?** The start of an unusual series of trades.

[Glenn Flear: 'The more conventional' 22...a6 Glenn Flear: 'would have been many a player's choice.' 23.Nd6 Rd8 24.e5 Nd7 25.Bxg6±]

23.Nxa7! Nxe3 Glenn Flear: 'Wei Yi gives back the exchange in order to obtain counterplay.' **24.Nxc8 Nxg2** Glenn Flear: 'The threat of ...Nf4+ is annoying, but Svidler finds a solution.' **25.Ne7+!**

[25.Rc1 Nf4+ 26.Ke3 Nxh3∓]

25...Kf7 26.Nxg6! A nice detail. Because the knight covers f4, it cannot be ignored. **26...Kxg6 27.Rg1 Rxa2**

[27...Nd7 28.Rxg2+ Kf7 was probably better, gunning for the b2 pawn and taking control of e5.]

28.Rxg2+ Kf7 Glenn Flear: 'White temporarily has an extra pawn, but b2 is doomed. The only way forward is to create threats before Black gets sorted.' **29.Ne5+** White emergest upa a pawn and retains winning chances. **29...Kf8**

[Better than 29...Kg8?! as White would then obtain pressure with 30.Bc4 Rxb2+ 31.Ke3 Rb6 32.f4 Kh7 33.Rd2]

30.Ng6+ Kf7 31.Nf4 Rxb2+

[Black could also try 31...b5 32.Kf3 *(*the immediate *32.Nxe6* would be met with the tricky *Nh5!)* 32...Rxb2 33.Nxe6! Kxe6 34.Rxg7 Nd7 with practical chances for the pawn.]

32.Ke3 Bf8 33.Bc4 Rb6 Black is just in time to defend his pawn, but even that endgame is unpleasant. **34.Nxe6** Glenn Flear: '!?'

[34.Rg6! is slightly awkward for Black who then needs a precise sequence to escape serious difficulties. Ba3! 35.e5 Bc1+ 36.Kf3 Nh7 37.Rxh6 Ng5+ and despite White's advantage being evident it may not be enough to win: 38.Kg4 Rb4!]

34...Rxe6 35.e5 Glenn Flear: '?!'

18...b4 19.Nd5!? The logical way to keep the initiative **19...exd5 20.exd5 Bd7** So what ? White has sacrificed a piece - probably more or less based on a general feeling - but there does not seem to be a clear way to continue the attack. White would like to play g5-g6, or build up a strong battery with ♕ and ♗ in the ⇗ a1-h8 to attack g7. However that is not so easy to achieve. 10.Ne4 We have a reversed King's Indian structure, where Black has extra space but where White will try to provoke weaknesses and counter-punch with a timely pawn break such as d3-d4, c2-c4 or a2-a4. Looking at the games in this line, it appears that Black should be comfortably placed as long as he is alert to the tactical possibilities. With 10 Ne4, Svidler continues to follow his Karjakin game, but doesn't get anything out of the opening. White has also played:

[10.c4 is the sharpest. bxc4 11.dxc4 and now:

A) 11...Nb6 12.b3 a5 *(12...Bb7* looks fully playable*)* 13.Bb2 a4 14.Ne5 Nxe5 15.Bxe5 Ra7 Markus,R (2604) -Kravtsiv,M (2576) Germany 2014 0-1 (45) and now 16.Qc2 leaves White a little better, with the b6-knight not well placed.;

10...Bb7 11.c3 White has also played:

[11.Bg5 A typical idea to provoke ...f7-f6. In the main game, Black could have prevented the bishop sortie, so White may as well play it immediately. Now f6 *(11...Nf6!?* could also be tried, since after *12.Bxf6 gxf6* it is unlikely that White can exploit the weakened kingside structure*)* 12.Bd2 e5 13.c3 when White has won two high-rated games from here, in both of which Black was OK but went wrong at key moments:

A) 13...Kh8 14.a4 b4 15.h4 h6 16.Be3 Nxe3 17.Rxe3 bxc3 18.bxc3 c4 *(18...f5 19.Ned2 Bf6* leaves White struggling to equalize *)* 19.d4 exd4 20.cxd4 f5?! 21.Nc3 f4 22.gxf4 Bf6 23.Rb1 and White was well on top in Van Wely,L (2612)-Xu,Y (2520) Ho Chi Minh City 2019 1-0 (44);

11...Rc8 Finally varying from the 2015 stem game. Instead:

1.d4 d5 2.c4 c6 3.Nc3 Nf6 4.e3 e6 5.Nf3 a6 The "improved Chebanenko" has recently become extremely popular. **6.c5 b6** This immediate undermining is the only way to eliminate the c5-pawn; otherwise White plays b2-b4 (although Black has another popular plan: ... ♘b8-d7, ...g7-g6, ... ♗f8-g7 etc. preparing ... e6-e5). **7.cxb6 Nbd7 8.Bd3 c5 9.b3**

[10...cxd4!? 11.Bxf8 dxc3 (otherwise Black just loses castling "for nothing") looks risky but needs checking. 29.Nxe6+ Qxe6 30.Qd4+ Qf6 31.Qxf6+ Kxf6 32.Rc7 Rb8± White's queenside pawn advantage is hardly sufficient for a victory in this endgame as his king is far away from the centre. **33.g4 h6 34.b4**

1.e4 Marin,M Mihail Marin **1...e5 2.Nf3 Nf6 3.Nxe5 d6 4.Nf3 Nxe4 5.d4 d5 6.Bd3 Bd6 7.0-0 0-0 8.c4 c6 9.Re1 Bf5 10.Qb3** Both players had some experience with this position. Black has achieved some activity in the centre, but faces some problems completing the development of his queenside. As it so often happens, developing the bishop earlier than the knight leaves the b7-square vulnerable. **10...Qd7**

[A relatively rare move, which from the point of view of the general rules of development might seem a bit paradoxical. Black moves his queen before developing the knight, blocking the d7-square at the same time. In doing so, he relies on the fact that White does not dispose over simple means of developing his initiative, partly because of the active placement of the black minor pieces in the centre. The more common continuation is 10...Na6 , indirectly defending the b7-pawn (11. ♕xb7 would be met by 11...

♘b4). However, in the long run the knight might remain passive on the edge of the board. Ivanchuk had his first contact with this position 14 years ago: 11.cxd5 *(* In a more recent game, Svidler preferred *11.Nc3 dxc4 12.Bxc4 Nxc3 13.bxc3 b5 14.Bf1 Nc7 15.Bg5 Qc8 16.Bh4 a5 17.Bg3 a4 18.Qb2 Bxg3 19.hxg3 Nd5 20.c4 bxc4 21.Bxc4* with easier play for White, who went on winning a long ending, Svidler-Morozevich, San Luis 2005. *)* 11...cxd5 12.Nc3 Bb4 13.Nxe4 dxe4 14.Bxe4 Bxe1 15.Bxf5 with interesting play in Anand-Ivanchuk, Amber-blind 1993. White has excellent compensation for the exchange, in view of his active pair of bishops and better coordination of forces. Apparently, Ivanchuk liked White's play in this game, since he later tried it himself. However, Black deviated with 12...Be6, when White retained a small plus with 13.Nb5, Ivanchuk-Shirov, Monte Carlo 2000.]

11.Nc3 Nxc3 12.Bxf5 Qxf5 13.Qxb7!?

[This is the first game in which White decides to capture this pawn, although the move has been suggested in some comments already. Earlier this year, Svidler failed to obtain any significant advantage after 13.bxc3 b6 14.cxd5 cxd5 15.Ba3 Bxa3 16.Qxa3 Nc6 17.h3 Qd7 18.Ne5 Nxe5 19.Rxe5 Rae8 20.Rae1 Re6 21.Rxe6 and a draw was agreed in Svidler-Kramnik, Wijk aan Zee 2007.]

13...Qd7 14.Qxd7 Nxd7 15.c5

[The series of intermediate moves continues. After the neutral 15.bxc3 dxc4 16.Nd2 Nb6 Black enjoys stability on light squares.]

15...Bxh2+!?

[An instructive moment. Black's central pawns are not weak, but could become so if any of the c5- or d4-squares would become available to the white minor pieces. The move played by Ivanchuk is the only one to avoid such a situation. For instance, if 15...Bxc5 16.dxc5 Ne4 then 17.Nd4 Ndxc5 18.f3 Nf6 19.Nxc6 with better chances for White.]

[Or, similarly, 15...Ne4 16.cxd6 Nxd6 17.Bf4 Ne4 18.Rac1 and Black will probably have to play ...c5 anyway.]

16.Nxh2 Ne4 17.Bf4 Rfe8 18.f3 Nef6 19.Nf1 Nf8 The position remains complicated. The pawn structure is rather assymetrical, while the force of the white bishop cannot be evaluated unilaterally. In principle, it puts some pressure on Black, but its activity is restricted by the own central pawns, which could transform it in a "bad" bishop in case of mass simplifications. Another important aspects is the hidden weakness of the c6- and d4-pawns. Neither of them is in imemdiate danger, but they need permanent care. **20.Rxe8 Rxe8 21.Rd1 Re7 22.Nd2 Ne6 23.Be5 a5 24.Nb3 Ra7 25.a4** Blocking the a5-pawn on a dark square, but ruining the flexibility of the own structure at the same time.

[The pawn structure arising after 25.Bxf6 gxf6 26.a4 f5 is not necessarily favourable for White, because of the excellent placement of the black knight and the relative weakness of the g3-square.]

25...Nh5 Untill now, Black has been defending. Once the queenside situation has been stabilized, he starts active operations on the other wing, where he has a mobile pawn majority. **26.Re1 h6**

27.Kf2 Nhf4 28.Re3 h5 29.g3 White prevents the blocking move ...h4, but weakens the f3-square. **29...Nh3+ 30.Ke1 g5 31.Nc1 g4 32.fxg4 hxg4 33.Rb3 Nhg5** Black's initiative has reached alarming heights. He only needs to approach with his king in order to create decisive threats. **34.Bb8!?**

[This was probably not intended as an active move (the bishop is not doing anything special on b8) but as a form of preserving it from the exchange operation ... ♘f3+xe5 followed by ... ♘xc5. White needs the c5-pawn in order to generate counterplay after the probable elimination of Black's c6-pawn. 34.Rb8+ Kh7 35.Nb3 would have solved thisproblem, but helped Black centralise his king at the same time. For instance Kg6 36.Rb6 Kf5 37.Rxc6 f6 38.Bd6 Rh7 and the situation of White's king looks dangerous. It might all end with a perpetual, but this is hard to foresee during the game.]

34...Rd7

[34...Re7 is worth considering.]

35.Ne2 Nf3+ 36.Kd1 Nfxd4 37.Nxd4 Nxd4 38.Rb6 Re7 For the time being, Black has managed to keep his c6-pawn on board, but the knight is stuck on d4, blocking the own d-pawn. **39.b4 axb4 40.a5 Re3 41.Rxb4 Nb5 42.Kd2 Re8 43.Rxg4+ Kh7 44.Bd6 d4 45.Bf4 Ra8 46.Rh4+ Kg7 47.Be5+ f6 48.Rg4+ Kf7 49.Rf4 Ke6 50.Bxd4 Nxd4 51.Rxd4 Rxa5 52.Rd6+ Ke5 53.Rxc6** Finally. **53...Ra3** Admittedly, even in Sofia they would call it a day.

Candidates Moscow (8.1) 20.03.2016
[David Cummings]

1.c4 Nf6 2.Nc3 e5 3.Nf3 Nc6 4.g3 Bb4 5.Bg2 0-0 6.0-0 e4 7.Ng5 Bxc3 8.bxc3 Re8 9.f3 e3 This was Karpov's reply when first faced with the 7 Ng5, 9 f3 variation in his match against Kasparov at Seville 1987. In recent years this has been less popular than

[9...exf3 which is covered in Caruana-Anand in this Update, and earlier games in the Archives]

10.d3

[10.dxe3 is an important alternative, when Qe7 is covered in Kasparov-Sadvakasov in the Archives, while *(10...h6* is analyzed in Conquest-Butnorius, also in the Archives *)*]

10...d5 11.Qa4 This move has only been played in correspondence games, but in quite a few! Svidler knew it was an interesting idea but Karjakin was prepared and played quickly. Alternatives are:

[11.Qb3 has been the main move, played in the stem Kasparov-Karpov game, and in several games in the PGN Archives. A brief overview of this line follows: Na5 12.Qa3 c6 13.cxd5 cxd5 14.f4 and now:

A) 14...Nc6 15.Rb1 Qc7 16.Bb2 Bg4 17.c4 *(17.Nf3 Qd7 18.Ba1* was Kasparov's planned improvement, although today's engines evaluate the position as close to equal.*)* 17...dxc4 18.Bxf6 gxf6 19.Ne4 Kg7 with chances for both sides, Kasparov, G (2740)-Karpov, A (2700) Seville 1987 0-1 (32);

B) 14...Bg4 this move came to be preferred over Karpov's original reply 14...Nc6, but it is not clear whether it really objectively better. Now White has two moves (all game references can be found in the PGN Archives):

B1) 15.Nf3 Nc6 16.h3 Bxf3 *(16...Bd7 17.Kh2 Qc7 18.Rb1 b6 19.Bb2 Rad8 20.c4 dxc4 21.Rbc1 Be6 22.Ng5* gave White the initiative in Elwert-Tiemann *)* 17.Rxf3 *(17.Bxf3 h5 18.Qc5 Rc8* was equal in Jensen-Soza*)* 17...d4 18.Bb2 Rc8 19.Rb1 a5 20.cxd4 Nb4 was Gulko-Korneev, and now 21.Rff1 would give White an edge;

B2) 15.Re1 h6 16.Nf3 Nc6 17.Rb1 Qd7 18.Bb2 Bh3 19.c4 Bxg2 20.Kxg2 d4 with balanced chances, was Schacher-Maki Uuro]

[11.cxd5 Nxd5 12.Qb3 Qxg5 13.f4 Qh5 14.Bxd5 Bg4 15.Bf3 Rab8 16.Rb1 h6 17.Qc4 a6 was roughly balanced in Grant, J (2275)-Timoscenko, G (2515) Pula 1997 0-1 (29)]

11...h6

[11...d4 has also been played, for example 12.Qc2 dxc3 13.Qxc3 Nd4 14.Re1 c5 15.Ne4 Nxe4 16.dxe4 Qf6 17.Bb2 Be6 18.Rac1 Rad8 19.f4 Qe7 20.Qxe3 Bf5 21.e5 Nc2 22.Rxc2 Bxc2 23.Bd5 with good compensation for the exchange, Tsenkov, L (2385)-Stolz, S (2220) email 2010 1-0 (58)]

12.cxd5 Nxd5 13.Ne4 f5 14.Nc5 f4

[14...Kh7 15.Bb2 Qd6 16.c4 Nf4

17.gxf4 Qxc5 18.d4 Qa5 19.Qb3 Bd7 20.Rfd1 Ne7 21.Qxe3 Nd5 22.Qd2 Qxd2 23.Rxd2 Nxf4 was close to equal in Papenin, N (2733)-Duliba, E (2538) ICCF email 2011 1/2-1/ 2 (44)]

15.Bb2 Rb8 16.c4?! An unfortunate novelty. Among other things, it blocks the queen's control of f4 and access to the kingside in general.

[16.Ne4 b5 17.Qc2 Qe7 18.a4 b4 19.Rab1 b3 with an unclear position, where at least White maintained a flexible pawn structure, Eldridge, M (2345)-Jimenez Ariza, J (2313) ICCF email 2013 1/2-1/2 (27)]

[16.Rab1 may be White's best chance of emerging with a slight advantage, for example b5 17.Qb3 Qd6 18.Ne4 with some initiative for White]

16...Nde7 17.g4 An extremely committal decision, incarcerating his own light-squared bishop. White was worried about the attack on his king, for example

[17.d4 was what White would want to play but Black has fxg3 *(17...Nf5* is also strong*)* 18.hxg3 Nf5 and now if 19.d5? *(19.Ne4 Nfxd4* and Black is much better*)* 19...Nxg3 20.Rfe1 Qh4 followed by ... Bh3, Black has a winning attack]

[17.Ne4 is an improvement, however, and after Nf5 18.gxf4 Nfd4 19.Rfe1 the position remains unclear]

17...b6

[17...h5? can now be answered by 18.d4 and White grabs the initiative as his king is relatively safe in this case]

18.Ne4

[18.Nb3 Bd7 19.c5 freeing White's queen, was worth considering]

18...Be6 19.g5?! This second mistake puts White in a perilous situation. Instead after

[19.Rab1 Nd4 20.Bxd4 Qxd4 21.Qxa7 Qd8 Black is only slightly better]

19...h5?! Black is still better after this move but

[19...hxg5! was more forcing, for example:

A) 20.Nxg5? Nf5! 21.Qxc6 or *(21.Nxe6 Rxe6 22.Bh3 Rg6+ 23.Kh1 Ng3+* wins *)* 21...Qxg5 when White's king has no escape;

B) 20.Qb5 Bf5 21.Nxg5 Nd4 22.Bxd4 Qxd4 and Black is in control]

20.Rfd1 Nd4 21.Bxd4 Qxd4 22.Qxa7 Qd7 23.Qa3 h4

[23...Nc6 quickly getting the knight to d4, is more to the point]

24.Qc3 Bf5 Instead:

[24...h3 can simply be answered by 25.Bf1]

[24...Nc6 is again Black's best]

25.h3?! Tempting Black to grab the h3-pawn, but objectively

[25.a4 was better, aiming for counterplay on the queenside. After Nc6 26.c5 Nd4 27.Bf1 White has managed to muddy the water, and may not even be worse now.]

25...Bxh3?

[25...Nc6 would leave Black on top. White's 25 h3 has just permanently imprisoned his own bishop! After 26.Qe1 going after the h4-pawn, Black has Nd4 27.Nc3 and now has the option of cashing in with Nc2 winning material]

26.Qe5! Suddenly White frees his position and is fully back in the game

26...Ng6 27.Qd5+

[27.Bxh3 Qxh3 28.Qxc7

and now Black may settle for a draw with Rxe4 29.Qxb8+ Kh7 followed by a perpetual check]

27...Be6 Or

[27...Qxd5 28.cxd5 Bf5 29.d6 cxd6 30.Nxd6 Re5 31.Kh2 with roughly balanced chances]

28.Qxd7 Bxd7 29.Kh2 Ra8 30.Bh3 Bxh3 White's bishop is no longer bad so Black decides to exchange it.

[30...Bc6 was also playable]

31.Kxh3 Ra3 32.Rdc1 After exchanges, we reach a double rook and knight endgame which is approximately equal **32...Rea8 33.Rc2 Kf7 34.d4 Rd8 35.d5 Ne5 36.Rb1 Kg6?!** Black goes wrong in the run-up to the time control. Instead

[36...Ra6 defending the b6-pawn, maintains the balance]

37.d6 cxd6 38.Rxb6 Now the d6-pawn falls because of the pin on the 6th rank **38...Kh5 39.Nxd6 Rda8?** A further error. Black should go for

[39...Nd7 for example 40.Rb5 Nc5 41.Rxc5 Rxd6 42.g6+ Kxg6 43.Kxh4 Rda6 with good drawing chances]

40.Rb5 Nc6 41.g6+!

[41.Nf5 R8a7 42.Rc1! is also very strong, with a sample line being Rxa2 43.Rg1 R2a5 44.g6 Rxb5 45.cxb5 Ne5 46.Nd6 Rd7 47.Ne4 and White should win]

41...Kxg6 42.Rc1! Kh7 43.Rg1 R3a7 44.Rg4 White is playing for a direct mating attack **44...Kg8 45.Rh5 Ne7 46.Rgxh4** Or

[46.c5 Rxa2 47.Rhg5 g6 48.Re5 R8a7 49.Rxf4 with a very strong attack]

46...Ng6 47.Rg4 Nf8 48.Rxf4?!

[48.Re5! was more convincing. Black can't take on a2 because of Rxa2 49.Re7 winning]

[48.Rgh4 is answered by Ng6 and White has to repeat moves with 49.Rg4 Nf8 etc.]

48...Rxa2 49.Rfh4? Dissipating most of White's advantage. Instead

[49.Nf5 threatening 50 Ne7#, keeps the attack going]

49...g6! Now the check on h8 doesn't lead anywhere and the e2-pawn is falling. After **50.Re5** White offered a draw which was accepted. White still stands a little better but it is no longer at all clear.

[50.Re5 Rxe2 51.Kg3 Raa2 52.Rh1 Rg2+ 53.Kh3 and White could still play on]

[Negi,Parimarjan]

1.e4 Ris,Robert Atalik,Suat **1...e5 2.Nf3 Nc6 3.Bb5 a6 4.Ba4 Nf6 5.0-0 Bc5!?** I am not sure if this can be called the Moller (5...b5 and 6... ♗c5), but it is a close cousin of those lines. Black's idea is to delay ...b5 so White isn't able to instantly reply with a4. This gives Black a few additional options - for instance the idea of entirely avoiding ... ♖b8 after a4, but at the least it also prevents, or reduces the impact of a few additional lines for White like the ♘xe5 lines. All that sounds good, but Black has to deal with additional options here for White as well, which is the reason why 5... ♗c5 hasn't really been in fashion of late. It is also probably the reason why Topalov

chose it here, and he successfully managed to bring Svidler out of book very quickly.

[5...b5 Atalik,Suat 6.Bb3 Bc5 7.a4!]

6.c3

[6.d4!? is another interesting, but very rare option for White to explore.]

6...b5 7.Bc2 But this is the extra option Black has to deal with compared to 5...b5, and 6...♗c5. At first sight, the bishop is naturally better placed on c2, and if Black just continues in the way of Moller, then White will have a better version. So instead, he ought to go for the forcing

15...Bxb5 Black's pawn structure is abysmal, but his activity more than makes up for it. **16.Na3 Rxd1+?!** Ris,Robert: 'Atalik,Suat: '?!'' Slight inaccuracies begin creeping into Topalov's game....it's always hard to start to focus right after your preparation ends. Black is still ok after this, but giving away the d-file makes White's play a lot easier.

[Ris,Robert: 'Black should have tried' 16...Bd3! would have been the simplest. 17.Bxe5 *(17.gxf3 Rhg8+ 18.Bg3 f5!* would win material*)* 17...Bxe4 18.Bxf6 Rxd1+ 19.Rxd1 Re8 Ris,Robert: '∓' '∓' Ris,Robert: 'and White still has to suffer an unpleasant ending. 18.Rd5 Rg8? A surprising mistake. Black should have tried to take fxg2 when he could. The pawn on f3 looks impressive, but he isn't active enough to hold on to it for too long...and in general a tripled pawn is never too nice to keep.

But it was already not that easy to make a decision:

[18...Bxa3 Atalik,Suat: '⩲' Ris,Robert: '⩲' would be definitely better than the game, but it's not entirely equal 19.bxa3 fxg2 20.Bxe5 fxe5 21.Rxe5 Atalik,Suat: ' ±' Ris,Robert: ' ±' with slight pressure.]

[18...Bd6 19.g3 the pawns are still a problem, although Black has more counterplay here.]

17...Bxd6 18.e5 Qc5 19.exd6 b6 Sam Collins: 'QUESTION: How would you play? ' **20.d7** Sam Collins: '!' Sam Collins: 'ANSWER: Really strong. It's easy to become worried about pushing such pawns in case they are surrounded and captured. However, the tactical features of a position often favour the pawn pusher. With the pawn on the seventh rank, the f8-rook can't move. The bishop on g6 can't challenge the pawn. Also, the black queenside is so weak that, even if Black arranges a challenge to the d7-pawn (as occurs in

the game), White is likely to collect a queenside pawn in return, leaving him with a better structure thanks to the potential outside passed pawn. ' **20...Rcd8 21.Qa4** After White's mini-combination, White is pressing thanks to his passed d7-pawn, although the position is still close to equal **21...Qc7 22.Nb5 Qc2 23.Qxc2 Bxc2** Sam Collins: 'Smeets has done well to organise an attack on d7, but his problems aren't over.' **24.Rd2**

36.a7 Ra8 37.Nxe7 Kxe7 38.Rc7+ This rook endgame is hopeless for Black as his rook is passive and his kingside pawns are not fast enough to create counterplay **38...Ke6** Sam Collins: 'QUESTION: A quip attributed to Tarrasch (or Tartakower!) is that all rook endings are drawn. How would you assess this one? ANSWER: White has a winning advantage, despite the equal material. The black rook is completely inactive (...Rd8 can be met, at a minimum, by Rb7 threatening Rb8 and forcing ...Ra8) while the white rook is fantastic on the seventh rank, protecting the a-pawn and attacking all the black kingside pawns. 9...e3!? The opening discussion is very interesting, as the advance of the e-pawn disrupts White's coordination and forces him into unusual solutions. The older solution with the exchange on f3 unleashes the potential of White's pieces and is more dangerous.

This curious pawn sacrifice (instead of the normal moves

Game 7 Baku (5.5) 25.09.2015

[Arnaudov]

1.d4 Nf6 2.c4 g6 3.Nc3 d5 4.Nf3 Bg7 5.Qb3 dxc4 6.Qxc4 0-0 7.e4 Be6 This provocative move became popular recently, mainly because of two great Black wins by Giri and Svidler back in 2012. Black's idea is to provoke d4-d5 and then to attack white's center with c7-c6 and e7-e6. **8.Qb5** Loyal to our concept, I will offer you a not so popular move, but Svidler's choice for White. When Peter plays something in Grunfeld regardless the colour, then this move should be consider seriously.

[8.d5 This is the most popular move, but it only supports Black's idea. Bc8

It seems that Black lost a tempo, but now c6 or e6 is coming. Then the maneuver Ne8-d6 gives Black a pleasant game. *(8...Bg4??* We are already familiar with this mistake. I will give you the following example to see how even 2600 players can blunder. *9.e5 Bxf3 10.exf6 exf6 11.gxf3* And despite the fact that the game was about 50+ moves, Black simply can resign here. 1-0 (59) Cori Tello,D (2413)-Muzychuk, A (2606) Istanbul 2012*)* 9.Be2 c6 10.0-0 cxd5 11.exd5 Nbd7 12.Rd1 Ne8 13.Bg5 h6 14.Bf4 Nd6 Black has a solid position. 0-1 (34) Andonovski,L (2274)-Safarli,E (2616) Eilat 2012]

8...Bd7 As usual, Black does not want to defend b7-pawn. **9.Qb3**

[9.Qc5!? b6 10.Qg5 c5 11.dxc5 Bc6 12.Qh4 bxc5 13.Be2 e6 14.Bg5 h6 15.Bxh6 Nxe4 16.Qf4 Nxc3 With an excellent position for Black. From this game starts the popularity of 7.î Pe6 0-1 (50) Morozevich,A (2770)-Giri,A (2696) Biel 2012]

[9.Qxb7? Such a move should not even cross our mind. Bc6 10.Qb3 Nxe4 and White should start to think about equality.]

9...c5

[9...Nc6]

10.d5 We have no choice now.

[10.dxc5!? Bc6 Is just very comfortable for Black.]

10...Qb6 After this White is simply better.

[10...b5 11.e5

A) 11...Ng4 12.Bf4

A1) 12...Qb6 This was tried recently. The threat is î ..:f2 followed by c4 13.Qc2 Bf5

A1a) 14.Bd3?! Bxd3 15.Qxd3 Nd7 16.Qe2 Qb8?! *(16...b4! 17.Na4 Qc7* Gives Black a good game.*)* 17.0-0 b4 18.Ne4 Ngxe5 19.Nxc5 Nxf3+ 20.Qxf3= 1/2 (70) Checa,N (2362)-Mikhalevski,V (2526) Rockville 2015;

A1b) 14.Qe2!N Black's pieces seem active, but there are not concrete threats and he will be attacked and doomed to a passive position soon. 14...f6 15.e6 All Black's pieces on the king side seem strange, Nd4 is coming. c4 16.Qd2± b4 is always well met by: 17.Nd1±;

A2) 12...Qc7 This move was offered in a late comment after Svidler's game, but there after: 13.Nxb5 Bxb5 14.Bxb5 Nxe5 15.0-0± White is simply better because of the better pawn structure and more active pieces.;

B) 11...c4 12.Qd1 Ng4 13.Bf4 Qb6 14.Qe2 b4 15.Nd1 With a clear advantage. 1-0 (36) Baron,T (2513)-Vucinic,G (2343) Skopje 2014]

11.Bc4 I like Svidler's approach, he first develops his pieces and then starts ta take some concrete actions.

[11.e5 This is first line of my engine, but there is no need to enter into some complications in a strategically better position. Ne8 12.Bf4]

11...Bg4 12.Be3 Nbd7

[12...Bxf3!? Maybe the best chance 13.gxf3 Nbd7 14.Qxb6 axb6 15.Bb5 White has a long-lasting advantage in the endgame.]

13.Nd2 Suddenly Black's bishop is in

trouble and White manages to develop his pieces perfectly. **13...Ne5 14.h3 Bc8 15.Be2±** White has an enormous advantage: f4-e5 is coming. Because the game was at rapid chess, we shouldn't judge very harsh the Russian grandmaster that somewhere in the game he even find himself in a difficult situation. The objective evaluation of the opening is that Black has big difficulties and he should try b5, which also not equalize but at least give some practical chances. I left the rest of the game without comments, because it is irrelevant for our topic. **15...e6 16.Qxb6 axb6 17.f4 Ned7 18.dxe6 fxe6 19.Bc4 Nb8 20.0-0 Nc6 21.e5 Ne8 22.a3 g5 23.fxg5 Nxe5 24.Be2 Nd6 25.g4 Bd7 26.Nce4 Nxe4 27.Nxe4 Bc6 28.Nf6+ Kh8 29.Bd2 Ng6 30.Bc3 e5 31.Kh2 h6 32.Nh5 hxg5 33.Bd3 Nh4 34.Nxg7 Nf3+ 35.Kg3 Kxg7 36.Bf5 Nd4 37.Rae1 Rae8 38.Re3 Rf7 39.Rfe1 Rxf5 40.gxf5 Nxf5+ 41.Kg4 Nxe3+ 42.Rxe3 Kf6 43.Re1 Bd7+ 44.Kg3 Bf5 45.h4 gxh4+ 46.Kxh4 Bd3 47.Kg4 Bf5+ 48.Kf3 Bd7 49.Rxe5 Rxe5**

Paul Keres memorial(100 years) rapid (8)
[Mikhalevski, V]

1.e4 e5 2.Nf3 Nc6 3.Bb5 a6 4.Ba4 Nf6 5.Qe2 Peter decided to avoid the forced lines of the Open variation. **5...b5 6.Bb3 Bc5** This is the line I recommended in my book "The Open Spanish" **7.c3 0-0 8.d3 Re8** As often happens one tends to forget the things one has written in the book. The idea behind this move is to strengthen the e5-pawn and prepare an advance of the d-pawn to d5. However, the move also has a drawback as the f7-pawn loses protection and so Black will have to take the Ng5 move into account after an exchange on d5.
[I forgot that I offered the immediate 8...d5 9.Bg5 dxe4 10.dxe4 h6 11.Bh4 Qd6 with equal chances.]
[I've already played 8...h6 in Smirin, I (2660)-Mikhalevski, V (2519)/ Beersheba 2014/ [Mikhalevski, V].]
[We also considered 8...d6 See Paehtz, T-Vladimirov, E/ Lausanne SUI 2001/ [Paul Motwani].]
9.h3 Peter makes a useful waiting move. One of his ideas is to provoke ...h6 and then start an offensive on the kingside as White hasn't yet castled.
[The immediate 9.Ng5 isn't dangerous for Black. Re7 *(9...d5!? 10.exd5 Na5!* is also interesting.*)* 10.Be3 Bxe3 11.fxe3 h6 12.Nf3 Na5 and Black was fine in Nevednichy, V (2574)-Erdos, V (2650)/Hungary 2014.]
9...Bb7 I wanted to wait for either short castles or Nbd2 before advancing my d-pawn to d5. This move turned out to be a novelty.
[The immediate 9...d5 is also good for Black. For example, 10.Bg5 dxe4 11.dxe4 Na5 *(11...h6! 12.Bh4 Qd6∓* is even more accurate.*)* 12.Bc2 Nc4 13.b3 and now Black's play in Mamedov, R (2638)-Bologan, V (2687)/Budva 2009 can be improved by means of Nd6!? when he is at least not worse.]
10.Nbd2 Bb6!? A useful move, which removes the bishop from a possible attack from White's knight after the ...d5 advance.
[I didn't like that after 10...d5!? 11.exd5 *(11.Nf1!?)* 11...Nxd5

(However, I missed the intermediate *11...Na5! 12.Bc2 Nxd5 13.Ne4 Bf8* and there is no pressure on f7 any more.) 12.Ne4 the bishop on c5 comes under attack and White may create some play on the kingside by means of 13.Nfg5.]

11.Nf1 d5 Now I didn't see anything wrong with the move. **12.Ng3 Na5!**

[12...Ne7!? in order to transfer the knight to g6 is an interesting alternative.]

13.Bc2 c5 A typical idea. Black gets rid of his backward pawn on c7 and grabs some space. **14.0-0 c4!** After the game I considered this move to be wrong, but in fact the mistake came on the following move. The idea behind the move is rather obvious- to undermine White's centre. **15.dxc4 Nxe4?** A serious mistake, which leads to a White edge.

[Instead I should have played 15...Nxc4! 16.Rd1 *(*or *16.exd5 e4! 17.Nd4 Nxd5∓)* 16...Qc7 17.a4 g6! with a slight edge for Black.]

16.Nxe4 dxe4 17.Ng5± Now the drawback of Black's 8th move becomes evident. White is threatening to play 18.Qh5 and so Black's next move is virtually forced. **17...h6 18.Rd1!**

[18.Nxe4 is less accurate as after Nxc4 19.Rd1?! Black has the option of Qh4!= , which is impossible after the immediate Rd1.]

18...Qc7 19.Nxe4 Qxc4!

[19...Nxc4? would be strongly met by 20.Nf6+! gxf6 *(20...Kh8 21.Nxe8+-* is just an extra exchange for White.*)* 21.Qg4+ Kh8 22.Qh4+- and White is winning.]

20.Qg4 Svidler is creating threats on the kingside.

[20.Qxc4!? is a good alternative. Nxc4 21.b3 Na5 22.Nd6 Red8 23.Ba3! *(23.b4!?* can be answered by *Bc7!* although White retains a big edge after *24.Nxb7 Nxb7 25.a4±)* 23...Bc6 24.Nf5!±]

20...Qe6 This move can be called a mistake as White's play after the exchange of queen is pretty simple.

[20...Re6! was better, avoiding the bad endgame of the game. 21.b3 Qc6 22.Ba3 Rg6 23.Qf5 Re8 and though White's advantage is beyond question Black has more practical chances to survive.]

22.hxg4 Red8 23.b4!?

[23.g5! was even more accurate, but also the move in the game is good enough. hxg5 24.Bxg5 f6 25.b4! Bc7 26.Nxb7 Nxb7 27.Be3 when we get the game position with weakened light squares.]

23...Bc7! The only move. **24.Nxb7 Nxb7**

[24...Rxd1+ 25.Bxd1 Nxb7 26.a4± is also clearly better for White.]

25.Be3

[25.a4!± looks more accurate.]

25...Rxd1+ I hoped to get some relief by means of exchanges, but it didn't help.

[I should have tried 25...Nd6 26.a4 Nc4 27.Be4 *(27.Bc5!?)* 27...Nxe3 28.fxe3 Rab8 29.Rxd8+ Bxd8 with some hopes for a successful defence.]

26.Rxd1 Rd8 27.Rxd8+ Bxd8 28.Kf1± White's bishop pair clearly dominates

here. Moreover, my queenside is weak.
[28.a4 Kf8 29.axb5 axb5 30.Bd3 Nd6 31.Bc5 Ke7 32.Bxb5 Bb6! seems to leave some hopes.]

RUS-chT 20th (7) 13.04.2013

[Gormally,Daniel]

1.d4 Nf6 2.c4 d6 3.Nc3 e5 4.Nf3 Nbd7 5.e4 g6 6.Be2 Bg7 7.0-0 0-0 8.Re1 h6 A line that has been essayed by McShane amongst others. Black's play is not as aggressive as in other King's Indian lines, but he remains solid nonetheless. **9.Rb1 Nh7 10.dxe5 dxe5 11.b4 Ng5** A logical continuation of his previous strategy, that is to create a clump of pawns on the kingside that will cramp White.

[In another game Black elected to advance on the kingside immediately: 11...f5 12.b5 Kh8 13.Ba3 Re8 14.Qc2 f4 15.c5 c6 16.Red1 Bf8 17.bxc6 bxc6 18.Qa4! was Del Rio de Angelis,S-Movsziszian,K La Roda 2009. And White's achievements on the queenside are significantly more telling than Black's rather slow advance on the kingside; he went on to win a few moves later.]

12.Nxg5 hxg5 13.c5 c6 14.Be3 f5!? Logical, but as it turns out, too weakening. Allowing your king to be denuded so early in the game isn't really advisable against someone with the aggressive intentions of Svidler. But in general I find it hard to believe that this variation will catch on for Black, as his opening position looks rather horrible in any case. The g5-pawn is an obvious target for White, and active play is hard to come by.

[Objectively Black already had to think about taking passive measures with 14...Bf6 but this is a hard decision to

bring yourself to make. In any case Black's task would remain unpleasant after 15.Qc1 Re8 at least with the plan of ... ♘f8-e6 etc.. 16.Rd1 Qe7 17.b5! but players like Jobava are loathe to adopt such a passive policy - this is why they are 2700. He would rather fall on his sword than fade away quietly.]

15.exf5 gxf5 16.Bc4+ Kh7 17.Qh5+ Bh6 18.Rbd1 Qe8 19.Qh3 Qg6 20.Bc1

[20.Rd6 Nf6 21.Bd2 was another way to play, immediately trying to hit on the pawns. In general Black's armada of pawns looks rather impressive, but they can also become weak and overextended, and whats more his king lacks long-term protection. e4 *(21...Re8? 22.Bf7! Qxf7 23.Bxg5* is a good example of the perils that can befall Black*)* 22.b5 the most direct route although this requires some courage - the queen looks vulnerable on h3, but in reality Black has no way of taking advantage of that, as his own position is too loose. *(22.Ne2* is another option, giving space for the queen on b3 for example, but probably not necessary*)* 22...f4 23.Be6 g4 24.Qh4 Kg7 with a seemingly very strong threat of ...♗g5, but the problem is that this runs into 25.Nxe4! when Black's position collapses like a pack of cards: Nxe4 26.Rxe4 Qxe4 27.Bc3+ Kh7 28.Qe7+ Kg6 29.Bf7+ Kh7 30.Bg6+ Kg8 31.Qh7#]

20...a5 21.Rd6 Rf6 22.Bd3?!

True to his style, Svidler is playing as directly as possible. Leaving the queenside to the winds, he is staking all on a direct mating attack. But for once Svidler, who greatly impressed with his play in the 2013 candidates, and dazzled even more with his press conferences afterwards, quoting incredibly complex variations and lines here there and everywhere, is let down by his calculation in this ultra-sharp position. Surely fatigue was weighing heavily on him at this point, as after the exhausting tournament that was London, he went straight to the Bundesliga, then on to this event.

[After the direct 22.Red1! Black would have faced an impossible task, trying to keep all the loose strands of his position together. Rxd6 *(22...Nf8 23.Rxf6 Qxf6 24.Rd6* just looks bad *Qg7 25.Bd3 e4 26.Nxe4 fxe4 27.Bxe4+ Kg8 28.Qxh6+-)* 23.Rxd6 Nf6 24.Na4! with the threat of ♘b6, is rather killing.]

22...axb4 23.Ne4 Rxd6 24.cxd6

[The alternative 24.Nxd6!? Is not as crushing as it looks at first sight. Nxc5 pretty much forced, *(24...e4 25.Nxe4* is disastrous*)* 25.Nxc8 g4! *(25...e4 26.Ne7 Qe6 27.Bc4! Qxe7 28.Qxf5++-; 25...Nxd3 26.Qxd3 Qe6 27.Nd6 e4 28.Nxe4 fxe4 29.Rxe4* rather favours white, as the black king remains exposed*)* 26.Qxh6+ Qxh6 27.Bxf5+ Qg6 28.Rxe5 Qxf5 29.Rxf5 Nd3 30.Be3 Rxc8 leading to an ending which is extremely difficult to evaluate, although my feeling is that Black's chances are no worse.]

24...Nf8 25.Nxg5+ Kg7 26.Qh4?

[Of course the computer crunches out 26.Rxe5!→ without a second thought. The attack works because the black king is too exposed. Bxg5 27.Bxg5 *(27.Bb2 Kf7 28.Bxf5 Bxf5 29.Rxf5+*

Ke8 30.f4 also leads to a very dangerous attack*)* 27...Qxg5 28.Re7+ Kg6 29.Qh8 Qf6 30.Qg8+ Kh6 31.h4! *(*The immediate *31.Rf7* is premature after *Qa1+ 32.Bf1 Be6* so White prepares this idea, so he will have mate on g5 at the end*)* 31...Be6 what else? 32.Rxe6 Nxe6 33.Qxa8 and White, a pawn to the good but a much safer king, must be winning.]

26...Qxd6 27.Bb2 Ra5! Now Black is in time to defend his weak points. **28.Bc4 Qd2??**

[28...Qf6 29.Rxe5 Rxe5 30.Bxe5 Qxe5 31.Qxh6+ Kxh6 32.Nf7+ Kg7 33.Nxe5 Be6 if anything rather favours Black, as his queenside clump is more dangerous than the trumps White holds on the other side of the board.]

29.Nf3! Ng6

[29...Qxb2 30.Qe7+ Kh8 31.Qf6+ Kh7 32.Qf7+ Bg7 33.Qh5+ Bh6 34.Ng5++-]

30.Nxd2?? A comedy of errors has appeared on the board. But it is easy to sit there with a computer program at home and critique - during the game you don't have that luxury.

[Doubtless though, a month ago Svidler would have found the winning line 30.Qh5! Qxb2 31.Nh4! in his sleep, but as indicated before, fatigue had no doubt kicked in. Nh8 32.Qe8! Regaining material, and winning.]

30...Nxh4 31.Rxe5 Rxe5 32.Bxe5+ Kh7 33.Nb3 Ng6 34.Bd4 Now the ending probably slightly favours Black, but Svidler was at least able to hold on for a draw - to lose such a game would have been quite an injustice!

34...Bg7 35.Bc5 Bf8 36.Bb6 Ne5 37.Be2 Be6 38.Bc7 Nd7 39.Bd3 Nc5 40.Nxc5 Bxc5 41.Bb1 Bd4 42.h4 Kg7 43.Kf1 b5 44.f3 c5 45.Ke2 Bc4+ 46.Kd2 Be6 47.Ke2 Bc4+ 48.Kd2 ½-½

At first blush, it looks promising for White, who is fully mobilised and centralised. However, now is where White has to face the limitations of his position. Without a light squared bishop, his attacking chances on the kingside are reduced, and he has to be much more careful about playing e5, due to the strength of the bishop on c6. Moreover, a pawn storm on the kingside doesn't look too promising, because it looks slow, there are no real targets there, and the bishop on g5 and knight on f3 do not seem to be suitably placed for this to work in white's favour. I used to think I would prefer to be White here, but now I think I would slightly prefer to be Black. Most GMs seem to play Kb1 here and for a while this didn't make much sense to me, but there does seem to be a hidden logic. White would like to move his queen(to d2 or d3) and play Nd4. This would free his f-pawn to go to f3 or f4, and attack the bishop on c6, which is Black's main asset. This idea of retreating the queen and playing Nd4 is the only idea with any significant sting, but it is not so easy to implement." **11.Kb1**

19...f5 This position was played three times by Anand in 2001. These days following the Indian GM seems to be the easiest and at the same time a very optimal approach of working on one's opening repertoire. **20.exf5N** Van Wely,Loek; Chuchelov,V: 'N!?' With this novelty Svidler is trying to bring new life into the entire variation.

[20.gxf4 Van Wely,Loek; Chuchelov,V: 'Ü 81/127' In all games Anand took on f4 with a complicated position, which would most likely end up into a difficult to asses endgame. Here is the latest game from that series of Anand: exf4 21.Nxf4 Bxa2 22.c4 fxe4 23.Qxe4 Qe8 24.Bf3 Qxe4 25.Bxe4 Rc8 26.Ne6 Re5 27.Bxc6 Rxc6 28.Nxf8 b4 29.Nc2 Bxc4 30.Nd4 Rc8 31.Nd7 Bxf1 32.Rxf1 Re4= Of course evaluating this endgame as equal sounds strange and rather wrong. Still, it means first of all that both sides have equal chances in this highly complicated and unclear endgame. [Vitiugov,Nikita]

They say that "great" grandmasters play "great" chess, which is something different to what thousands of amateurs all over the world are used to. "Great" games are decided by nuances, brilliant calculation and deep prophylactics. However, sometimes life isn't that complicated. This game cost me my participation in the World Cup, the tournament which takes place only once in 2 years, a very rare occasion for many strong players to fight for something bigger. [David Cummings]

1.c4 c5 2.Nf3 Nf6 3.Nc3 Nc6 4.g3 d5 5.cxd5 Nxd5 6.Bg2 g6 7.Ng5 In a mainstream position, Svidler essays a rare move which, as the game shows, was backed up by deep preparation. White has tried a number of other moves here:

[7.0-0 Bg7 8.Nxd5 Qxd5 9.d3 0-0 10.Be3 is the main line, which has a drawish reputation. See Nakamura-Caruana and other games in the PGN Archives.]

[7.Ne4 is a relatively new move introduced by Li Chao in 2015. After Qb6 8.0-0 Bg7 and now:

[7.h4 Bg7 8.h5 Bf5 9.Qb3 Ndb4 10.Kf1 is a line we have covered several time in the Archives. Black has done fine here, with the game references being:

[7.Qa4 Bg7 8.Ng5 e6 9.Nge4 is another line where Black has more than held his own, see So-Vachier Lagrave (and earlier games) in the Archives. If you compare this position with the main game, the queen looks better staying on d1 where Svidler left it.]

7...e6 The natural reply, putting the question to the g5-knight while defending his own d5-knight **8.d3 Bg7 9.Nge4** Already a novelty. A prior game saw:
[9.Bd2 0-0 10.0-0 b6 11.Nf3 but White has wasted time here and is no better, Wang, Y (2723) - Nepomniachtchi, I (2721) Beijing (blitz) 2013 1/2-1/2 (61)]

9...0-0 10.h4!? This aggressive thrust is the basis of Svidler's idea. **10...b6?!** This is a little slow and allows White to execute his idea with 11 h5. Instead the following lines are likely critical for the future of Svidler's novelty:
[10...f5 and now White can try 11.Bg5 *(11.Nxc5* sacrificing the exchange *Nxc3 12.bxc3 Bxc3+ 13.Bd2 Bxa1 14.Qxa1 Nd4 15.Qc3* with compensation*)* 11...Qa5 12.Nd2 Nxc3 13.bxc3 with chances for both sides]

[Sagar,Shah/CB Website]

1.c4 Sagar Shah/CB Website Sagar Shah/CB Website Sagar Shah/CB Website: 'Sagar,Shah/CB Website Sagar, Shah/CB Website: 'Sagar Shah/CB Website'' This was the third white game for Peter in the event. In the first one he opened with 1.e4, while against Aronian he went 1.c4. Today he repeats the English Opening. **1...c5 2.Nf3 Nf6 3.Nc3 Nc6 4.g3 d5 5.cxd5 Nxd5** Fabiano has had good success with black in this line, most notable being his win against Topalov from the 2014 Sinquefield Cup. **6.Bg2 g6 7.Ng5!?** This has been played in eight encounters before this game, with the top game being Wang Yue vs Ian Nepomniachtchi. But that was only a blitz.
[7.Ne4 was an interesting knight sortie tried in Li Chao vs Peter Leko.]

[12...fxg6 was necessary but to give the knight on e4 a permanent outpost is not something that Black would like to do voluntarily.]

13.Bh6 Nxc3 Here Svidler thought for 20 minutes, trying to understand whether he should take back with the pawn or the knight.

[24.Qg5 Qh5 25.Qxh5 gxh5 26.Rxb7 Nxe5 27.f4± was also another good position that White could have aimed for.]

24...Qh6+ 25.f4 Re8 26.Rxb7 Nxe5 27.Qh3 Qxh3 28.Bxh3± And there we have it. Svidler has a technically better – and you can even go to the extent of saying close to winning position. Illingworth, Max: 'The idea behind this move is to bring the queen to a6, clearing the way for ...Rd8 and potentially . ..c5 to liquidate White's centre.' Vladimir Kramnik employs the rather rare continuation. As usual, it was played after deep home preparation and came as a real surprise for Peter.

[The main alternatives here are: 7...c5]

[and 7...Nc6]

8.Nxc4 The most natural reply.

[The resulting position offers different interesting possibilities for both sides. For instance, White could have opted for 8.0-0!? Illingworth, Max: 'is a curious pawn sacrifice, it can be played but Black does not have trouble keeping the game in balance as White will need some time to regain the pawn:'

A) 8...Qa6 Illingworth, Max 9.a4! White's idea is to play Nb5 and thereby regain his pawn. Nc6 *(9...Nbd7 10.Nb5 Nxe5* transposes to the game.*)* 10.Nb5 *(10.Bf4* isn't a very inspiring option, as Black will be able to hang on to his extra pawn after *Na5 11.Nb5 Ne8 12.Qc2 c6 13.Na3 Nd6=* , with the point that if Rac1, ...Nb3 can be played.*)* 10...Nxe5 Illingworth, Max: 'transposes to the game.' 11.dxe5 Rd8 12.Qc2

(12.Bd2 is slower, and Black can use the time to activate his passive c8-bishop with *Ne8 13.Qc2 Bd7 14.Qxc4 Bc6!=* and Black has no problems. *)* 12...Nd5 13.Qxc4 c6 Since Black has less space, he should not hesitate to trade pieces. *(13...Bd7* gives White the time to set up a strategic bind with *14.b3 Qb6 15.Bd2 a6 16.Na3 Bc6 17.Rfc1±* when it is not easy for Black to find a liberating move.*)* 14.Nd6 Qxc4 15.Nxc4 b6 16.Bd2 Ba6 17.Rfc1 A draw was agreed in 1/2-1/2 (17) Efimenko, Z (2647)-Kravtsiv, M (2623) Lvov 2015, as the ending is absolutely fine for Black after the normal plan Rac8 18.b3 *(18.a5 Bxc4 19.Rxc4 b5 20.Rcc1 c5=* is quite pleasant for Black, who managed to mobilise his queenside pawns, while White's bishops are not doing very much at present. *)* 18...c5= and Black has no weaknesses in his structure.;

B) 8...Rd8 9.Bg5 *(9.e3* Illingworth, Max *Qa6 10.Qe2 c5 11.dxc5 Nbd7 12.Nxc4 Nxc5=* is also possible, although it seems slightly curious to provoke e3 like this. *)* 9...h6 *(9...c5!?)* 10.Bxf6 Bxf6 11.Ne4 Qxd4 12.Nxf6+ gxf6 13.Nxc4 with sufficient compensation for a pawn.]

8...Qa6 A very concrete approach - White has to waste a tempo on protecting the knight, while Black is ready to put pressure on White's centre along the d-file. **9.Qb3** Illingworth, Max: 'This is the most frequent and logical move, getting out of the way of ...Rd8 while developing.' After this move White is well prepared to meet the standard c7-c5 advance, but the vulnerablity of the ♙d4 offers Black more counterplay.

[After 9.Qa4 Illingworth, Max: 'is not dangerous for Black, as the endgame tends to be quite easy for him to play:' Illingworth, Max: 'Similar is the move order' Rd8 *(9...Qxa4* Illingworth, Max *10.Nxa4 Rd8 11.e3 Nd5 12.Nc3 c5 13.dxc5 Nxc3 14.bxc3 Bxc5=* and Black can neutralise White's pressure against the b7-pawn without too many problems. *)* 10.e3

A) 10...Nd5?! 11.Qxa6 Nxa6 12.0-0 Illingworth, Max: 'and in 1/2-1/2 (32) Gnusarev, P (2357)-Lutz, C (2596) Mallorca 2004, the easiest way to equalise would be to trade White's central pawn with' Rb8 *(12...c5=* Illingworth, Max*)* 13.Rd1 Nb6 14.Nxb6 axb6 15.e4± 1/2 Gnusarev,P (2357)-Lutz,C (2596)/Mallorca 2004/CBM 104 (32);

B) 10...c5 11.dxc5 Nfd7 12.0-0 Nxc5 13.Qxa6 Nbxa6 14.b3 Rb8 Black should be able to solve the problem of passive ♗c8 and equalise.]

[Black's idea is well illustrated in the following line: 9.b3 Rd8

A) 10.a4 (Illingworth, Max) looks a little bit convoluted, taking hold of the queenside but failing to develop, and after Nd5 11.Bb2 *(11.Nxd5 exd5 12.Ne3 Nc6 13.0-0* as played in 1-0 (26) Ju, W (2557) - Zhao, X (2527) China 2015 seems a fairly promising structure for Black, as the White knight is strange on e3 and after *Be6 14.Bb2 Qb6=* it is not easy to figure out White's pawn break.*)* 11...Nxc3 12.Bxc3

c5 Black equalises by taking the d4-pawn and hanging on to it. 13.0-0 cxd4 *(It is also possible to play for the initiative rather than material with 13...Nc6 14.e3 Bf6 15.Re1 cxd4 16.exd4* and now, rather than taking on d4, it is stronger to complete development with *Rb8! 17.Qe2 b5⇄* , when it is very likely that the whole queenside will be liquidated.*)* 14.Ba5 Re8 15.Rc1 White didn't take on d4 because of ...Bf6. e5 16.b4 Qe6 17.b5 Nd7= White has clear compensation for the pawn, as the c8-bishop and therefore the a8-rook is hard to get into the game, but objectively Black appears to be fine. He can always play ...Nc5 and ...Bd7, for instance.;

B) 10.0-0 c5 11.a4 Bd7 *(After 11...cxd4 12.Nb5 Ne8 13.Ba3 Bxa3 14.Nbxa3⩲* White gets full compensation.*)* 12.dxc5 Bc6 13.Qc2 Bxg2 14.Kxg2 Bxc5= with comfortable equality.]

[9.Ne5 (Illingworth, Max) loses a little too much time to give White hopes for an opening advantage, e.g. Rd8 10.0-0 *(10.Qc2* is a bit hard to believe after *Rxd4 11.0-0 Rd8 12.Bf4 Nbd7=)* 10...c5 11.Qb3 cxd4 12.Nb5 Ne8 13.Bf4 Nc6= and White has no more than compensation (in his lead in development) for the pawn.]

9...Nc6 Illingworth, Max: 'It makes more sense to start with this move as ...Rd8 has lost some of its strength.' **10.e3** The most natural way of protecting the pawn.

[After 10.Be3 Illingworth, Max: '!?' Illingworth, Max: 'is an unexplored try which leads to quite an interesting middlegame, although I don't believe it gives any edge - somehow it is too artificial.'

A) 10...Rb8 Illingworth, Max 11.0-0 b5 isn't as good with the bishop on e3 as White has a lead in development to work with after 12.Ne5 *(12.Bxc6* makes a very unnatural impression after *Qxc6 13.Ne5 Qa8=* and in the long-term White's king safety is a bit iffy.*)* 12...Bb7 13.Qxb5 This is the start of a long forcing line ending in a slightly better endgame for White after Qxb5 14.Nxb5 Nxe5 15.dxe5 Ng4 16.a4 Nxe3 17.fxe3 Bc5 18.Nd4 Bxg2 19.Kxg2 Rxb2 20.Kf3 Bxd4 21.exd4 Rb4 22.Rfc1 Rxd4 23.Rxc7± , which should not be hard for Black to draw, but even so, he probably wouldn't volunteer for the task.;

B) 10...Nd5 Illingworth, Max: 'This is the key move for Black, exploiting the position of the bishop on e3, and using tactics to stop White taking twice on d5.' 11.0-0 *(11.Nxd5* Illingworth, Max *exd5 12.Bxd5? Nb4∓* would be bad for White, as retreating the d5-bishop runs into ... Be6.*)* 11...Nxe3 12.fxe3 Na5 Illingworth, Max: 'Exchanging the minor pieces is sensible when Black is a bit behind in space, plus the c4-knight was doing a good job of constricting Black's position.' 13.Nxa5 *(13.Qa4* Illingworth, Max *Qxc4 14.Qxa5 c6 15.Rac1 Rd8=* White's pawn structure is not flexible enough for him to count on any advantage here. *)* 13...Qxa5⇄ White has some

compensation for an exposed pawn structure, but hardly more. 14.Rac1 Illingworth, Max c6= is not dangerous for Black, who can later play ... e5 to free himself.]

10...Rb8 Obviously, this move is aimed at solving the problem of the passive light-squared knight. The vulnerable state of White's queen gives Black an additional tempo for the fianchetto.

11.Qb5 Illingworth, Max: 'The arising endgame is safe for Black, but he is also doing fine after the alternatives, as Black is ready to grab counterplay with ...b5:'

[Black shouldn't face any problems in the event of 11.0-0 b5 12.Nd2

A) 12...e5! (Illingworth, Max) and Black has successfully taken the initiative in the centre. 13.d5 *(13.Nde4 exd4 14.Nxf6+ Bxf6 15.Nd5 Be5=* is quite pleasant for Black, who after all is currently a pawn ahead.*)* 13...Na5 14.Qc2 b4 15.Na4 Qb5 16.b3 This was the continuation of the old game 1-0 (26) Khasin, A (2450)-Feher, G (2375) Kobanya 1991. Tradewise Chess Festival 2012 (3.11)

[Mikhalevski, V]

1.e4 e5 2.Nf3 Nc6 3.Bb5 a6 4.Ba4 Nf6 5.0-0 Be7 6.Re1 b5 7.Bb3 0-0 8.h3 It's not easy to find how to challenge Black in the Marshall and so Svidler goes for an Anti-Marshall setup.

8...Bb7 9.d3 d5 10.exd5 Nxd5 11.Nxe5 The principle continuation.

[Leko's novelty 11.a4 proved to be harmless in Leko, P (2747)-Jakovenko, D (2737)/Elista RUS 2008/ [Mikhalevski, V].]

11...Nxe5 Muzychuk follows a recent game of Kamsky.

[11...Nd4 is the mainline and was played by Svidler, amongst others.]

12.Rxe5 Qd6 13.Re1 Rae8 14.Nd2 c5!

[One old game featured 14...Qg6?!

A) 15.Qf3! is even better, with the idea Nf4! 16.Ne4! *(16.Qxb7 c6!* is less clear.*)* 16...Ne6 17.Qg4!± and leads to a position with an extra pawn for White.;

B) 15.Qg4± Kavalek, L (2555) - Harandi, K (2270)/Skopje 1972.]

15.Ne4 A novelty, which fails to set problems.

[The recent aforementioned game saw 15.c3 Bd8! 16.Ne4 Qg6 17.Bd2 Nf6! 18.Bc2 c4! 19.Qf3 Kh8 20.Qg3 cxd3 21.Qxg6 hxg6 22.Nxf6 Rxe1+ 23.Rxe1 dxc2! 24.Nd7 Rg8 25.Rc1 Re8! 26.Rxc2 *(26.Nc5!?)* 26...Bc8 27.Nc5 Bf5 28.Rc1 Re2 29.Be3 Rxb2 30.Nxa6 Rxa2 and Black was fine in Gashimov, V (2761)-Kamsky, G (2732)/Wijk aan Zee NED 2012.]

[15.Qf3 is met by Qd7! 16.Ne4 c4! 17.dxc4 Nf6! 18.Qd1 Qc6! 19.cxb5 axb5 20.Nxf6+ Bxf6 with the initiative.]

[15.a4!? looks like the only serious attempt to set problems, but it requires practical tests.]

15...Qc6! Black creates a threat of 16... c4. **16.c4 Nb6 17.cxb5**

[17.f3 Bh4 18.Re3 Re7 also looks promising for Black.]

17...axb5 18.Qf3 c4! The strong

battery along the a8-h1 diagonal fully compensates for a pawn. **19.dxc4 bxc4 20.Bc2 f5 21.Nc3** White returns a pawn in order to extinguish Black's initiative.

[21.Ng5 also leads to equality after Bd8! 22.Bd2 Qd7! 23.Qf4 *(or 23.Qh5 h6 24.Rxe8 Qxe8 25.Qxe8 Rxe8 26.Nf3 Bxf3 27.gxf3 Re2 28.Rd1 Bg5! 29.Bxg5 Rxc2! 30.Be3 Rxb2=)* 23...Bc7 24.Qxf5! Rxf5 25.Bxf5 Qc6! 26.Rxe8+ Qxe8 27.Be6+ Kh8 28.Nf7+ Kg8 29.Nh6+ Kh8=]

21...Qxf3 Probably a slight inaccuracy.

[After 21...Qd7!? 22.Qd1 Qc6 it's dangerous for White to avoid repetition by means of 23.f3 as it weakens the dark squares. *(23.Qf3=)*]

22.gxf3 Bxf3 23.Bf4!? A nice square for the bishop.

[23.a4!? Surprisingly, advancing the a-pawn without development also seems to be a good try for White. Nd7! 24.a5 Nc5 25.a6 Nb3 26.Bxb3 cxb3 27.Re3 Ba8 28.Kf1 and Black still has to be accurate.]

23...Bb4!? After this accurate move the position is equal. **24.Rxe8 Rxe8 25.Bxf5 Bxc3 26.bxc3 Nd5** The point of 23...Bb4.

[26...Kf7!? with the idea of 27...Nd5 might be more accurate.]

27.Bd7! The only practical chance. Otherwise Black wins back the c3-pawn.

27...Re2

[27...Re7 28.Bc6 Nxf4 29.Bxf3 Nxh3+ 30.Kf1± is better for White who has a bishop versus knight and a passed pawn.]

28.Bb5! Nxf4 29.Bxc4+± White is slightly better thanks to the passed a-pawn. **29...Bd5**

[After 29...Kf8!? 30.Bxe2 Nxe2+ 31.Kh2 Ke7 32.a4 Kd6 33.a5 Kc7 34.a6 Kb8 35.Rd1 g5 36.Rd7 h5 Black obtains good chances to escape.]

30.Bxe2 Nxe2+ 31.Kh2 Nxc3 32.a4 Ne4? A mistake.

[32...Nxa4 might be enough for a draw, but it requires some analysis, which one has no time to do in time trouble. Anyway, I'm not even sure of the evaluation of this position]

[32...Kf7!? deserved attention. 33.a5 Nb5 34.a6 Na7 35.Rc1 Bc6 36.Re1± and the question whether White has enough for a win remains open.]

33.a5? Missing a good winning chance.

[33.Rd1! Bc6 34.a5

A) 34...Kf7!? is better, but may not save either. For example, 35.a6 Ke6 36.a7 Nxf2 37.Rc1 Bd5 38.Rc7 Ne4 39.Rxg7 Nf6 40.Rg5 *(40.Kg1!?)* 40...Ba8 41.Rb5 Nd5 42.Rb8 Nc7 43.Kg3+- and White should be able to win.;

B) 34...Nxf2? 35.Rd6!+- Suddenly Black loses a piece. For example, Be4 *(35...Bb5 36.Rd8+ Kf7 37.Rd5 Ba6 38.Rf5++-)* 36.Rd8+! Kf7 37.Rd4! and the threat of 38.Rxe4 forces a bishop move. Bc6 38.Rf4++-]

33...Nxf2 Now it's likely to be equal.

34.a6

[After 34.Kg3 Ne4+ 35.Kf4 Nc5 36.Rd1 Bg2 Black seems to escape with a draw.]

34...Ne4 35.a7 Nf6 36.a8Q+ Svidler agrees to a draw, though his attempts to delay a8 would hardly achieve much as Black has enough squares for the bishop on the a8-h1

diagonal. **36...Bxa8 37.Rxa8+ Kf7=** White doesn't have enough material to win. **38.Kg3 g5 39.Kf3 Kg6 40.Ra5 h5 41.Ke3 h4 42.Kf3 Kh6 43.Ke3 Kg6 44.Rb5 g4** An interesting and theoretically important game. White's best chance to set opening problems seems to be 15.a4!?

□ **Svidler,Peter**
■ **Kramnik,Vladimir**
Russian Ch (1) 2011
[Palliser, Richard]

1.Nf3 Svidler's secret weapon for the Championship and one which netted him a pretty handy 21/2/3. **1...d5 2.g3 Nf6 3.Bg2 c6 4.d3 Bg4 5.Nbd2 Nbd7 6.h3 Bh5** [diagram] **7.g4!?** The five-time champion shows that he is spoiling for a fight in this reversed Torre position. White doesn't always play so aggressively, though, as shown by two other recent games:

[a) 7.0-0 e5 8.e4 Bd6 9.Qe1 is a standard, unpinning resource in this line of the Reti and, after Qe7 10.Nh4! Bg6 11.Nxg6 hxg6 12.exd5 Nxd5 *(12...cxd5 13.c4!* would undermine Black's centre and continue to open lines for White's unopposed bishop*)* 13.a3 0-0 14.Nc4 Bc5 15.Na5 , White had a pleasant edge in Asaturoglu-M.Socko, Turkish Team Championship 2011]

[b) 7.c4 e6 8.0-0 Bd6 9.Rb1 is yet another plan at White's disposal, although, after a5! 10.cxd5 exd5 11.Nh4 0-0 12.Nf5 Bc7 13.Nf3 Re8 , Black was very solid and the chances about equal in Galego-Korneev, Portugese Team Championship 2011.]

7...Bg6 8.Nh4 e6

[Kramnik wants to maintain a solid central presence and control over f5 rather than allow 8...e5 9.c4 , not that this should be too awful for Black.]

9.e3

[Now 9.c4 Bd6 would fail to trouble Black, who has d5 securely under control, as in Galego-Korneev.]

9...Bd6 10.Qe2 Qc7 11.0-0 0-0-0 Kramnik too is up for a fight and hopes to exploit the half-open h-file should White hurry with the exchange on g6. [diagram] **12.Rb1!**

[This attacking move is new and must have been the fruit of preparation for Kramnik had been here before. Indeed, the no-less critical 12.f4 had been tried in Morozevich-Kramnik, World Blitz Championship 2007, where h6 13.Nxg6 fxg6 14.Nf3 e5 15.Nh4 exf4 16.exf4 Rhe8 17.Qf2 Bc5! 18.d4 Bb6 left White a little overextended and Black offering a pawn to invade on e4.]

12...Qa5?!

[This feels rather artificial, but Kramnik may well have been struggling to find a good plan as it's far from easy for Black to force the knight to move from h4. Perhaps he would have done better to improve his forces and expand with 12...Kb8!? 13.b4 e5 . White would then have to take into account the idea of b5 cxb5 with pressure down the c-file. His position is perhaps still slightly the more pleasant, although after, say, 14.c4 e4 15.d4 dxc4! 16.Nxc4 Nb6

17.Nxd6 Qxd6 18.b5 Nfd5 , matters aren't too clear, since ...h5 is finally on the agenda.]

13.a3 Bb8 Revealing the main idea behind Black's last, but White doesn't mind closing the h2-b8 diagonal, at least for a bit. **14.f4** [diagram] **14...e5?**

[Kramnik must still have been in 'Dortmund 2011' mode at this point. The aggressive text is the move Black would like to make work, but he won't obtain enough for the piece. That said, things had already gone wrong, with 14...Qc7 15.b4 e5 16.Bb2 exf4 17.exf4 Rde8 18.Qf2 one line in which White enjoys control and a number of small plusses right across the board.]

[Thus I wonder if already Black might have done best to have grovelled with 14...Rde8!? 15.b4 Qd8 followed by ... Ng8 to finally resolve the kingside tension.]

15.f5 e4 16.dxe4 Qc7 The point of Black's play, but Svidler refuses to be bluffed and goes about closing the key diagonal ahead of netting the trapped bishop. **17.Rf4! Rde8!?**

[A decent attempt to keep some tension in the position. Black might have recouped some material with 17...Qb6 but, after 18.Qf2! Bxf4 19.exf4 dxe4 20.Nxe4 Nxe4 21.Bxe4 , White would have been in total control with his bishops.]

18.fxg6 hxg6 19.Nhf3 [diagram] 'And White went on to win' is what one might expect to read at this point. However, Kramnik was not playing White here and the modern Kramnik, just like the young version of him in the 1990s, is something of a fighter. **19...Qb6 20.e5** And why not keep an extra piece?

20...Nxe5 21.Nxe5

[White's rook might seem a little misplaced after 21.Rb4!? but it's hard to imagine Black stirring up too much trouble on the opposite flank after something like Qc7 22.Nxe5 Qxe5 23.Nf3 Qe7 24.c4 .]

21...Bxe5 22.Rf3 Nh7! If in doubt, improve your worst placed piece! Black's diagonal-moving pieces are well placed, reminding White of his weaknesses on both long diagonals, just as the rooks do with regard to the e- and h-files. However, the knight was doing little on f6 and now Black threatens to collect a second pawn for the piece on h3 while opening lines should White so allow. **23.c4?**

[Svidler doesn't want to have to defend and tries to seize back the initiative, but this policy doesn't really fit in with the rook retreat to f3. With colours reversed Kramnik would surely have played 23.h4! , preventing Black's only real plan. Perhaps Svidler didn't like the look of f5!? but, after 24.gxf5 Nf6 25.fxg6 Rxh4 , what can Black do down the h-file with such a fine defensive bishop on g2? Indeed, White might decide to go over to the offensive himself here with 26.b4!? Reh8 27.c4 . After, for example, Qd8 28.b5 R8h6 29.bxc6 Qh8 (finally Black has a threat!) 30.Rxf6! Bxf6 31.Qf3 , White's attack is much the more potent.]

23...Ng5 24.cxd5 cxd5!

[Black must not be too materialistic. 24...Nxf3+? 25.Nxf3 cxd5 26.Nxe5 Rxe5 27.Qd3 would have left White's king pretty safe, while his bishops are poised to dominate the position. After the text, however, Svidler has to

find a way to untangle his queenside while keeping Black's counterplay under control.]

25.Nf1 Kb8 26.b4 [diagram] **26...d4!**

[Black is right back in the game and now begins to pose serious problems for both members of White's royalty. The text is natural and strong, but 26...f5!? was also worth a thought, since 27.gxf5 Nxf3+ *(27...Qf6!?* is another idea, preparing ...gxf5-f4 while hitting both h3 and the loose rook in the event of *28.fxg6? Qxg6)* 28.Qxf3 Rhf8 29.Qxd5 Rxf5 doesn't seem totally clear. White does have two minor pieces for the rook, but is yet to fully coordinate his troops and must continue to take care with such a king position.]

27.Bd2 Re7 Very calm, but why not increase the pressure down the e-file?

28.Rc1

[White would like to get his queen off the e-file, but 28.Qd3 Nxf3+ 29.Bxf3 Rxh3 30.Kg2 Rh8 31.exd4 Bxd4 32.Bf4+ Ka8 doesn't exactly seem very clear]

[nor does 28.Qf2 Nxf3+ 29.Qxf3 d3 . Svidler prefers a different useful move, perhaps hoping that he might get to counterattack down the c-file one day.]

28...dxe3?

[Black wouldn't have had anything after 28...Rhe8? 29.Rf2 , but the text appears to have been based on a miscalculation.]

[White would have continued to struggle to free his position in the event of 28...Qd6! . He might try 29.Qc4 , but after Nxf3+ 30.Bxf3 d3 31.Kg2 Rc7 is the ending really going to be anything other than unclear, with ...f5 high on the agenda?]

[Another possibility was 28...d3!? 29.Qxd3 Nxf3+ 30.Bxf3 Rxh3 31.Kg2 Rh8 followed by making decent use of both black rooks on the central files.]

29.Bxe3 Bd4

[Kramnik must have missed or badly underestimated White's calm 30th, but in any case Black was by now once again rather struggling, with, for instance, 29...Nxf3+ 30.Qxf3 Bd4 31.Qf4+ Be5 32.Qf2 Qa6 33.Nd2 but one line in which White's king ends up much the safer, not being raked by a deadly pair of enemy bishops.]

30.Rg3! [diagram] Finally the rook removes itself from attack and now Black will come up short down the e-file.

30...Bxe3+ 31.Nxe3 Rhe8 32.Rc3 Not the two most active white rooks you'll ever see, but White is a clear piece to the good and is about to unpin his queen. **32...a6 33.Qf2 f6 34.Nc2 Qxf2+ 35.Kxf2 Re2+ 36.Kf1 Rd2** The last chance, but even with the time control yet to be made Svidler was hardly going to mess this up. **37.Rgd3 Ree2 38.Rxd2 Rxd2 39.Ne3 Ne6 40.Nc4 Rd1+ 41.Kf2 Nf4 42.Bf3 Ra1 43.h4 g5 44.h5**

[Erenburg,Sergey]

1.e4 Erenburg Svidler,Peter **1...c6 2.d4 d5 3.Nd2 dxe4 4.Nxe4 Nd7 5.Ng5** This is the most principled line to fight for an opening advantage. **5...Ngf6**

[5...h6? 6.Ne6! is the point of 5. ♘g5.]

6.Bd3

[6.Bc4 e6 7.Qe2 Nb6 is another theoretical line.]

6...e6

[Again 6...h6? is met by 7.Ne6!]

7.N1f3 Bd6

[7...h6? allows White to sacrifice a piece for a very strong and long-lasting initiative. We all remember the historical defeat of Garry Kasparov:

8.Nxe6 Qe7 9.0-0 fxe6 10.Bg6+ Kd8 11.Bf4 b5 12.a4 Bb7 13.Re1 Nd5 14.Bg3 Kc8 15.axb5 cxb5 16.Qd3 Bc6 17.Bf5 exf5 18.Rxe7 Bxe7 19.c4 1-0 Comp Deep Blue-Kasparov,G (2785)/New York 1997/EXT 1998]

8.Qe2 h6 Now, this move is ok! **9.Ne4 Nxe4 10.Qxe4 Qc7**

[The move 10...Nf6 is tempting, but loses control over the important e5 square, which becomes apparent after 11.Qe2 Qc7 12.Bd2 b6 13.0-0-0 Bb7 14.Ne5±]

11.0-0 b6 12.Qg4 Forcing Black to make a concession, either to weaken his kingside, or to lose the right to castle.

12...Kf8 Black loses his right to castle, but, on the other hand White can't make use of it immediatly. Meanwhile, Black is going to complete his queenside development and push c6-c5. The alternative 12...g5 disappeared from top tournaments after following brilliant win of Vishy Anand:

[12...g5 13.Qh3 Rg8 14.Re1 Bf8 15.Qf5! Bg7 16.h4 Kf8 17.Qh3 Rh8 18.hxg5 hxg5 19.Qg4 c5 20.Bxg5 cxd4 21.Rad1 Bb7 22.Rxe6!! fxe6 23.Be7+! Kxe7 24.Qxg7+ Kd6 25.Nxd4 Qc5 26.Bf5! Qe5 27.Nf3++- 1-0 Anand,V (2774)-Bologan,V (2650)/Dortmund 2003/CBM 097 (36)]

13.Bd2?! In my opinion, this way of development is not the best one. The main alternative is 13.b3 developing the dark-squared to b2, where it can press Black's vulnerable ♙g7. Recently, White successfully employed also the move 13.♕h4. Here, few recent examples:

[13.Qh4 Bb7 *(13...c5 14.Be4 Rb8 15.Rd1 Ba6 16.dxc5 bxc5 17.b3 f5 18.Bd3 Bxd3 19.Rxd3 Ne5 20.Nxe5 Bxe5 21.Rb1±* 1-0 Jakovenko,D (2708)-Sasikiran,K (2690)/Foros UKR 2007/The Week in Chess 659 (69)*)* 14.Re1 Kg8 *(14...c5!? 15.Be4 Bxe4 16.Qxe4 Rd8 17.dxc5 Nxc5 18.Qh4 Kg8 19.b3 Be7 20.Qc4 Bf6 21.Bf4 Qb7 22.Be5 Nd7 23.Bxf6 Nxf6 24.Rad1 Kh7=* ½-½ Nisipeanu,L (2693)-Sasikiran,K (2690)/Foros UKR 2007/The Week in Chess 660 (33)*)* 15.Qh3 Re8 *(15...c5? 16.Rxe6! fxe6 17.Qxe6+ Kf8 18.Nh4+-)* 16.c4 Nf6 17.Bd2 c5 18.d5 e5 19.Bc3 g6 20.Qh4 Kg7 21.Nd2± 1-0 Leko,P (2738)-Bareev,E (2643)/Elista RUS 2007/The Week in Chess 657 (41)]

13...Bb7 14.Rfe1

[Deserves further investigation: 14.c4]

14...Rd8 15.Rad1 c5!N Svidler,Peter: 'N!?' Black successfully completed his queenside development and opened diagonals for his bishops. White's kingside is under pressure. Meanwhile, White didn't create any threats against the black monarch, while his queen is actually misplaced. White should already fight for equality.

1.d4 Nf6 2.Nf3 e6 3.g3 b5 4.Qd3!? An ambitious approach. White wastes no time both attacking the pawn on b5 and preparing to advance with e4. **4...a6**
[Invariably played, but Black can also react to White's queen deployment with 4...Ba6 , as we'll see in Hubner-

Janssen.]

5.e4 The logical follow-up, but not everyone is so keen to advance the pawn straight away and recent practice has also seen some outings for the alternatives:

[a) 5.Bg5 Bb7 6.Nbd2 makes a slightly strange impression, at least to my eye, and after c5 7.c3 cxd4! (the simplest approach) 8.cxd4 Nc6 9.a3 h6 10.Bxf6 Qxf6 11.Nb3 d5 12.Rc1 Bd6 an early draw was agreed in Erdos-Moiseenko, European Championship, Rijeka 2010. Note that after the logical continuation 13.Nc5 Bxc5 14.Rxc5 0-0 15.Bg2 Rac8 16.b4 (to secure the rook) e5 17.dxe5 Nxe5 18.Nxe5 Rxc5 19.bxc5 Qxe5 20.0-0 Rc8 21.Rc1 Qb2 a draw begins to look rather likely.]

[b) 5.a4 b4 6.c4 *(* again we see White trying to seize space and bypass a pawn on b4 otherwise, *6.Bg5 Bb7 7.Nbd2 d5 8.Bxf6 Qxf6 9.e4 dxe4 10.Nxe4 Qg6 11.Ned2* wasn't especially impressive from White in Kurajica-Jeremic, Banja Vrucica 2009,*;* while Cox notes that in Djuric-Taimanov, Titograd 1984, *6.e4 Bb7 7.e5 Ne4!? 8.Nbd2 d5 9.exd6 Nxd2 10.Bxd2 Bxd6 11.Bg2 Nd7 12.0-0 Nf6 13.Rfe1 0-0* gave Black equality *)* 6...bxc3!? *(* slightly surprising this is new previously Black has preferred *6...Bb7* when *7.Bg2 d6 8.Nbd2 Nbd7 9.0-0 c5 10.e3 Be7 11.b3 0-0* has done OK for him in a couple of outings*)* 7.bxc3 d5 8.Bg5 a5 *(* as it's not clear that an exchange of light-squared bishops is in Black's interest, he might do better with the more critical *8...c5!?)* 9.Bxf6! Qxf6 10.e4 Ba6 11.Qe3 Be7 12.Nbd2 0-0 13.Bd3 left Black's queenside slightly the more vulnerable and White slightly better in Anikaev-Reinaldo Castineira, La Bordeta 2010.]

5...Bb7 6.e5

[Invariably played, but the attempt to maintain the centre with 6.Nbd2!? c5 7.c3 deserves attention. One high-level test, albeit only at blitz speed, saw

A) this may be premature indeed, is 7...Nc6 8.e5 *(8.Bg2 cxd4 9.cxd4?* runs into *Nb4 10.Qb3 Rc8)* 8...Nd5 really such a great version of the c3 Sicilian for White?;

B) 7...cxd4 8.cxd4 Bb4 9.e5! Bxf3 *(9...Ne4!? 10.Bg2 f5* looks like a better try*)* 10.Qxf3 Nd5 11.a3 Bxd2+ 12.Bxd2 Nc6 13.Qg4 Kf8 14.Bg2 and by now White was somewhat for choice with his bishops in Ponomariov-Gashimov, Moscow (blitz) 2009.]

6...Nd5 7.Bg2 d6

[Challenging the e5-pawn while preparing to develop the queen's knight to d7 is a very logical approach, but both Cox and COFBE prefer 7...c5!? , reaching a weird hybrid between the St George and Nimzowitsch Sicilian. Here White is best advised to maintain the tension and after

A) this goes unmentioned in both books, which only note that 8.dxc5 Bxc5 9.0-0 should be OK for Black after Qc7 (COFBE) *(*or *9...d6* (Cox) *)*;

B) 8.0-0! cxd4 *(* in the limited practice thus far, Black had previously preferred *8...Nc6* when *9.dxc5!? Bxc5 10.a4* looks like the

critical continuation Black is fairly well developed, but I'm not so sure what he's doing, whereas White will bring his knight from b1 to c4 or e4 and may look to attack on the kingside *)* 9.Nxd4 Nc6?! *(9...Qc7* would be less ambitious, although with *10.a4!* White still has good chances to seize the initiative, as shown by the line *b4 11.Nd2 Qxe5?! 12.Nc4 Qc7 13.Nf5* followed by 14 Re1 with dangerous play for the pawn*)* 10.Bxd5 Nb4 11.Bxb7! Nxd3 12.cxd3 Ra7 13.Bg2 White had three minor pieces for the queen in Moiseenko-Kononenko, Ukrainian Team Championship 2010, and pressed, although Black eventually held after a gruelling 142 moves!]

8.0-0! Nd7 9.a4!

[New, logical and strong. Svidler breaks up Black's queenside and buys himself control of c4. Previously 9.b3 dxe5 10.dxe5 c5 11.Bb2 Qc7 12.Na3 Bc6! 13.c4 Nb4 14.Qe2 Qb7 hadn't been too clear in Komarov-Nisipeanu, Sovata 1998,]

[and 9.Qe2 Be7 10.Nbd2 N5b6 11.Re1 Qb8 12.h4 h6 13.b3 b4 14.Bb2 a5 was also unclear but about equal in Wohl-Eingorn, Metz 2002.]

9...b4

[White has a number of pleasant options after 9...bxa4 , including 10.Nc3!? dxe5 11.Nxe5 , which brings the fianchettoed bishop into the game,]

[and after 9...dxe5 10.Nxe5 Nb4 11.Qe2 Bxg2 12.Kxg2 Nxe5 13.dxe5 Qd5+ 14.f3 Rd8 15.Nc3 White again emerges with a pull in view of Black's queenside issues.]

10.Nbd2 dxe5 11.Nxe5

[The simplest approach, opening up the bishop and retaining a pleasant edge. After 11.dxe5!? Nc5 12.Qd4 Be7 Black manages to complete his development, but even here 13.Nc4 would retain a pull, followed by either 14 Na5 or a5 14.Qg4 Kf8 15.Qh5!? .]

11...Nxe5

[Not wholly ideal perhaps, but after 11...Be7 12.Nec4!? a5 13.Nb3 White would have had a certain grip on the position and note that the pin with Ba6 is nothing to worry about on account of the simple and effective 14.Nbxa5 N7b6 15.b3 .]

12.dxe5 Be7 13.Ne4 0-0 14.h4! Classic use of a space advantage. Here Svidler isn't so much after the black king, as happy to swap off the dark-squared bishops and so make his knight all the more powerful. **14...c5?!**

[I really don't like this move, which just makes the forthcoming trade of bishops all the more effective. Instead Black might have consented to a small kingside weakening with 14...h6 and after 15.Rd1 Qe8 *(15...c5* again has drawbacks, as shown here by *16.c3 bxc3 17.bxc3 Qc7 18.Nd6!)* 16.c3 Rd8 17.Qe2 White would have been restricted to just an edge.]

15.Bg5 Qc7 16.Bxe7 Nxe7 17.Nd6

[It was also possible to take the queens off straight away with 17.Qd6!? . In either case the hole on d6 will give White a pretty pleasant long-term advantage.]

17...Bxg2 18.Kxg2 Qc6+ 19.Qf3 Rad8

[Gashimov doesn't need to fear an exchange of queens just yet, but here

he should have given careful consideration to 19...Nd5!? and after 20.Kg1 (wisely unpinning) f6 21.Qg4 Qd7 22.Rfd1 Qe7 23.Qe4 White would only have been a little better, with Black's own knight not on such a bad square either.]

20.Rfd1!

[Svidler is very happy to bring his king into the heart of the board, whereas 20.Qxc6 Nxc6 21.f4 f6 would have given Black decent-enough counterplay.]

20...Qxf3+?!

[Rather compliant, although by now 20...Nd5 21.Kg1 f6 was no longer quite so effective on account of 22.Qg4 Qd7 *(22...f5* is possible too, but that would leave the white knight firmly in place*)* 23.exf6 Rxf6 24.Ne4 when White finds it easier to pile up on e6.]

21.Kxf3 Nc6 22.Ke4 f5+

[22...Nd4 23.c3 Nb3 24.Rab1 wouldn't really have led anywhere for Black, but even the advance of the f-pawn isn't so ideal for him.]

23.exf6! gxf6?!

[This loses a pawn, but I haven't denoted it with a whole question mark for I'm sure Gashimov was aware of that and because the alternative 23...Rxf6 24.Rd2 just looks rather grim to the eye. However, the ever-resourceful machine shows that here Black can obtain some counterplay by exploiting the position of White's king, such as with c4! 25.f4 *(*or *25.c3 Na5 26.Nxc4 Rxd2 27.Nxd2 Rxf2)* 25...Rg6 26.Kf3?! *(*better is *26.Nxc4 Rxd2 27.Nxd2 Rxg3 28.Nc4* , retaining slightly the better chances*)* 26...c3 27.bxc3 bxc3 when White must even take care, as 28.Rd3? e5 would see Black seizing a strong initiative.]

24.Nb7 Rd4+

[This may again be a little inaccurate. I dare say that Gashimov considered 24...f5+!? 25.Ke3 Rc8 26.Nxc5 Ne5 , but was unable to find a killer check after 27.Nxe6 Rfe8 and so rejected the line. Indeed, there isn't one, but this was likely a better practical try, with Black very much able to keep resisting after, say, 28.Nd4 Nc4+ 29.Kf4 Nxb2 30.Rdb1 Rc4 31.Rxb2 Rxd4+ 32.Kxf5 Kf7 .]

25.Rxd4 cxd4 26.Nc5 f5+!? 27.Kd3 e5 Black stakes everything on his central pawn mass, but that is an outside passed pawn which White is obtaining.

28.Nxa6 Rc8 29.f3

[It's very natural to halt the pawns thus and I dare say that Svidler was by now down to his last few minutes, but perhaps 29.Nc5!? was even stronger, not fearing any ghosts after e4+ 30.Kc4 .]

29...Kf7 30.g4

[Continuing his plan of undermining Black's centre followed by blockading with the king on e4. There were other options, though, including 30.a5!? with the idea of Ra8 31.Nc5 Rxa5 32.Rxa5 Nxa5 33.f4 when White retains his pawn advantage with good winning chances in the ensuing knight endgame.]

30...fxg4

[30...Ke6 31.gxf5+ Kd6!? would have tried to corral White's knight, but it can be saved with 32.f6 Ra8 33.f7 .]

31.fxg4 Ke6 32.Ke4

[Continuing his plan and wisely

steering well clear of lines like 32.Rf1?! Kd5 33.g5 e4+ 34.Ke2 b3! with good counterplay for Black.]

32...Na5

[Active defence from Gashimov, but it may be that 32...b3!? was even stronger, since after 33.cxb3 Na5 *(*but not *33...Nb8? 34.Nxb8 Rxb8* with the idea of ...Rxb3 and mate on e3, because of just *35.Ra3* followed by pushing the a-pawn*)* 34.b4 Nb3 35.Rd1 Rc2 White's king position becomes a slight cause for concern and the position is certainly messy, if still better for White after 36.Kd3 Rxb2 37.Nc7+ Kd7 38.Nd5 Rh2 .]

33.Nxb4 Rc4 34.Nd3 Rxc2

Thus Black has regained one of his pawns, while activating his rook and knight. That said, White is still better here, but some care is required and this position can't have been easy to play in the resulting semi-blitzed finish. **35.Re1**

Necessary to avoid dropping the knight.

35...Nc4 36.Nc5+ Kd6?

[After 36...Ke7! 37.Kd3 Ne3 38.Rxe3 Rxc5 39.Rf3 White would have had some chances in the resulting rook endgame thanks to his mobile pawns on both flanks, but Black had to try this.]

37.Kd3?

[Very tempting, but White doesn't have anything after the forthcoming trade of knights. Necessary was 37.Nb7+! Kc6 *(*or *37...Ke6 38.Nd8+* , dragging Black's king away from the defence of e5*)* 38.Kd3 Rxb2 39.Kxc4 when the e-pawn will fall and White should win.]

37...Rxb2 38.Ne4+ Kd5 39.Nf6+ Ke6 40.Kxc4 Kxf6 41.Kd5 Assuming his 37th move wasn't a blunder, Svidler must have been pinning his hopes on this move, but Black's d-pawn can now get motoring. **41...d3 42.Rf1+ Kg7 43.Kxe5 Rb4**

[R.Scherbakov]

Peter Svidler preferred a sharp choice in a usually rather boring variation and Veselin Topalov failed to either recall or to find a solution to the problem over the board. Yet White's inaccuracy soon spoiled his advantage... **1.d4 Nf6 2.c4 e6 3.Nf3 d5 4.Nc3 Be7 5.Bf4 0-0 6.e3 Nbd7 7.c5 c6 8.h3 b6 9.b4 a5 10.a3 Ba6 11.Bxa6 Rxa6 12.b5** A sharp choice.

[An alternative 12.0-0 leads to a quiet play - see "D37 QGD/15 5. Bf4 0-0 - 6. e3 Nbd7 7. c5" for details.]

12...cxb5 13.c6 Qc8! 14.c7! b4 15.Nb5 a4 16.axb4

19.Rhc1 Qa6

[perhaps the restrained 19...Be7!? is more precise but it requires more analysis]

20.Nd6! This is technically a novelty but in fact it's just the only move and I already gave brief comments regarding it some years ago.

[In the game Vigorito - Getz, Ledyard 2009, White played 20.Rab1? and here Black missed the strong Ndc5! (or with the other knight) 21.dxc5 Nxc5 22.Rxc5 bxc5 23.Nc3 f6 *(*or an immediate *23...a3* with a huge advantage in the ending. *)*]

20...Qxd3+ 21.Kxd3 Bxd6 22.c8Q Rxc8 23.Rxc8+ Nf8?

[23...Bf8 was correct. The ending looks acceptable for Black thanks to his Q-side passers but White should be able to prove the advantage: 24.Bc7! *(24.Rc7 Ndf6 25.Ne5 Nxf2+ 26.Kc2 Ra8* is fine for Black*;* but *24.Nd2!?* seems promising, too *)*

24.Bxd6 Nxd6 25.Rd8 Nc4 26.Ne5? A serious mistake, which allows Black to escape.

10...a5 Dieser Zug, in der modernen Spielpraxis häufig angewandt, gefällt mir nicht. M.E. verliert Schwarz dadurch nur Zeit und muß bei den Plänen mit c6-c5 an der Schwäche des Punktes b5 leiden. [12...c5! scheint mir die beste Aufstellung zu sein- der schwarze Springer bekommt einen aussichtsreichen und sicheren Posten auf c6 und der ♗c8 wird nach h7-h6 auf e6 entwickelt, wo er nicht so leicht in die Abtauschgefahr gerät. 13.Be3 *(13.Re1 Nc6 14.a3 h6 15.Bd2 Be6=)* 13...Nc6 14.Ne4 b6⇄ Δ♗f5]

[10.Qd2 is well met by: Ne5! *(10...Nxd4 11.Bxd4 e5 12.Be3 b5 13.f4 b4 14.Ne2 a5 15.Ng3* looks promising for White.*)* 11.b3 *(11.Qe2 Qc7 12.0-0-0 Bd7 13.f4 Nc4⇄)* 11...g5 12.f4 gxf4 13.Bxf4 b5⇄ Esserman,M (2426)-Navara,D (2736) Reykjavik ISL 2015]

[At the same time, 10.Qe2 Nxd4 11.Bxd4 e5 12.Be3 b5 13.0-0-0 b4 is less comfortable for White, as the e2-square isn't vacant for the knight 14.Nd5 Nxd5 15.exd5 0-0 16.Be4 Bg5 17.Rdg1 Bxe3+ 18.fxe3 Qh4 Black was fine in Shirov,A (2702) - Khismatullin,D (2681) Loo 2014]

10...Nd7 11.0-0 0-0 Maxime deviates from his memorable game vs Anand, where he was defeated mainly due to Vishy's exceptional home preparation.

[The above-mentioned game saw 11...Nxd4 12.Qxd4 0-0 13.Qd2 Rb8 14.Ne2 b5 15.Rad1 Qc7 16.f5! Anand,V (2804)-Vachier Lagrave,M (2723) Stavanger NOR 2015 [Roiz, M]]

12.Nce2 The knight is heading for g3 in order to support White's attack.

[12.Kh1 seems somewhat slow and cannot pose Black any problems. For instance, Nxd4 13.Qxd4 Rb8 *(13...b5!?)* 14.Qd2 b5 15.Ne2 Bb7 16.Rad1 Rc8⇄ Nguyen Ngoc Truong Son (2634) -Korobov,A (2700) Berlin GER 2015]

12...Nxd4 13.Nxd4

[13.Qxd4 was recently tried by Alexei Shirov, but it doesn't change the character of the play: b5 14.Ng3 e5 15.Qd2 exf4 16.Bxf4 Ne5 17.Nf5 Bxf5 18.exf5 Rc8 19.Rad1 Nc4 20.Qc1 Bf6 *(20...Bg5!? 21.Bxg5 Qxg5 22.Qxg5 hxg5=)* 21.b3 Ne5 22.Qd2 Qb6+ 23.Be3 Qc7= The strong Ne5 and control over the dark squares offers Black comfortable play, Shirov,A (2684)-Anand,V (2784) Zurich SUI 2016]

13...e5 14.Nf5 exf4 15.Bxf4 Ne5 16.Qd2N A natural innovation - the Qd2 has several useful functions, while the rooks are now connected.

[16.Qd5 was covered in Shirov,A (2712)-Korobov,A (2700) Poikovsky RUS 2015 [Roiz,M]]

16...Bxf5 It's hard to cope with a monster on f5 any longer. **17.exf5 Rc8 18.b3**

[The prophylactic 18.Kh1 Nc4 19.Qc1 Bf6 20.Rb1 b5 21.b3 Ne5⇄ would lead to a complex position, a la Shirov-Anand, which was mentioned earlier.]

18...b5 Of course, Black shouldn't let White consolidate the position by means

of c2-c4. **19.Rad1 Re8**
[The following line illustrates the merits of Peter's 16th move: 19...Qc7?! 20.Bxh6! Qxc2 *(20...gxh6 21.f6* is even worse for Black*)* 21.Bf4 Qxd2 22.Rxd2±]
20.Rfe1
[Another natural move - 20.Kh1 can be met by: Bg5!? *(Possible is also 20...Rc5 21.Rf2 Qc8 22.g5 Bxg5 23.Bxg5 hxg5 24.Qxg5 f6 25.Qh5 Nf7 26.Bd5 Rxd5 27.Rxd5 Re1+ 28.Kh2 Qb7⇄)* 21.Bxg5 hxg5 22.Rf2 f6 23.Qxd6 Qa5 24.Qd2 Qc7 25.Bd5+ Kf8⩲ with excellent compensation for a pawn.]
20...Qb6+ In my opinion, this is a loss of time - White should remove the king from g1 anyway.
[it made sense to regroup the pieces by means of: 20...Rc7! 21.Re2 Bf6 22.Kh1 Qc8⇄]
21.Be3
[21.Kh1!? b4 22.Re3 a5 23.c4 bxc3 24.Rxc3±]
21...Qc7 22.Re2 Bf6 23.Bd5 Peter goes for an attacking approach, but Black is well-prepared for it.
[More to the point was: 23.Bf2! Bg5 24.Qd4! *(24.Qe1 Re7 25.Rd4 Nc6 26.Rxe7 Nxe7⇄)* 24...Re7 25.Kf1 Bf6 26.Qb6± , liquidating into a better endgame.]
23...Re7 24.g5 Consistent, but not effective. Most probably Peter underestimated the following tactical resource.
[24.Bf4 a5 25.Kh1 b4 26.g5 hxg5 27.Bxg5 Qc3 28.Bxf6 Qxd2 29.Rdxd2 gxf6=]
24...hxg5 25.Bxg5 Ng4! This is the point! This move enables Black to exchange the dark-squared bishops in a favourable situation, and consolidate.
26.Rg2
[26.hxg4 Rxe2 27.Qxe2 Bxg5 28.c4=]
26...Bc3 27.Qf4 Ne3!? This time Maxime chooses the most aggressive way.
[27...Nf6 28.Bf3 Be5 29.Qh4 Qc3 would lead to a draw by repetition: 30.Rd3 Qa1+ 31.Rd1 Qc3=]
28.Bxe7 Nxg2
[28...Qxe7 29.Bxf7+ Kxf7 30.Re2 Bb4 31.Rxe3 Bc5 32.Rdd3 Re8 33.Kf2 Qe5=]
29.Qg5? Alas, GM Svidler makes the first step in a wrong direction.
[There was no reason to deviate from an equal endgame: 29.Qxd6 Qxd6 30.Bxd6 Ne3 31.Rd3 Nxd5 32.Rxd5 Bf6 33.Rd2 Bc3 34.Re2 Rd8=]
29...Nf4! 30.Kh1? A decisive mistake.
[30.Qxf4 Qxe7 leaves White's king under fire: 31.Qe4 Be5 32.f6 Qa7+ 33.Kf1 Bxf6∓ Still, it was the lesser evil!]
30...Nxd5 31.Rxd5 f6 The poor placement of the bishop puts White in a hopeless situation. **32.Qe3 Be5 33.Bxd6 Qb7**

[12.Nd5! A very interesting idea which worth being checked in practice. In fact, it's quite logical; Black's king is still uncastled and play through the centre should be promising for White. One is to go for instant queenside expansion with 8...b5 and the other is what was played in the game. **8...Qc7 9.Qe2**

[9.e5 is the main line and the continuation would be something like Nd7 10.Qe2 b5 11.Nf1 a5 12.h4 Ba6 13.Bf4 b4 14.Ne3 Nb6 15.Ng4 You can see how clear battle-lines have been drawn with White attacking on the kingside while Black is expanding on the queenside. It's a very exciting position which one must study in order to improve one's attacking and defensive abilities.]

9...b5 10.exd5 Though the great majority of players have pushed ahead with e4-e5, Svidler goes for the exchange of pawns. It shouldn't really give him any hopes of an advantage but I guess more than an edge he was looking for an original position. **10...exd5 11.a4 bxa4** Unconventional but not at all bad.

[11...b4 would be a normal choice. 12.Nb3 Re8 13.Bf4 Qb6 with an interesting position.]

12.Rxa4 Re8 13.Qd1 h6 14.Nb3 Be6

[14...Qb6 15.Bf4 Bd7 is a much more subtle way to play. As in the game, the bishop on e6 is not so well placed and allows White to get a solid edge. 16.Ra1 a5∓]

15.Bf4 Qb6 16.Ne5!± Nxe5 17.Bxe5 The defects of Black's position start becoming apparent. All his pawns are being attacked by White. For example,. the knight on b3 attacks c5, the bishop on g2 keeps an eye on d5 and the rook on a4 pressurises the a7-pawn. All in all it is not so easy to play this position for Black. **17...Nd7**

[17...a5 18.Qa1±]

18.Bc3 Bf6 19.Qa1! There are many things going on here but a good player is always able to find the key point that matters. The a6 pawn is a weakness and great players of the past have told us a very important concept about weaknesses in chess: Before attacking a weakness you must firmly blockade it. It makes sense to block the a-pawn with the move ♕a5! **27.Qa5!**
